PURPOSE

"To contribute to a better world by feeding people sustainably produced, great tasting, healthy chicken and meal solutions, now and in the future."

WHAT WE DO

Since being founded in 1993, the Group has grown organically and through targeted acquisitions to become a leading food manufacturer in the UK and Europe. Following a number of strategic disposals in recent years the Group is now focused on the core operations of poultry and meals production. Following the disposal of our European poultry operation during the year, both our poultry and meals operations operate solely in the UK. Our poultry operation produces primary and added value products which are marketed and sold to consumers primarily via major retailers and foodservice manufacturers. Our Meals & Bakery division produces a range of products including hot cross buns, ready meals, pizza, soups and sauces, which retail under own label brands.

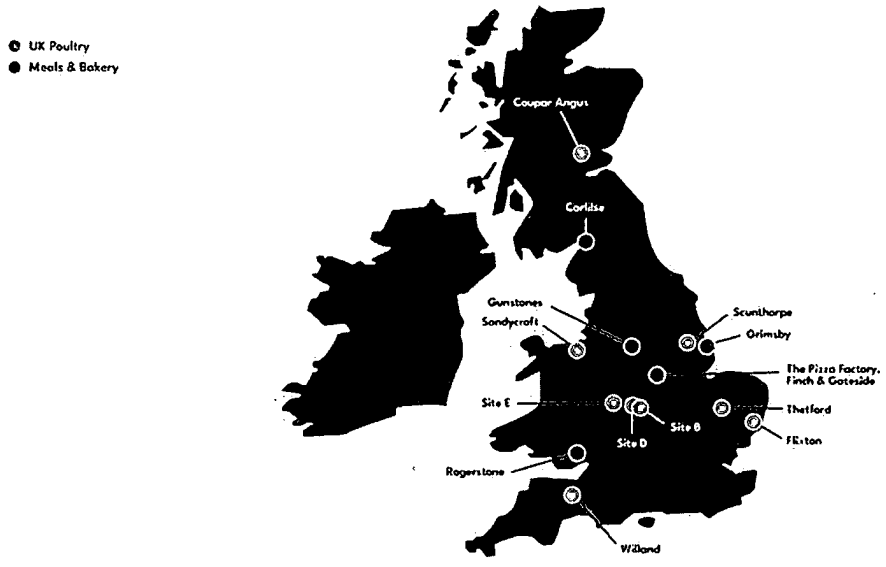

We employ around 14,000 colleagues from over 36 nationalities, and each contribute to the success of our business. We have experienced and talented operational management teams supported by a highly skilled and committed workforce. We aim to continue developing our employees and having the right people, in the right place.

We know our expertise is in processing, so we work with experts in other fields to ensure that our supply chain is as effective and efficient as possible. This allows us to produce the highest quality at the lowest cost. We work with the best in hatching, farming, animal husbandry and transport, so we can focus on what we do best. Our agricultural partners apply best practice in terms of animal welfare and food safety and cover a wide range of production systems ranging from farm assured through to free range, Better Chicken Commitment (BCC), freedom food, corn fed and organic.

As one of the UK's leading food manufacturers, we have both an opportunity and a responsibility to forge a healthier future for our planet and everyone on it. Our sustainability strategy, which was rebranded during the year, 'Doing the right thing' encompasses everything we touch, from the products we make to the ingredients we source and the communities we operate in. The plan highlights our commitment to a more sustainable food system, guiding our work to 2035 and sets out our ambitions to make more nutritious and sustainable food, contribute to a healthier planet and nourish the lives of our colleagues and communities.

WHERE WE OPERATE

We operate 15 manufacturing sites across the UK as follows:

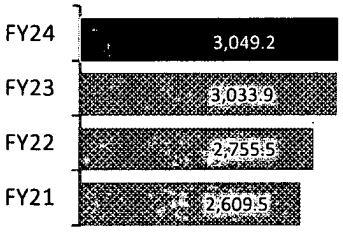

BOPARAN HOLDINGS LIMITED

FINANCIAL HIGHLIGHTS

Further financial progress in FY25 as the resilient business model delivers sustained growth.

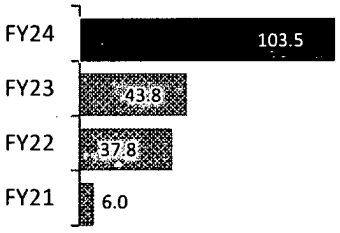

Turnover

£2,563.2m

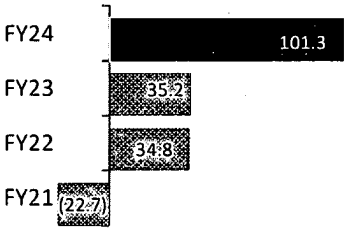

Operating profit before Exceptional Items

£122.7m

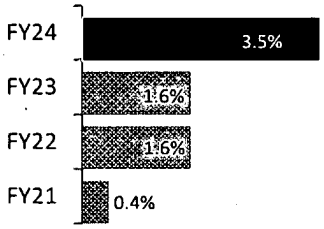

Operating profit

£122.7m

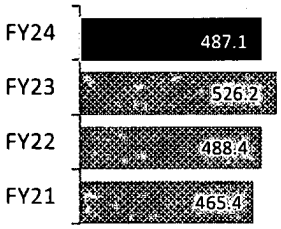

Adjusted EBIT Margin[1]

4.8%

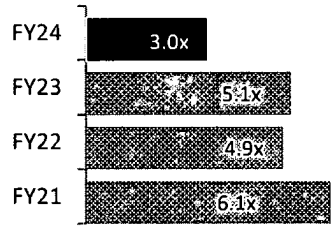

Net debt[2]

£276.4m

Leverage[3]

1.6x

[1] Adjusted EBIT margin % is the measure of Adjusted EBIT as a percentage of Turnover. Adjusted EBIT is operating profit including share of operating profit from associates and joint ventures before defined benefit pension scheme administration costs and exceptional items (note 3).

[2] Net debt comprises bonds, other borrowings and finance leases net of cash, and net of amortised bond costs. These are stated at period end exchange rates, or hedged rates where an effective hedge is in place (note 28).

[3] The ratio of Net Debt to Adjusted EBITDA, over the last 12 months. Adjusted EBITDA is operating profit including share of operating profit from associates and joint ventures, before depreciation, amortisation, defined benefit pension scheme administration costs and exceptional items.

The Group uses Alternative Performance Measures ('APMs') in addition to FRS 102 measurements to monitor the performance of its operations and of the Group as a whole. These APMs along with their definitions and reconciliations are provided on pages 110-113.

BOPARAN HOLDINGS LIMITED

STRATEGIC REPORT

President Review

I am delighted to report that we have further strengthened our financial position in the last 12 months. We have been able to build upon the right sizing undertaken in recent years, solidifying our core businesses and stabilising our operations, and establish a strong foundation to look to the future. Our NextGen plan, announced in late 2024, sets out our ambitions for the next ten years; to feed the nation and lead our industry in carbon reduction.

In what was another strong year for the Group, we saw growth in profit and increased cash flow, paired with a reduction in leverage ratio. Further demonstrating that stretching transformational goals will not compromise our financial targets, and proof that our vision for the future gives both opportunity and assurance for growth.

Through our NextGen strategy we are able to put doing the right thing for people, product and planet at the heart of every decision we make. We are committed to investing in our factories and advanced technologies, to bringing higher standards of animal welfare to poultry, and to ensuring nutritious food is available now and in the future. Together with our relentless focus on those brilliant basics that drive consistency, quality and long-term sustainable growth, we have a winning formula that is already delivering for us and our customers.

This next phase for the Group prioritises using our strengths and scale to drive change at every level in the food industry throughout the next decade, working in partnership with key stakeholders and supported by the passionate people working hard at every level of our organisation. Together we are in an incredibly privileged position; able to build a legacy that will transform the food system for the next generation and ensure the continual success of the Group.

R S Boparan
President and Owner

Chairman Review

The Group has delivered another strong trading performance and continued strategic progress during the year. This, combined with the work to significantly strengthen our financial position over the last few years, leaves us well placed to make substantial investments in our asset base to support our long-term growth ambitions.

Our experienced and agile management team has continued to successfully navigate a challenging operating and macroeconomic environment. Their relentless attention to our strategic goals, coupled with the drive, focus and commitment of our c.14.000 colleagues has been remarkable. On behalf of the Board, I would like to thank all our colleagues who contributed to the Group's strong performance.

Richard Pennycook, Chairman

MARKET OUTLOOK

The Group has strengthened its position during the year, demonstrating continued resilience and determination in navigating a complex socio-economic landscape and supply chain challenges. We have remained focused on delivering the commitments we made last year, including refinancing the business ensuring financial stability, completing the disposal of our European business to strengthen the Group's balance sheet, and transitioning our poultry operations to higher welfare supply.

At the same time the Group continues to evolve in response to consumer and market trends. The rising cost of living continues to shape consumer behaviour, with tighter household budgets prompting a shift towards affordable protein sources, with the poultry sector remaining popular due to its value for money, versatility and broader health benefits.

Changing lifestyles are also driving increased demand for convenient meal solutions. With many consumers seeking to save time in the kitchen we have seen strong momentum in our added-value and ready to cook ranges, which are quick and easy to prepare. Equally consumers are increasingly demanding products that replicate out of home dining experiences, with a growing emphasis on high quality meals, but without the high cost of eating out.

We see these trends as being positive for the business and give us confidence in the Group's growth strategy.

STRATEGIC PROGRESS

This year, we launched our new 'NextGen' strategy. In it we have a clear vision to transform the food system for the next generation by doing the right thing. It's a bold and ambitious strategy to develop a food system that supports healthy diets and a healthy planet. We will disrupt, innovate and use our scale to tackle carbon emissions, to keep families fed, to make healthier products, to protect nature and, to redefine animal welfare standards.

The poultry industry transition to lower stocking densities in line with the Better Chicken Commitment represents a significant milestone in improving animal welfare standards. During the last twelve months we have made significant progress against our 100% higher welfare target set for 2027, with now around 80% of the group's poultry sales meeting the higher welfare standard. We have and continue to work closely with our retail partners and farmers to execute the transition smoothly.

Alongside this after the year end, the Group concluded the sale of Hooks 2 Sisters joint venture to the Boparan Private Office. We see the transaction as a positive first step towards establishing a fully integrated supply chain across Boparan Holdings and Boparan Private Office and providing security of supply for the Group.

The launch of the NextGen saw us also refresh our sustainability strategy. During the year we have engaged with our suppliers to improve the quality of our Scope 3 data, splitting it into Forest, Land and Agriculture ('FLAG') and non-FLAG categories. In conjunction with this our Science Based Targets (SBTi) were approved and validated and so we have now published these for the first time. Our focus for FY26 is being able to measure our scope 3 emissions and we are working with third party provider to help us measure and understand the data better.

Chairman Review (continued)

OUR PEOPLE

With almost 14,000 colleagues who are critical to the success of our business, it's key that we focus our efforts on skill development, career progression and retaining colleagues, whilst also attracting new talent to join our business and build a career with us.

We continue to run targeted graduate and apprenticeship programmes in Finance, Engineering and Technical whilst also providing opportunities in other areas of the business. As these schemes have been in place for a number of years, we are seeing candidates come through into leadership positions within the Group.

During the year we also saw an improvement in the response rate to our employee survey to 64%, up 11% and an increase in the employee engagement score to 71%, highlighting progress around collaboration and training and career development opportunities. The survey provided valuable insights and feedback on a number of priority topics, with actions plans currently being formulated in response to what we heard.

GOVERNANCE AND THE BOARD

The Board is committed to maintaining a high standard of governance and adopting best practice as this develops. During the year we established a Nomination Committee, responsible for Board appointments, succession planning for the Board and senior management and reviewing the structure, size and composition of the Board and executive management team, ensuring there is a healthy balance of skills, knowledge and experience. The Board recognises that the progress made over recent years is in part down to the strength of management therefore having clear succession plans in place is critical to the Group's success.

The Group appointed Paul Friston as CFO on 1 February 2025. Paul succeeded Nigel Williams and joins after 28 years at Marks and Spencer where he held several leadership roles and most recently was Chief Commercial Officer for M&S Food and has brought with him significant commercial, operational and financial experience.

OUTLOOK

Looking ahead, we have a plan to continue the improvements seen this year across both segments of our business. This takes full account of the challenges of labour inflation and is based on a robust series of planned initiatives. The new financial year has started well and we are therefore looking on FY26 with confidence. We believe that the strong base we have consolidated in the past two years positions the Group well for sustainable, long-term growth.

Finally, I would like to thank, on behalf of the whole Board, our dedicated colleagues throughout the Group whose performance is reflected in these results.

R J Pennycook
Non-executive Chairman

STRATEGIC REPORT

CFO Review

This report covers FY25, the financial year for the 52 weeks ending 26 July 2025.

FY25 was a year of continued progress for our business, one focused on consistency of delivery and doing what we say we would do. We delivered this off the back of strong topline performance. The Group also delivered encouraging progress against its strategic priorities, completing the disposal of the European Poultry operations helping to strengthen the balance sheet, refinancing the business reducing the gross quantum of debt and providing a stable platform to invest in the business and more recently, after the year end, disposing of Hooks 2 Sisters joint venture helping to secure the Group's future supply chain.

In the year, the Group delivered an operating profit before exceptional items of £122.7m at a margin of 4.8% up from £103.5m and 3.4% respectively in the prior year. This, plus a £53.2m gain on disposal of the European operations, resulted in a profit before tax of £108.3m compared with £35.5m in the prior year. The Group also delivered a free cash inflow of £75.5m (2024: £47.9m) in the year, helping to drive net debt down to £276.4m (2024: £487.1m). This combined with the improvements in profitability, resulted in leverage of 1.6x (2024: 3.0x), ahead of our expectations and close to our 2030 target.

The Group uses Alternative Performance Measures ('APMs') in addition to FRS 102 measurements to better analyse the performance of its operations and of the Group as a whole. These APMs along with their definitions and reconciliations are provided on pages 110 to 113.

PROFIT AND LOSS

Group (reported basis), £m	26 July 2025	27 July 2024
Turnover	**2,563.2**	3,049.2
Operating profit before exceptionals	**122.7**	103.5
Exceptional items	**-**	(2.2)
Operating profit	**122.7**	101.3
Profit/(loss) on disposal of operations	**53.2**	(0.1)
JVs and Associates	**(3.3)**	0.5
Net finance charge	**(64.3)**	(66.2)
Profit before tax	**108.3**	35.5
Taxation	**12.8**	(5.9)
Profit after tax	**121.1**	29.6

Group (continuing basis excluding European business)[1], £m	26 July 2025	27 July 2024
Turnover	**2,382.2**	2,194.6
Operating profit	**119.8**	93.8

[1]As presented on the face of the profit and loss account

On a reported basis, turnover decreased by 15.9% to £2,563.2m (2024: £3,049.2m) following the disposal of the European Poultry business. On a continuing basis (after adjusting for the disposal) turnover was 8.5% higher. This growth was driven by volume and mix benefits underpinned by strong demand for our products in both segments, and price impacts of an increased proportion of higher welfare sales in our UK Poultry business.

Operating profit grew by £21.4m (21.1%) on a reported basis, and £26.0m (27.7%) on a continuing basis driving a 70 basis point improvement in the Group's operating profit margin. This was underpinned by a strong performance in our UK Poultry business, offsetting weaker performance in the Meals and Bakery business (see further details on page 10).

With the exception of labour costs, inflation in the Group's main cost components has slowed. The business continues to protect themselves against inflationary impacts through pricing pass through mechanisms negotiated with customers. These have been robustly tested during the current year following the Autumn budget announcement and the increases in National Living Wage and National Insurance. The annualised on cost of these changes alone would have been around £70m had we not successfully recovered this from customers. Meanwhile feed costs are on average 5% lower than last year, with these same pricing mechanisms resulting in the benefit being passed back to customers.

PROFIT AND LOSS (CONTINUED)

The Group recognised a £53.2m gain on disposal of the European Poultry business reflecting gross consideration of £161.5m, of which £8.3m is deferred and will be settled in two equal instalments in January 2026 and 2027, net of transaction costs totalling £3.3m and net assets disposed of £105.0m.

A £3.3m expense was recorded with respect to JV and Associates (2024: £0.5m income) reflecting the investment impairment in Hook 2 Sisters, in conjunction with the sale to Boparan Private Office, a related company. For further details see note 34.

Finance costs were £1.9m lower than last year at £64.3m (2024: £66.2m) primarily driven by a reduction in interest expense in relation to the Group's Revolving Credit Facility (RCF), which was undrawn throughout the year, and interest received on cash deposits. This was partially offset by an increase in pension financing charges during the year and write off of unamortised bond fees in conjunction with the £525m bond that was redeemed ahead of its maturity in November, both of which are non-cash.

The profit and loss taxation credit for the year of £12.8m (2024: £5.9m charge) comprises of a current tax charge of £0.6m (2024: £3.3m) and a deferred tax credit of £0.3m (2024: £2.0m credit) in relation to the operating activities of our European businesses up to the date of sale. In addition, our UK operations reflected a £1.4m current tax charge (2024: £1.4m), £0.3m tax charge in relation to prior years (2024: £nil) and a £14.8m deferred tax credit (2024: £3.2m charge) relating to deferred tax assets which have been recognised in the period. The disposal of the European Poultry business qualifies for the UK substantial shareholding exemption and has therefore been treated as an exempt disposal for UK corporation tax purposes.

In addition, a deferred tax charge of £0.6m (2024: £6.2m credit) has been recognised in the statement of comprehensive income in relation to the movement on the net defined benefit pension scheme. Overall, a net deferred tax credit of £14.5m (2024: £5.0m credit) has been recognised in the year which has been predominantly driven by the improved forecasted profitability of the UK group.

SEGMENTAL PERFORMANCE

Segmental performance is measured by reference to Turnover and Adjusted EBIT.

	POULTRY		*MEALS & BAKERY*		*GROUP*	
Reported £m	**26 July 2025**	27 July 2024	**26 July 2025**	27 July 2024	**26 July 2025**	27 July 2024
Turnover	**1,919.7**	2,456.9	**643.5**	592.3	**2,563.2**	3,049.2
Adjusted EBIT	**107.8**	88.4	**15.8**	19.3	**123.6**	107.7

Adjusted EBIT %	**6.0%**	5.0%	**2.5%**	3.3%	**5.1%**	4.5%

[1] After excluding the results of the European Poultry business for which a reconciliation is provided on pages 110 to 113.

Poultry

On a reported basis, turnover in the poultry segment was £537.2m lower than last year due to the disposal of the European operations. On a continuing basis, turnover grew by £136.4m, an increase of 8.5%. This growth reflects the net of higher volumes and better mix more than offsetting the pricing impacts of lower feed costs, together with a pricing benefit of an increased proportion of higher welfare sales. Adjusted EBIT margin (on a continuing basis) increased 100 basis points to 6.0%, from 5.0% last year.

During the year our UK Poultry business began its transition to higher welfare supply and as we exit the year, on average 80% of sales now meet the higher welfare standard. The transition to lower stocking densities represents a significant milestone in improving animal welfare standards and we welcome the initiative. However, the shift means 20 per cent more space is required to grow the same number of birds, and as an industry there is a shortage of supply at a time when demand is high.

SEGMENTAL PERFORMANCE (CONTINUED)

This tightening of supply has positively impacted the business and margins, particularly during the second half of the year, firstly through improvements in carcass balance and reduction in fillet surpluses, and secondly through an increased proportion of sales to retail customers.

We expect this supportive demand environment to continue during FY26 and as a business are committed to expanding our poultry farming supply chain ensuring we have an increased and secure supply of birds, alongside investing in our factories to increase our processing capacity. After the year end, the Group sold its 50% share in the Hooks 2 Sister joint venture to the Boparan Private Office, a related company, a key enabler in securing the supply chain. The disposal, alongside the acquisition of rearing, breeding and hatching farms and assets by the Boparan Private Office will help secure a fully integrated agricultural supply chain for the Group. It also brings the UK Poultry operations closer to its core competency of processing birds, with the Boparan Private Office able to integrate the joint venture into its existing agriculture business.

Meals & Bakery

Turnover in the Meals & Bakery segment has increased by £51.2m, an increase of 8.6%, to £643.5m (2024: £592.3m). The increase Is driven by volume growth underpinned by strong core customer performance and the benefit of the new and transformed ready meals range that launched during the first quarter of the year.

Adjusted EBIT decreased in the year to £15.8m, from £19.3m, diluting margin from 3.3% to 2.5%. It has been a challenging year for the business, with performance impacted by operational inefficiencies during the peak winter period. The launch of the new product ranges during the first quarter disrupted our typical 'flat line' production cycle where we lay down extra stock during the Summer, causing the business to be overstretched and inefficient during the peak period. This continued to impact the performance of the segment throughout the year as the business struggled to reset thereafter.

We have taken a number of measures to tackle these problems head on, not least a clear production plan and a series of efficiency projects and shift pattern changes to help stabilise the operations. Alongside this, we also continue to drive sales through our core customer to support their growth ambition.

CASH FLOW

£m	**26 July 2025**	27 July 2024
Adjusted EBITDA	**168.1**	160.1
Cash cost of exceptional items*	**(0.3)**	(1.9)
Capital expenditure	**(33.3)**	(47.2)
Working capital	**6.8**	7.3
Operating cash	**141.3**	118.3
Interest	**(46.8)**	(54.9)
Pension	**(18.5)**	(11.5)
Tax	**(0.5)**	(4.0)
Free cash flow	**75.5**	47.9

*Cash paid in year relates to exceptional items that were expensed in the prior year.

The business generated free cash flow of £75.5m (2024: £47.9m inflow), largely driven by the growth in EBITDA, lower levels of capital investment and lower cash interest costs.

The Group generated Adjusted EBITDA of £168.1m in the year (2024: £160.1m).

Minimal cash exceptionals in the year totalling £0.3m for site restructuring costs (2024: £1.9m).

The Group recorded a working capital inflow of £6.8m (2024: £7.3m inflow), most of this was driven by an increase in creditors due to higher outstanding payments over year end as a result of business growth. There was a net increase in inventory levels across the Group, primarily in our meals business driven by planned stock builds ahead of the peak Christmas period, as part of its recovery plan.

CASH FLOW (CONTINUED)

Capital expenditure decreased to £33.3m (2024: £47.2m) reflecting the disposal of our European business at the end of the first quarter. Over the last twelve months the Group continued to invest in its UK estate optimising its production footprint, with investments in smaller automation projects such as deboning equipment in our UK poultry sites, and several infrastructure upgrade projects, including the upgrade of our air chill facilities at our Sandycroft site and replacement of kettles in our Meals sites. Capital spend during the year is lower than initial expectations due to strategic spend in relation to capacity increases rolling into FY26. We therefore expect a significant step up in expenditure in FY26.

Cash interest costs reduced by £8.1m in the year, to £46.8m (2024: £54.9m), following improvements in Group liquidity and reflective of no drawings on the Group's RCF throughout the year, together with interest received on cash deposits. Cash interest in respect of the Group's bond was marginally lower than the prior year with the first £390m bond interest payment made during the year, which in November 2024 replaced the maturing £525m bond that had a lower interest rate.

Pension payments increased during the year to £18.5m (2024: £11.5m) in line with the funding agreement and were inclusive of £0.4m additional contribution due to the EBITDA upside mechanism.

Taxation cash flows represent tax paid on European Poultry operations prior to its disposal during the first quarter.

FINANCING

During the year the Group completed a full capital structure refinance improving the Group's debt maturity profile. The committed facilities in place last year were fully redeemed as part of the refinancing transaction and the table below sets out the composition of the new facilities in place:

Funding facility	Facility £m	Utilised at 26 July 2025	Unutilised at 26 July 2025	Maturity date
Bond	390	390	-	November 2029
RCF	80	-	80	May 2029
Total	**470**	**390**	**80**	

The RCF was undrawn at the year-end (2024: undrawn). The facility remains available and can be drawn down as required to fund the seasonal profile of the cashflows of the business.

Net debt reduced during the period to £276.4m (2024: £487.1m) reflecting strong free cash flow generation during the year and the proceeds from the disposal of the European Poultry operations totalling £133.0m Net debt is inclusive of a cash balance of £105.4m (2024: £47.2m). The net debt: Adjusted EBITDA ratio reduced from 3.0x to 1.6x on a reported basis, reflecting the reduction in net debt during the year. On a continuing basis, after removing the last 12 months EBITDA of the European business, net debt: Adjusted EBITDA ratio is 1.7x.

PENSIONS

The Group operates a number of defined benefit schemes, of which all of the UK and Ireland schemes are closed to future accrual. There was a small increase in the pension scheme net deficit during the year, from £134.9m at the prior period to £138.6m. The net pension scheme deficit in the balance sheet is stated before deduction of the associated deferred tax asset £34.7m (2024: £33.7m), which is reported separately within current assets.

The balance sheet position of the post retirement benefit schemes and the net pension financing in the profit and loss account will continue to be unpredictable as discount rates and inflation remain volatile. A net pension financing charge of £6.4m (2024: £3.9m) was recognised in the period and the higher expense driven by an increase in the scheme deficit in the prior year. A further £4.2m (2024: £3.7m) was charged to the profit and loss including scheme administration costs and PPF levy.

We are currently in the process of completing the triennial valuation of the Northern Foods Pension Scheme and until that is concluded contributions to the scheme are in line with the current funding agreement as disclosed in note 30.

CFO Review (continued)

GOING CONCERN

Full details of the Group's going concern assessment is included in the Directors' report on page 51 and are incorporated here by cross reference. The Financial Statements have been prepared on a going concern basis as the Directors are satisfied that the Group has adequate resources to continue in operational existence for a period of not less than 12 months from the date of approval of the financial statements.

OUTLOOK

Our results for the year ending 26 July 2025 were strong across all our key metrics and ahead of our recently updated targets.

I am optimistic about the future prospects of the business, the strong results in FY25 mean we are in a better position than ever to grow and develop the business during FY26 and over the longer term.

We remain cash generative, enabling us to invest at pace in future opportunities for growth whilst strengthening the balance sheet further. Our investment pipeline is strong, and we expect to make significant investments in relation to capacity increases during FY26.

We have made a positive start to the new financial year. Our business remains resilient as our customers and the UK consumer continue to recognise the quality, value and versatility of our poultry and ready meals product ranges.

We are targeting further growth in the Group's earnings in FY26, reflecting our expectations of the continued supportive demand environment for higher welfare in Poultry, and our actions to address the operational challenges within Meals and Bakery. Meanwhile targets for free cash flow in FY26 are expected to be lower than In FY25 due to increased levels of capital investment.

P A Friston
Group Chief Financial Officer

BOPARAN HOLDINGS LIMITED

STRATEGIC REPORT

Key Performance Indicators (KPIs}

The Group also uses a range of other financial and non-financial performance indicators to monitor performance.

Financial

Turnover growth[1]	Operating profit	Adjusted EBIT Margin[2]	Net Debt[3]
(15.9)%	£122.7m	4.8%	£276.4m
(2024: 0.5%)	(2024: £101.3m)	(2024: 3.5%)	(2024: £487.1m)

[1] Turnover growth represents the movement in reported turnover year on year and prior to the disposal of the European Poultry operations. After adjusting for the disposal, turnover has grown by 8.5% from £2,194.6m in FY24 to £2,382.2m in FY25 as presented on the face of the income statement.
[2] Adjusted EBIT margin % is the measure of Adjusted EBIT as a percentage of Turnover. Adjusted EBIT is operating profit including share of operating profit from associates and joint ventures before defined benefit pension scheme administration costs and exceptional items (note 3).
[3] Net debt comprises bonds, other borrowings and finance leases net of cash, and net of amortised bond costs. These are stated at period end exchange rates, or hedged rates where an effective hedge is in place (note 28).

Progress on our financial metrics is included in the CFO review on page 9 to 13.

Operational

Accident Frequency rate[1]	Food safety[2]	Engagement score[3]
1.65	100%	71%
(2024: 1.50)	(2024: 100%)	(2023: 67%)

[1] The total accident frequency rate is calculated as the total number of accidents in a 12-month period, multiplied by 100,000 then divided by the total hours worked in the same 12-month period. The increase in accident frequency rate during the year was a due to an increase in accident numbers across a handful of sites, these are considered to be one-off incidents rather than a systemic issue. A proactive approach to enhance our safety protocols and training initiatives have now been implemented to mitigate future risks.
[2] 100% of our UK sites passed unannounced independent audits to the Global Food Safety Initiative (GFSI) standard. We have maintained our 100% pass rate on independent audits reflecting the continued focus on food safety standards.
[3] The engagement survey is not undertaken every year; the comparative presented is from the survey undertaken in FY23.

Sustainability

Energy usage[1]	Food waste[2]	Deforestation and conversion free soy meal[3]
508,135,913 kWh	21,595 tonnes	55%
(2024: 590,833,877 kWh)	(2024: 20,055)	(2024: 55%)

[1] Total kWh energy usage for our Group manufacturing and processing sites. Over the past 12 months our energy usage has reduced by 14%, driven by the disposal of the European Poultry business in October 2024, together with smaller reductions through energy saving initiatives
[2] Food waste calculated in line with Waste and Resources Action Programme (WRAP) guidelines, for our UK businesses only. Compared with last year there has been an increase in total food waste. This reflects improvements to our data collection process and completeness of inputs compared to the comparative period.
[3] All soy meal is purchased to recognised deforestation free standards of which 55% is the higher mass balance standard.

BOPARAN HOLDINGS LIMITED

STRATEGIC REPORT

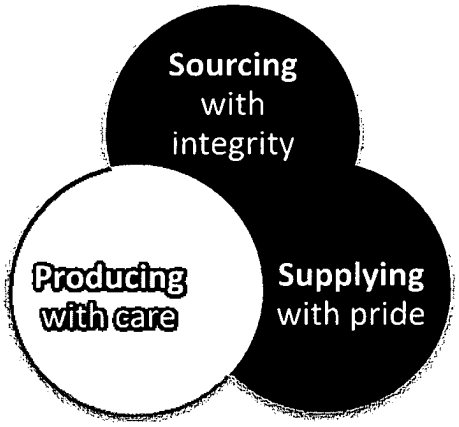

Strategic Management

BUSINESS MODEL

Our business model is focused on making sure that from farm to fork we are doing the right thing for all our stakeholders, with our three pillars of sourcing, producing and supplying underpinned by five key principles.

Great People
A talented work force is at heart of our business

Sustainability
Our sustainability strategy underpins all areas of our business model

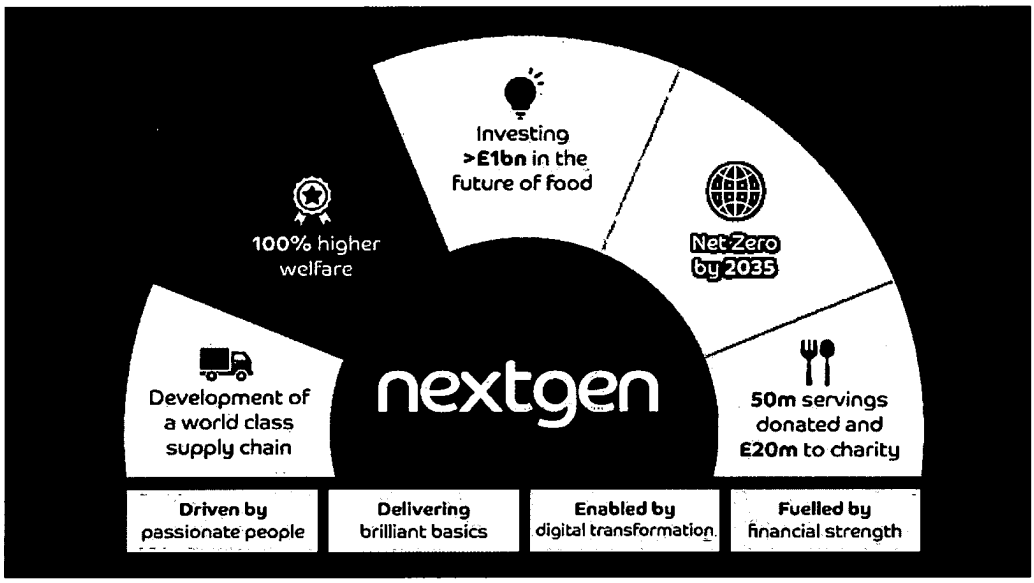

Trust
Be a trusted partner for all our stakeholders and maintain our reputation for doing the right thing

Targeted innovation
Deliver superior performance through operational excellence and investing in next generation technologies

Disciplined execution
We strive to do the basics brilliantly and uphold the highest standards of food safety and animal welfare

OUR STRATEGY

In the Autumn 24, we launched our new strategy **NextGen** focused on doing the right thing and transforming the food system for the next generation.

The food system isn't working for people or the planet. Population growth means more people, eating more food and a bigger impact on the world around us. Things have to change.

NextGen is a bold strategy to develop a food system that supports healthy diets and a healthy planet. We'll disrupt, innovate and use our scale to tackle carbon emissions, to keep families fed, to make healthier products, to protect nature, to redefine animal welfare standards – to transform the food system for the next generation.

OUR STRATEGY CONTINUED

NextGen unites our broad range of industry-leading activities and transformation work under five focus areas supported by four enabling frameworks, all perfectly aligned to deliver on our ambitions by 2035.

- **DEVELOPING A WORLD CLASS SUPPLY CHAIN**

Our farm to fork operations give us scale and unique insight to our supply chain. From production in our food factories to product served through our customers' stores or restaurants - when we make a change good things happen, and the impact is far-reaching.

The strong foundations built by brilliant basics and passionate people day in, day out, across our operations are our launchpad to transform the future of food, embracing new technologies and automation in next generation factories developed over the next ten years.

- **HIGHER WELFARE FOR EVERY ANIMAL**

Good animal welfare is at the heart of a sustainable food system, and we're leading the market to give all birds more space and a better environment.

By investing in better farming practices, our plan will see all our poultry raised to higher welfare standards by 2027. We want to lead the way in our industry and are on track to be the biggest provider of higher welfare poultry in the UK within the next two years.

- **INVESTING IN THE FUTURE OF FOOD**

We're making our biggest ever investment in the future of food, developing next generation factories and farms to provide sustainable, nutritious, affordable, quality food that is accessible for all and kinder to the planet.

Investing in new technology and automation makes us more efficient and helps reduce our impacts, while driving growth for the Group and our customers. We never forget that it's the people behind the product who make the biggest difference, so we invest in them too - from training and equipment to benefits and community programmes, our people get the best, because they are the best.

- **NET ZERO BY 2035**

The need to get to Net Zero is more urgent than ever before. We are clear that food production is a big part of the problem, and so we're determined to go further and faster to find solutions.

We're committed to being Net Zero by 2035, an ambitious and market- leading target.

We are building zero emissions factories that are powered by renewable energy, that use less water, restore nature and biodiversity and we're investing in zero emissions poultry feed that stops deforestation.

Accelerating our own change creates a catalyst for good across the industry, so we're commencing annual reviews of long-term strategic plans which support investment in new technologies to achieve our Net Zero ambition.

- **DONATING MORE AND BETTER FOOD TO HELP THE HUNGRY**

Too many people across the UK go hungry because they don't have enough food. And yet we have an obesity crisis, and the food industry wastes millions of tonnes of food every year.

As one of the country's largest and most diversified food makers we understand the importance of a healthy nutritious meal. We use surplus food in our supply chain to make wholesome meals that we donate through our partners to struggling families. We will donate 50 million healthy and nutritious servings under our NextGen plan by 2035, and we'll raise £20m for the Boparan Charitable Trust to further transform children's lives.

We want to redistribute food, reducing waste and help families eat better, because putting food on the table shouldn't be a struggle.

Strategic Management

These initiatives are underpinned by the following key enablers:

- **PASSIONATE PEOPLE**

From the thousands of people on our food production lines to our expert bakers, food technicians, data scientists and development chefs, everyone is passionate about making food better for people and the planet.

- **BRILLIANT BASICS**

Innovation is at the heart of our business, yet we never forget that every shift starts with brilliant basics. Every colleague, every site, every single day. It's how we make everything run smoothly and deliver outstanding results for our customers.

- **DIGITAL TRANSFORMATION**

We're investing in digital, technology and data to transform the way we do things in our factories.

We may use traditional recipes and ingredients that have survived the test of time to make delicious food with care, however by investing in the future of food means using the very latest technology to make work easier for our colleagues, better for the planet and to achieve consistent quality for our customers.

- **FINANCIAL STRENGTH**

We've already strengthened our balance sheet, reducing debt and improving leverage to historic lows.

NextGen focuses on growth funded by internal investment, creating strong cash flows through robust capital management that allows us to continue reducing our debt while investing in long-term sustainable growth. Achieving an investment grade balance sheet will give us the financial strength to truly transform the food system for the next generation.

Risk Management

GOVERNANCE OF RISK

The Group has continued to review and enhance its approach to risk management and internal control during the year. The risk management framework designed to monitor, measure, and mitigate risks continues to include the divisional and operational risk registers. The structure of the risk management policy has been simplified to mirror the ways of working in the business and ensure these are fit for purpose. This process continues to provide greater governance, clarity and ownership of cross-business risks.

The risk management framework focuses on risks within each division and function responsible for the identification, tracking and ongoing management of those risks. These risks include those opportunities and challenges that face the business, colleagues, customers and third parties. The processes and risks are subject to review with the functional leadership teams, Audit and Reputation Committee's and wider Board. This allows for a cross-functional view of common risks and development of appropriate governance of those risks.

Outlined below are potential risks that could impact the Group's performance, causing actual results to vary from those previously experienced. These risks are monitored on an ongoing basis through the Group's risk management processes.

The Group's risk profile will continue to evolve as a result of future events and uncertainties. The emerging risks arising from these are monitored to understand the potential impact on our business and to allow timely decision-making. The risks are monitored using a variety of sources from horizon scanning, in-house specialist knowledge or expertise from functional areas, as well as support from external sources. Emerging risks will continue to be discussed and monitored, with appropriate action taken when required to mitigate any potential impact.

Risk management (continued)

PRINCIPAL RISKS AND UNCERTANTIES

The Board has carried out an assessment of the principal risks facing the Group, in line with the risk governance set out above, being those risks that could threaten its business model, future performance, solvency, or liquidity. The Group is exposed to a variety of risks however, in common with other businesses, it only reports on those risks with a higher likelihood and greater current or near-term impact on strategic objectives, operational plans, or reputational damage.

Risk trend:

⇧ Increasing
⇔ Stable
⇩ Decreasing

COMMERCIAL		
Risk	**Risk and potential impact**	**How we manage it**
Commodity inflation & supply chain disruption ⇔	The Group's cost base and margins can be affected by fluctuations in raw material, packaging, and energy costs. This has been particularly prevalent over the last two years following the escalation of war in Ukraine. Equally, a loss of, or interruption of supply from a key supplier could cause short-term disruption to the operational ability of the Group and adversely affect its results. This risk is magnified due to the consequences of climate change and availability of raw materials.	• The Group has pass-through mechanisms in place with key customers to share the impact of changes in commodity prices, calculated by reference to external commodity pricing and are reset periodically. We continue to strengthen our processes in this area, including being more transparent with our customers about the underlying cost assumptions to support these price recovery discussions. These pass-through mechanisms have historically helped the Group to mitigate price pressures although they do not provide total coverage of all customers or cost types. • We have a dedicated procurement team that is appropriately resourced and skilled, to proactively respond to changes in commodity markets. • The Group manages its agricultural supply and planning carefully and has a dedicated team and software to ensure minimal disruption in bird and other raw material supply. • We work closely with our customers and suppliers to challenge the product ranges and explore new ingredients to enable innovative products to be developed as well as helping us to establish the commodity landscape and alternative sourcing.
Customer relationships & competitive pressures ⇔	Our sales are concentrated with a number of major customers who operate in a highly competitive market. Actions taken by these retailers (for example, changes in pricing and promotion strategies), may negatively impact our financial performance and can also have an impact on the overall market for our products.	• We have strong relationships with the major retailers built on the quality of our products and high levels of customer service. • We have regular working Groups with our customers to discuss risks, opportunities and to support both sides on critical issues such as cost changes and availability and sourcing of raw materials. • We work closely with our customers on product development programmers to provide each customer with unique products and consumers with greater choice. • The Group continues to focus on maintaining a diverse range of customers across a broad range of price points.
Consumer preferences ⇔	Consumer preferences, tastes and behaviours change over time. As part of this, the consumers' desire for healthier choices and increased convenience and value. Our ability to anticipate these trends and the cost to innovate are critical to our competitiveness in the marketplace and our performance. Furthermore, sales of many of the Company's products can be adversely affected by seasonal weather conditions.	• The Group continues to invest in product innovation to ensure the introduction of new products. • We continuously review the impact of weather on sales during our monthly performance reviews.

Risk management (continued)

OPERATIONAL		
Risk	**Risk and potential impact**	**How we manage it**
Labour availability and cost ⇔	The ongoing success of the Group is dependent on attracting and retaining talent to deliver the Group's strategy. With external political and economic pressures, including changing government policies, there is a risk that the supply of labour or specialised skills may be, in certain areas, constrained and, in addition, the cost of labour could increase, resulting in additional financial and operational pressure on the Group.	• We have processes in place to attract diverse talent into the business through our 'in-house' team. In addition, we have partnerships in place with third-party agency providers to align with shifting market conditions. • We have succession plans in place to retain and progress our talent pipeline. During the year we implemented a nomination committee, responsible for reviewing these succession plans • We benchmark pay to make sure we remain competitive in the market and, where appropriate, amend our offering. • The Group also has a strong commitment to excellent working conditions, on-the-job training, group wide communications and colleague engagement to retain employees. • We have a well-established and successful graduate recruitment and development programme and invest heavily in apprenticeship training. • We have a robust training scheme across all locations to ensure we are continuing to invest in our people. • The Group continues to invest in automation and innovation to reduce our dependency on manual labour.
Stoppage at major manufacturing site ⇔	We have several major manufacturing and processing facilities, used to satisfy our customer demand. Any significant processing slowdown or stoppage could have an adverse effect on our business. This could result in us being unable to fulfil the needs of our customers or may result in increased costs to repair or replace the manufacturing facility.	• For any short-term slowdowns or stoppages, we would look to satisfy customer demand from stocks of finished goods. For more significant issues, we would look to transfer production to another manufacturing site in the Group. • We also have insurance policies, including business interruption, that would provide some level of cover for the risks described. • The work around business continuity strategies has been a significant focus to ensure the strategies are fit for purpose and capture the needs of the business and to minimise the impact in the event of a stoppage at a facility.
Avian Influenza ⇩ due to our experience in managing outbreaks and strengthened capabilities in this area	A significant outbreak of Avian Influenza could limit the Group's supply of live birds, demand for our poultry products and our ability to conduct operations. This could result in additional financial and operational pressure on the Group.	• We have an active monitoring process reviewing the wild bird migration and where greater risks are expected allowing preventative measures to be put in place where appropriate. • We have business continuity plans should an outbreak occur near to any of our operating facilities or on the farms of our principal suppliers, including but not limited to; area restrictions, additional washing and disinfecting of transport vehicles and veterinarian checks. • The Group also is part of and contributes to the relevant trade association network on this topic particularly considering the changing requirements on export due to Brexit.
Food Safety & Reputational risks ⇔	The Group is subject to the risk of product or raw material contamination through either accidental or deliberate means. Such incidents could lead to product recall costs, reputational damage, and regulatory penalties.	• Each site has a dedicated team to ensure compliance with Group and industry standards. • Each manufacturing site is subject to both internal and external audits, including by customers, environmental health departments, and the Food Standards Agency (UK). • Whistleblowing processes are in place and routinely tested. • Regular mandatory compliance-related training is in place. • The Group also constantly monitors both compliance and performance through a comprehensive set of key performance indicators and reporting through to the Reputation Committee.

Risk management (continued)

OPERATIONAL		
Risk	**Risk and potential impact**	**How we manage it**
Health & safety ⇔	Failure to protect the health and safety of our employees could result in a serious workplace injury or fatality, which could lead to reputational damage, regulatory restrictions or penalties and personal litigation claims.	• Each site has a dedicated team to ensure compliance with Group and industry standards. • The Group constantly monitors both compliance and performance through a comprehensive set of key performance indicators, including Accident Frequency Rates and Audit Performance Score which is subject to regular review by the Reputation Committee. • Each manufacturing site is subject to internal audits by the Group H&S team on an annual basis and sites are also subject to an independent annual property and fire risk survey through our insurance provider. • The Group retains ISO 45001 Occupational Health and Safety Management Systems Standard across its operations.
Climate change ⇔	Tackling climate change, by taking measures to limit its impact to manageable levels, has become a key priority for governments, businesses, and customers. A failure by the Group to appropriately manage the impact of climate change in our products and operations and meet the needs of our customers, may cause operational disruption, and adversely affect the Group's result. Failure to adhere to the increasing laws and regulations in this field, could have both a financial and reputational impact on the Group. Through our work on Climate-Related Financial Disclosures (CFD) (see pages 39 to 46), we have identified risks and opportunities associated with climate change, ingredients sourcing, energy pricing, policy changes and changing consumer behaviour.	• The Group continues to develop its sustainability strategy with a focus on improving production efficiency, reducing carbon emissions, responsible water stewardship, reducing food waste, and identifying alternative options to decrease reliance on imported soya for feed. • We have committed to set near and long-term companywide emissions reductions to meet Net Zero targets. Our goal is to achieve Net Zero By 2035.
IT systems and cyber attacks ⇧ due to increased prevalence and sophistication of high-profile cyber-attacks in the year	The sophistication and frequency of cyber-attacks continue to increase, highlighting an escalating information security threat. The Group relies heavily on information technology and systems to support our business. An extended failure of our core systems, caused by accidental or malicious actions (including cyber-crime), could result in a significant financial impact on the business.	• The Group maintains a programme of controls to protect the confidentiality, integrity and availability of information across the business. This includes but is not limited to maintaining firewalls, threat detection, authentication controls and annual penetration testing. • This year we have continued to enhance the cybersecurity review with our partner (ECSC Ltd) and continue to work towards reaching the standards of cybersecurity and processes required to meet ISO27000 certification. • Our business continuity strategies and plans have been reviewed and strengthened to ensure minimal disruption will occur in the event of an attack.
Political environment and corporate compliance ⇔	The regulatory environment creates pressure on business performance, requiring investment and frequent changes to processes and/or ways of working. This includes responding to the growing regulatory burden, with anticipated changes around corporate governance and reporting and potential for changes in policy and regulation following the UK change in government, as well as other changes in the political landscape both in the UK and internationally. Non-compliance may result in fines, criminal prosecution for the Group and/or colleagues, litigation, investment to rectify breaches, disruption, as well as reputational damage.	• We have a series of Group policies that provide a framework for the business. These policies are reviewed and refreshed annually. • We have a structured training programme for higher-risk regulatory areas which are cascaded throughout the organisation. • The confidential whistleblowing line allows colleagues and other stakeholders to report concerns. • Proactive management with regulators, trade bodies and policy makers impacting our industry.

Risk management (continued)

FINANCIAL		
Risk	**Risk and potential impact**	**How we manage it**
Liquidity risk ⇩ due to improvements in the Group's liquidity headroom	The Group has committed financing in place, which can only be withdrawn in the event of a breach of financing agreement, such as a breach of financial covenants, when the Group might be restricted in its ability to operate normally and could be required to dispose of assets to pay down debt and incur additional costs. The Group's existing facilities are due to mature in May and November 2029.	• Liquidity is a leading measure for the business and is managed by the Group treasury team through the production of short, medium and long term cash forecasts. • Liquidity risk is monitored by the Board who review the adequacy of available funding and compliance with borrowing covenants monthly. • Direct engagement by the CFO and Group Finance Director with the Group's lenders.
Pensions ⇔	The Group has defined benefit pension plans some of which are currently in deficit (on an actuarial basis). Valuations of all defined benefit plans are dependent upon market conditions. The Group may be required to increase pension contributions which may have an adverse effect on its financial condition. Furthermore, pension regulations could restrict the freedom of the Group to undertake certain corporate activities (including disposals and return of capital to shareholders).	• The Board regularly reviews the value of assets and liabilities of the Group's pension schemes as well as the potential impact of changes in actuarial assumptions and actions that can be taken to mitigate the risks associated with the defined benefit pension schemes. • Investment sub-committees manage and monitor investment strategy and asset performance. • The Group maintains a good working relationship with the Pension scheme trustees with whom it has agreed a long-term funding plan.

FINANCIAL		
Risk	**Risk and potential impact**	**How we manage it**
Interest rate risk ⇔	The Group has a mixture of fixed and floating rate facilities in place. A material increase in interest rates would increase the Group's cost of borrowing, resulting in additional financial pressure on the Group.	• The Group manages its exposure to interest rate risk using fixed interest rate facilities where possible, such as the outstanding Senior Secured Notes. • For floating rate facilities, the movement in interest rates is continually monitored by management and the use of risk management tools are implemented where appropriate to minimise the impact on the Group.

FINANCIAL RISK MANAGEMENT POLICIES AND OBJECTIVES

The main risks arising from the Group's financial instruments are interest rate risk and liquidity risk.The Board reviews and agrees policies for managing each of these risks and they are summarised below. These policies have remained unchanged since the beginning of the period.

Interest rate risk - The Group is exposed to interest rate risk because of its financing facilities. The Group manages the exposure to interest rate risk with fixed interest rate facilities where possible such as the outstanding Senior Secured Notes. These notes represent the majority of the Group's interest expense (see note 4 for details). The Group retains an exposure to interest rate risk as a result of the other debt facilities in place which attract interest at SONIA plus an applicable margin. This residual interest rate risk is continually monitored by management, and the use of risk management tools are implemented where appropriate to minimise the impact on the Group.

Liquidity risk - The Group uses a mixture of long-term borrowings and short-term working capital facilities in order to maintain liquidity and ensure sufficient funds are available for ongoing operations and future developments. The strength of the Group's short term cash flow forecasting ensures that liquidity risks can be forecasted with accuracy and action plans quickly put in place to mitigate risk.

The Group only enters trades of financial instruments for specific purposes; speculative purchases are not made.

BOPARAN HOLDINGS LIMITED

Our Stakeholders (Section 172 Statement)

This section describes how the Directors have had regard to the matters set out in section 172(1)(a) to (f) Companies Act 2006 in exercising their duty to promote the success of the Company for the benefit of its members and stakeholders as a whole.

The Board is responsible for leading stakeholder engagement and recognises the need for high standards of business conduct and ethics. Like many major UK businesses, the Group operates in a complex and interconnected commercial and regulatory environment, which impacts and touches many different stakeholders. The Board recognises the need to act fairly when balancing the needs and requirements of the different stakeholders. Equally we understand our long-term growth and success are dependent on engagement with stakeholders. By understanding and engaging with stakeholders, the Board can consider their views and interests are considered when making key decisions.

STAKEHOLDER ENGAGEMENT

The table below sets out the Board's approach to stakeholder engagement under Section 172 of the Companies Act, why stakeholders matter, and some key decisions made during FY25.

STAKEHOLDER ENGAGEMENT CONTINUED

Our People	
Why we engage	We have an experienced and dedicated workforce of nearly 14,000 colleagues at 15 manufacturing sites and dedicated office facilities across the UK. We have a responsibility to ensure all colleagues work in a safe, respectful environment and have opportunities to learn and develop in their careers.
How we engage	• Internal communication briefings on our priorities and performance. • Colleague NGaje surveys. • Coffee Shops at least weekly with senior managers • Using "You said-We did" Board at sites to elicit feedback and demonstrate actions taken • Colleague appraisal process. • Employee app inclusive of local and group wide updates. • A formal whistleblowing procedure.
What our stakeholders have told us matters most to them	• Better understanding of our purpose and strategy. • Clarity regarding our sustainability and environmental ambitions. • More frequent communication on how the business is performing. • A safe, respectful, and fair working environment. • To provide colleagues with more information about how they can develop their careers. • How can the Company further support employee wellbeing.
How we are responding	Specific actions taken in the year include: • The Board continues to invest in colleague facilities, which this year included enhancements to site canteens and changing rooms. • The Board receives monthly updates on people related KPI's and important employee relations issued and trends. • We have improved how we calibrate the assessment of individual performance to improve consistency and fairness across our management population. • Members of the Board have continued to meet and listen to the views of colleagues during site visits, with feedback from the 'Coffee Shops' regularly reviewed by the Board. • We continue to enhance the functionality of our employee app with sign up rates being 63% of our total workforce. Colleagues are able to access key company information, policies, wellbeing support, view their payslip, book holidays and access recognition rewards all directly through the App. Other measures we have in place are as follows: • Engagement survey, following which clear actions plans are put in place to drive improvements and to respond to what we have heard. • We are committed to protecting the health, safety, and welfare of our colleagues. Health and Safety matters are reported and discussed at the Reputation Committee. • A formal whistleblowing procedure is in place to allow employees to raise any concerns or issues they have confidentially, and details of all cases raised are fed back to the Board via the Audit Committee. • We continue to invest in the things that matter to our colleagues; subsidised transport, a subsidised canteen offer, recognition awards, long service awards, community engagement and family fun events for site-based colleagues. • Risk Meetings conducted at Divisional Level to support Group Level Risk identification and mitigation • Wider business engagement on risks and control improving risk maturity and understanding • Developing Risk Culture – open, honest and constructive approach to risk embedding

Our Stakeholders (Section 172 Statement) (continued)

Our Customers	
Why we engage	Customers and consumers buy and eat our products – they are at the heart of our business model. The Board recognises the importance of maintaining food safety and integrity and responding to changing consumer behaviours and preferences. The Board is committed to delivering quality products which are safe, great tasting and good value to ensure their needs are fully met.
How we engage	• Regular meetings take place at many levels, through the commercial sales team, technical team, senior management and President. These cover product range reviews, new products, promotions, food quality and service levels. • Customer insights, from various channels, are shared and discussed at Board meetings and Senior Management Team (SMT) meetings, including details on consumer behaviours, market trends and competitor activities. • Product tastings and NPD are showcased at Board meetings. • Customer and consumer feedback is reported to the Board and its sub-committees.
What our stakeholders have told us matters most to them	• High quality products which are safe and have demonstratable supply chain integrity • Great tasting and desirable products that meet consumers' needs. • Value for money. • Environmental, nutritional and sustainability issues. • Excellent customer service and consistent service levels
How we are responding	• Food safety is our number one priority. The UK has one of the most rigorous food safety regimes in the world and our management meetings commence with a review of food safety before anything else is discussed. • The Board is regularly updated on customer initiatives and performance and developing trends, such as the impact of weight loss medication (GLP1s) on consumer behaviour. This assists the Board in understanding our customers, the opportunities, and potential issues. • The Group, including the President works closely with retail customers to ensure we can address customer demand patterns, have the right commercial structures in place and to focus on new product development. • The Board approved sustainability strategy is an area that is a key focus for our customers. Read more on our sustainability strategy on pages 31 to 38.

Our Suppliers	
Why we engage	The effectiveness of the Group's interaction with our suppliers is essential given the level of ingredients and packaging purchases we make. The Board fully appreciates that ongoing dialogue with our suppliers has never been more important as the food industry continues to face challenges in respect of labour availability, inflation and material sourcing.
How we engage	• Audits and visits. • Supplier policies. • Industry events and forums. • Regular, constructive 2-way meetings with suppliers discussing issues and actions. • Supplier reported KPI's on a regular basis for key suppliers
What our stakeholders have told us matters most to them	• Understanding the Group's strategy and growth plans. • Forming long-term collaborative partnerships. • Transparent terms of business. • Fair payment terms.
How we are responding	• We continue to undertake supplier audits to ensure the safety, traceability, quality and provenance of the raw materials that we use. Matters such as these are reported to the Board via the Reputation Committee. • We operate a Group centralised Procurement function which manages supplier engagement and allows us to have tighter control of standards, quality and costs. • Category reviews are undertaken regularly with a focus on forming long-term partnerships which are mutually beneficial and promote flexibility and investment. • Payment policies, practice and performance are reported through the Government's Payment Practices Reporting portal and reviewed by the CFO. • Responding actively to customer, consumer and colleague feedback.

Our Stakeholders (Section 172 Statement) (continued)

Trade Bodies, Industry and Government Groups	
Why we engage	We work with many trade bodies including, British Poultry Council (BPC), Chilled Food Association (CFA), Red Tractor and industry charities including IGD and GroceryAid. We also actively engage in key industry groups such as Food Industry Intelligence Network (fiin), Modern Slavery Intelligence Network (MSIN), Food Industry Initiatives on Antimicrobials (FIIA), Global Coalition for Animal Welfare (GCAW), Meat Business Women, Institutional Environmental Management and Assessment (IEMA) and Food Network, Ethical Trade (FNET). We engage with key government and related departments such as DEFRA, FSA, FSS, HSE, EA, NRW and the UK Health Security Agency. These engagements allow us to help inform policies and improve industry standards.
How we engage	• Our directors and senior management sit on steering committees, groups and boards, including co- chairing some prominent industry groups, such as fiin, GCAW and the IGD Sustainable Diets Forum. • We attend working group meetings. • We attend annual conference events and support development of best practice learnings amongst members. • Information and reports provided by these engagements help inform our strategy and decisions
What our stakeholders have told us matters most to them	• Food safety. • Animal welfare. • Human rights. • Continual development of our policies, procedures and working practices to address evolving areas.
How we are responding	• We continue to provide input, resources and leadership into these groups for the benefit of our business, the sectors we operate in and the food industry as a whole. • The Group has a comprehensive supplier management programme to assure the safety, quality and integrity of our end-to-end supply chain. It encompasses physical audits, integrity testing and traceability challenges. Matters such as these are reported to the Board via the Reputation Committee. • 100% of our partner farms are independently audited annually. Results of these audits are reported to the Board via the Reputation Committee.

Our Communities	
Why we engage	Our business depends on the communities in which we operate. We see it as our responsibility to actively engage with and support our local communities, including local businesses, residents, and charities. We also have an important role to play in ensuring we reduce our impact on the environment.
How we engage	• Working with local schools and universities. • Charity fundraising and foodbank donations. • Environmental commitments.
What our stakeholders have told us matters most to them	• Giving back to the community. • Act responsibly. • Issues are addressed and closed out promptly.
How we are responding	• We are continuing our partner initiative with Marks and Spencer and FareShare to donate nutritious meal servings to underprivileged children. • Additionally, our business established a new collaborative relationship with Natasha Allergy Research Foundation to support combating allergy issues in the food industry. • The Board continues to support colleagues taking part in fundraising activities for a variety of charities. • We take actions to minimise the impact of our operations on the local community.

Our Stakeholders (Section 172 Statement) (continued)

Shareholders, Bond holders, Bank and Pension schemes	
Why we engage	The Group's shareholders, banks, bondholders and lenders provide short- and long-term capital that supports the viability of the Group. The Group also has defined benefit pension schemes who depend on the Group's long-term ability to fund the schemes.
How we engage	• Annual Financial Accounts. • Quarterly updates to lenders and credit rating agencies including trading updates, financial statements, and outlook statements. • Regular update meetings with the Chair of the pension trustees. • Website including Investor Relations section.
What our stakeholders have told us matters most to them	• Strong management. • Sustainable growth supported by an appropriate balance sheet. • Compliance with covenants. • Ongoing schedule of contributions.
How we are responding	• Direct engagement by the CFO and Group Finance Director with the Group's lenders via conference calls and face-to-face meetings. • Regular dialogue, including attendance at pension trustee meeting with updates on trading performance. • Periodic updates are provided to the Board on funding levels, investment strategy and performance.

DECISION MAKING

The primary responsibility of the Board is to promote the long-term success of the Company by creating and delivering sustainable value whilst also making a positive impact on society. The Board acknowledges that to drive our strategy and secure long-term success, it is essential the potential impact of key decisions is clearly understood and evaluated - this involves considering shareholder perspectives, all relevant stakeholder interests, and ensuring that every decision aligns with our "Doing The Right Thing" culture.

It is recognised that stakeholder interests may sometimes conflict, which may necessitate prioritising interests. When making key decisions, the Board, led by the Chairman, evaluates all factors fairly and in good faith, and assesses the likely long-term impact on all stakeholders and always keeping the long-term success of the Company as the primary objective.

What is a Key Decision?

The Board considers "Key Decisions" to be those decisions which will have a material impact on the Company, its stakeholders and/or its long-term strategy.

How the Board Approaches Decision Making?

The key decisions made by the Board are both the foundations and drivers for the long-term success of the Company. To ensure that the Board is in a position to make good decisions the Board uses a multi-faceted approach to ensure it has the appropriate resource, skills, transparency, oversight, scrutiny and evaluation. The Board approach to decision making is set out over the page.

Our Stakeholders (Section 172 Statement) (continued)

DECISION MAKING CONTINUED

BOARD APPROACH TO DECISION MAKING	
Setting strategy, culture and values	• Our strategy, values and culture are key to how we do business and how we achieve our purpose. • The Board sets our strategic direction and communicates this to senior management for it to be cascaded throughout the business – for further information see our Strategy Report on page 15. • The Board promotes and supports our core ADART values and "Doing the Right Thing" culture.
Diverse skills, knowledge and experience	• The Directors possess a wide range of skills, knowledge, experience, and stakeholder expertise. • This diversity aids the Board in decision-making and enables them to make well-informed decisions. • These decisions support the long-term sustainable success of the Company for all stakeholders.
Clear responsibilities	• The Group has a clear governance structure and each Board Sub-Committee has a clearly documented Terms of Reference – for further information see our Governance Report on page 29. • The Group has 2 core governance documents to establish clearly the matters reserved for the Board and the expectations of senior management in making decisions within their authority – these are known as The Board Book and The Delegated Authority Matrix (DoA). • The Rulebook defines Board and Divisional responsibility for upholding our 6 pillars of good governance: reputation, strategy, finance, performance, people and compliance. • The DoA clearly defines the approval flows and where the Board has final approvals.
Board Information	• The Board Sub-Committees report stakeholder considerations to the Board, including o Reputation committee - reporting on colleague health and safety, food safety, the welfare of animals, sustainability and the integrity of the food chain. o Finance and Pensions committee - reporting on the interests of Bondholders and other lenders and the Pension schemes. o Nominations Committee - to discuss and make decisions on the Group's appointment strategy. o Remuneration Committee - to discuss the reward and incentivisation of employees. o Related Party committee - reporting on transactions between related parties and ensuring these are on an arm's length basis. • Management provides the Board with detailed papers which outline the long-term impact of decisions and/or with verbal presentations and updates of all key matters under consideration. • The Group operates a detailed Risk Management Framework which is regularly reported to the Board.
Discussion and decision	• The Board openly and robustly discusses key decisions and conducts thorough evaluations, risk management and challenges to ensure decisions support long-term success. • Stakeholder engagement as detailed on page 22 is a consideration of their decision-making process.
Monitoring	• The Board is regularly updated on key decisions and the actions taken regarding them. • These updates are provided through reports from Management or Board Sub-committees at each Board meeting and verbal updates as needed.

STRATEGIC REPORT
Our Stakeholders (Section 172 Statement) (continued)

Set out below, we have set out examples of key decisions made by the Board this financial year and provided further details about the decision-making process.

EUROPEAN POULTY OPERATION SALE AND REFINANCE	
Decision	One of the key decisions of the Board in the past year was to decide how to approach the Group's refinancing needs, with the listed Bonds maturing in November 2025, in a way that ensured the continued financial stability of the Group and best managed the Group's debt profile risk.
s.172(1) criteria considerations	a. The likely consequence of any decision in the long term b. The interests of our people c. The need to foster our business relationships with suppliers, customers and others d. The impact of our operations on the community and the environment e. The desire to maintain a reputation for high standards of business conduct f. The need to act fairly as between members and stakeholders
Decision Making Process	• The Board recognised the importance of this decision for the long-term success of the Group and the resulting impact on its people, suppliers, customers, regulators and communities at large. The decision was supported by approvals both from the Related Party Committee and the Finance and Pension Committee. • The Board commissioned valuations and expert advice to ensure that any decision made was founded on accurate and up-to- date information. • The preferred route was to de-leverage the business by selling some assets, and after careful deliberation it was decided that the EU Poultry division would be divested. • As the buyer for the EU division was a related party, all decisions relating to the divestment were made by meetings of disinterested Directors and due process was followed in respect of our obligations to listed bondholders and the Pension Trustees • The Board approved the sale of the EU division and exchange occurred on 30 August 2024 with the sale completing on the 13 October 2024 following approval by the Polish Anti-Trust Authorities. • Following completion of the disposal, refinancing of the Bonds took place on 7 November 2024.

SALE OF 50% SHARE IN HOOKS 2 SISTERS JOINT VENTURE	
Decision	One of the other key decisions of the Board in the past year was to dispose of 2 Sisters Food Group Limited's 50% stake in Hook 2 Sisters Limited, to 2 Agriculture Holdings Limited (a related company).
s.172(1) criteria considerations	a. The likely consequence of any decision in the long term b. The interests of our people c. The need to foster our business relationships with suppliers, customers and others d. The impact of our operations on the community and the environment e. The desire to maintain a reputation for high standards of business conduct f. The need to act fairly between members and stakeholders
Decision Making Process	• The Board recognised the importance of this decision for the long-term success of the Group, in particular the poultry division and the security of supply of birds, as well as the resulting impact on its people, suppliers, customers, regulators and communities at large. • The Related Party Committee approved the transaction. • The Board made the decision to sell the 50% share to 2 Agriculture Holdings Limited, alongside the broader acquisition by 2 Agriculture Holdings Limited of the other 50% share from PD Hook (Group) Limited and other agricultural assets. The resultant transaction resulted in 2 Agriculture Holdings Limited having 100% ownership, and the ability to invest appropriately into the business to support better outcome measures around quality and security of supply for the Group. • The Board commissioned valuations and expert advice to ensure that any decision made was founded on accurate and up-to- date information. • As the buyer for the joint venture share was a related party, all decisions relating to the divestment were made by meetings of disinterested Directors and due process was followed in respect of our obligations to listed Bondholders and the Pension Trustees • The Board approved the sale on 12 June 2025, with exchange occurring on 14 June 2025 and completion taking place just after the year end on 31 July 2025.

STRATEGIC REPORT
Our Stakeholders (Section 172 Statement) (continued)

The Group's non-financial information and sustainability information statement are included on pages 31 to 48 and incorporated into the strategic report by cross reference.

Approved by the Board of Directors and signed by a director on its behalf.

P A Friston
Director
22 October 2025

BOPARAN HOLDINGS LIMITED

GOVERNANCE REPORT

For the year ended 26 July 2025, under The Companies (Miscellaneous Reporting) Regulations 2018, the Company has applied the Wates Corporate Governance Principles for Large Private Companies.

Company purpose and values

The Group has a clear purpose, to contribute to a better world by feeding people sustainably produced, great tasting, healthy chicken and meal solutions, now and in the future. This is aligned to the strategy to deliver longer term sustainable growth.

The Group understands that the delivery of the strategy is only possible through its people. We employ around 15,000 colleagues from over 40 nationalities, working at factories and office locations in England, Scotland and Wales.
The Group's values, Accountability, Discipline, Agility, Respect and Transparency (ADART) have now been in place for 5 years and are well embedded in the Group's culture.

An effective Board develops and promotes the purpose of a company, and ensures that its values, strategy and culture align with that purpose. In this respect: -

- Shareholders are represented on the Board to ensure an understanding of their views.
- We have identified the main stakeholders for Group as being colleagues, customers, suppliers, bond holders, pension trustees and regulators such as the Food Standards Agency and the Pension Regulator.
- We regularly engage with all stakeholders, with regular updates to colleagues at all levels; business reviews with customers and key suppliers; quarterly updates to bond holders; regular meetings with pension trustees; updates on material events to the Pensions Regulator.
- Our ADART behaviours are a key component of how we assess an individual's annual performance. Being a role model of these behaviours is as equally important as the outcomes.
- We have an established whistleblowing procedure in place, with the results reported to the Audit and Reputation committees, thereby covering both financial and non-financial governance.

Board composition

As at 26 July 2025 the Board comprises the Non-executive Chairman, President, representatives of the ultimate shareholders, Chief Financial Officer and two independent non-executive directors.

The Board provides practical leadership to the Group and has an appropriate balance of executive and non-executive directors and of skills, knowledge, and experience appropriate to meet the strategic needs and challenges of the organisation and to enable effective decision making.
The Independent Non-Executive Directors of the Board are wholly independent in that they have no material business or relationships with the Company that might influence their independence or judgement.

The main Board meets a minimum of eight times per year and leads the strategic direction of the Group, monitors operational performance, and ensures appropriate internal controls are in place. Through the ongoing review of suitably detailed management information the Board ensures that risks are appropriately monitored and managed.
In addition, certain governance responsibilities are delegated to Board sub committees as follows:

- Financing & Pensions committee, chaired by the Chairman, Richard Pennycook and on which the two non-executive directors also sit, and meets as required. This committee was wound up after completing the refinance.
- Audit committee, chaired by Non-Executive Director, Ian Ellis and meets at least once per quarter.
- Remuneration committee, chaired by Non-Executive Director, David Gregory and meets as required.
- Reputation committee, chaired by Non-Executive Director, David Gregory and meets at least once a quarter.
- Nomination committee, chaired by the Chairman, Richard Pennycook and meets as required.
- Related Party committee, chaired by the Chairman, Richard Pennycook and on which the two non-executive directors also sit, and meets as required.

Directors' responsibilities

The Board and individual Directors have a clear understanding of their accountability and responsibilities. The Board's policies and procedures support effective decision-making and independent challenge.

The Group looks to provide a strong governance framework to allow its Board and committees to make clear and considered decisions based on a full understanding of their accountability and responsibilities. The structure and organisation of the business is clearly defined and documented, and the Board has access to reports ahead of Board meetings to give opportunity to review and then challenge.

The Board and committees receive regular and timely information to support their work, including reports on financial performance, commercial and market analysis, people and culture, health and safety, procurement, technical delivery, sustainability, and risk status.

Integrity of information is critical in allowing the Directors to exercise their duties and responsibilities. Key financial information is collated from the Group's accounting systems. The Group's finance function has appropriately qualified colleagues in each business to ensure the integrity of this information.

Financial controls are reviewed as part of an internal audit programme. Their work schedule is set each year in agreement with, and findings reported to the Audit Committee.

Opportunity and risk

The Board looks to promote the long-term sustainable success of the company by identifying opportunities to create and preserve value and establishing oversight for the identification and mitigation of risks.
The Group seeks to deliver profitable growth opportunities that will benefit all its stakeholders whilst mitigating risks that may arise and is focussed on creating long term value.

Opportunity
The main Board develops, documents and communicates the business strategy. This optimises opportunities identified for the Group to develop and improve its products and services for its customers, as well as its performance and operations. Please see the Strategic Report for further information.

Risk
The Group continues to strengthen its risk management framework to mitigate the risks faced by the business, with internal controls reviewed by the Group's Internal Audit function and reported to the Reputation commitee. The Group's key operational risks are described in the Strategic Report, with risk reviews undertaken and reviewed by the Audit Committee.
Performance of each business is reviewed by the Executive Management Team at monthly business performance review ("BPR"); alongside KPIs for each business, and sustainability metrics.

Responsibilities
The Group has a documented "Board book" and a "Delegated Authority Matrix" to provide a framework of rules, processes, and delegated authorities. Responsibility for day-to day financial and operational control rests with the divisional management. However, certain decisions are reserved to the main Board or a relevant sub-committee. This ensures that all expenditure, investments, and commitments are subject to appropriate review and approval by the business.

Remuneration

The Board looks to promote executive remuneration structures aligned to the long-term sustainable success of the company, considering pay and conditions elsewhere in the Group and the wider industry. The Remuneration Committee has the responsibility for managing Executive and Senior Management remuneration.

The Remuneration Committee's primary objectives are to set the policy and strategy for the remuneration and development of key members of the central and divisional management teams. This is intended to ensure that we have the best people in our business. The remuneration policy shall cover:

- base salary;
- performance related remuneration to align the interest of the Directors and the Shareholders and reward their individual contributions to the success of the company;
- benefits in kind; and
- pensions.

The Remuneration Committee also approves the design of, and determines the targets for, any performance related incentive schemes and approves the calculation and payment of all awards.

The Group is an active equal opportunities employer and promotes an environment free from discrimination, harassment and victimisation, where everyone receives equal treatment and career development regardless of age, gender, nationality, ethnic origin, religion, marital status, sexual orientation or disability. All decisions relating to employment practices (including remuneration) are objective, free from bias and based solely upon work criteria and individual merit.

Stakeholders

The Directors foster effective stakeholder relationships aligned to the company's purpose. The Board is responsible for overseeing meaningful engagement with stakeholders, including the workforce, and having regard to their views when taking decisions.

For details of how we engage with our stakeholders please see the section 172 statement starting on page 22 that forms part of this report by cross reference.

Our Sustainability Strategy

Since last year's report, we have announced an evolution of our sustainability strategy. We built great foundations with our Better for All plan and have always talked about the importance of doing the right thing. I am immensely proud to say we will go further and aim higher with our new company strategy NextGen: transforming the food system for the next generations. By taking sustainability to the heart of our ambitions, NextGen uses our scale, our ability to disrupt, and our passion for food to make a genuine difference for people, product and planet over the next ten years.

Now more than ever the food industry faces multiple large-scale challenges that are growing in complexity; population growth, carbon emissions and climate, lack of availability for nutritious food driving health and social inequity, pressures on animal welfare as demand grows alongside costs. The food system isn't working, and things have to change.

As business leaders we need to accelerate progress, think long-term, and use the expertise and scale of our industry to safeguard food production for the next generations. Ask ourselves what we can do now to solve these global problems, rather than adding to them, and waiting for someone else to take responsibility.

I am, as always, incredibly proud of what our business and our colleagues have accomplished this year, we have donated millions of meal servings to those in need, continue to lead the industry with the expansion of higher chicken welfare standards further across our estate, and have agreed science-based-targets for emissions which give us clear areas for action. However, we are ready to take this to the next level.

The ambitious targets set for the next ten years demonstrate our determination to accelerate change and drive the transformation needed, both through our own activities and through partnerships and collaboration with our value chains and wider industry. I maintain there is no better industry than ours to step up to this challenge, and by doing the right thing we will take responsibility for creating a fairer food system for the future.

Ranjit Singh Boparan, Owner and President

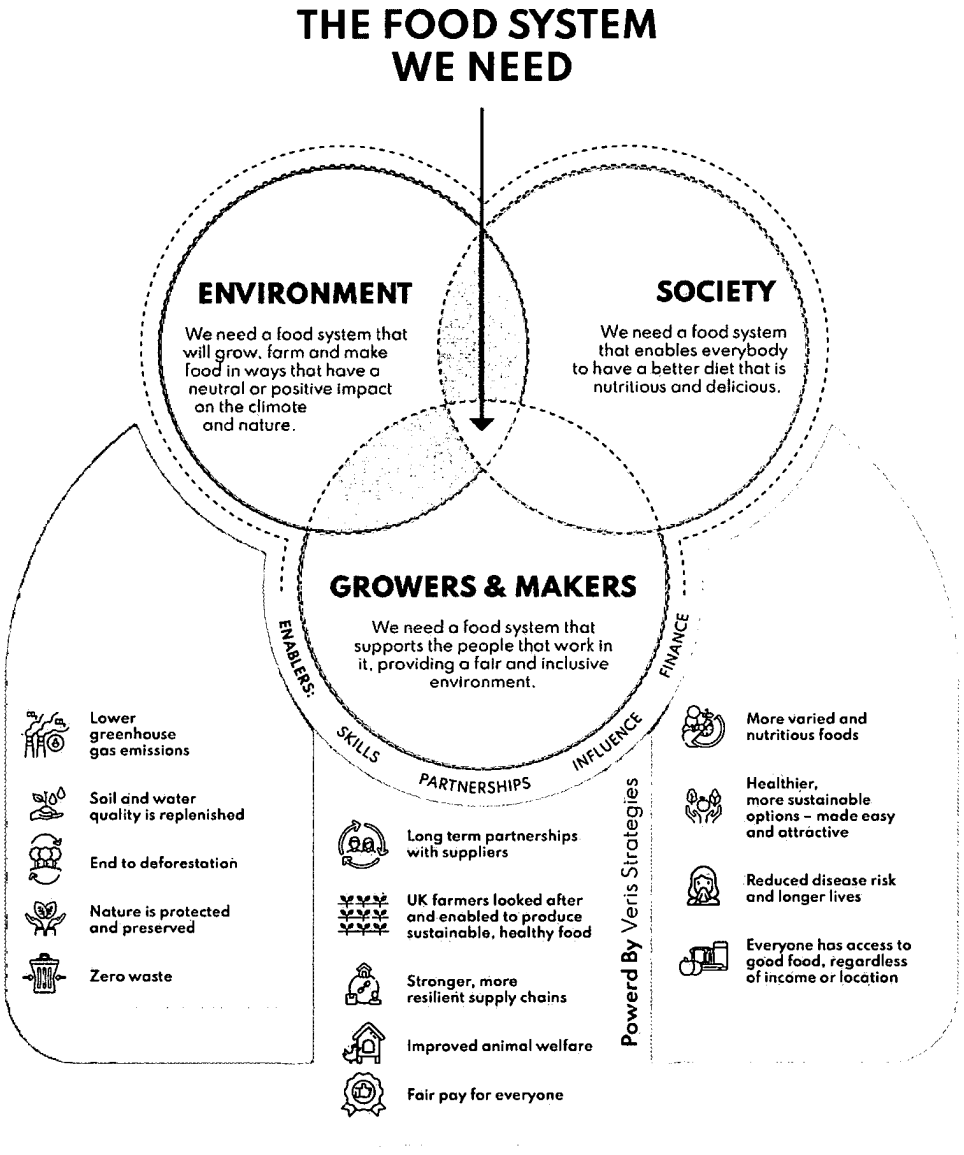

Our sustainability strategy (continued)

DOING THE RIGHT THING TO TRANSFORM THE FOOD SYSTEM FOR THE NEXT GENERATION

Launched in October 2024, Doing the Right Thing to Transform the Food System for the Next Generation reaches into every element of our business, and builds upon the groundwork set out by Better for All. With this evolution of our sustainability strategy as part of our NextGen plan, we are able to unite our broad range of industry-leading climate activities and transformation work, to deliver on our ambitions by 2035.

WHAT DO WE MEAN BY FOOD SYSTEM?

The food system is a complex web of activities involving the production, processing, transport and consumption of food. Issues concerning the food system include the governance and economics of food production, its sustainability, the degree to which we waste food, how food production affects the natural environment and the impact of food on individual and population health.

Our sustainability strategy (continued)

FOR CLIMATE

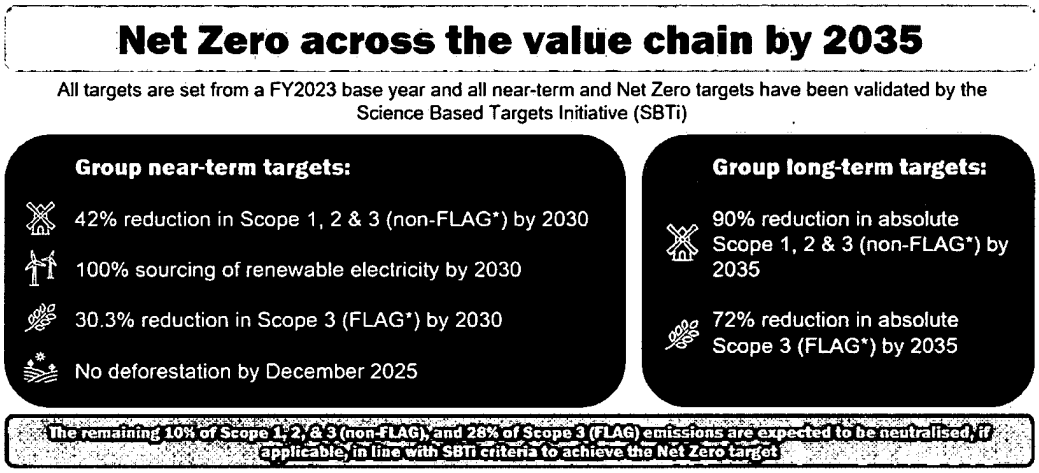

We're committed to being Net Zero by 2035, an ambitious and market leading target.

Accelerating our own change creates a catalyst for good across the industry, so we're commencing annual reviews of long-term strategic plans which support investment in new technologies to achieve our Net Zero ambition.

ROADMAP TO NET ZERO

In December 2024, the Science Based Targets initiative (SBTi) have approved the Group's, near-term and net-zero science-based emissions reduction. Direct emissions reductions (decarbonisation) will be prioritised, and all residual emissions will be neutralised (if applicable) in line with SBTi criteria before reaching net-zero.

We are delighted to share our SBTi validated targets:

N. B. Net Zero target covers all Scope 3 categories, including those not included in 2023 baseline, (e.g. downstream categories) for which reduction will also need to be demonstrated

We have invested in an internally built environmental database which gives us full sight of our energy sources and GHG emissions at a site, division and Group level. This is enabling sites, for the first time, to understand directly the impact of different emissions sources on the overall site Scope 1 and 2 carbon performance.

At our processing sites, our net zero ambition will be achieved through measures which include improving energy efficiency, replacement of aged systems and infrastructure, and implementation of lower carbon energy sources.

We have engaged with climate specialists in the year to begin creating and implementing our Net Zero Transition plan that addresses Scope 1, 2 and 3 emissions. Our carbon data platform has been used to inform the design of new ready meals with a lower carbon footprint, by allowing us to dig deeper into specific product level emissions. The Sustell platform has been used to calculate the most recent years poultry emissions to farm gate, giving us greater visibility of farm emissions.

OUR WORK WITH PARTNERS

During the year we partnered with EY to create a climate transition action plan, helping us visualise the journey to our 2035 target. The aim of this project was to; assess achievability of the target considering feasible emissions reduction measures, highlight key gaps in available emissions reduction technologies and key operational systems and business structures needed to manage emissions, and lastly informs a roadmap of prioritised next steps and strategic decisions for implementation and operationalisation of emissions reduction measures.

From this critical piece of work in year, we now have a climate transition plan, a 10 Year Plan, a working decarbonisation template to set and monitor actions and key observations and recommendations on how we can achieve our targets. Our goal in FY26 is now to work with our sites and divisions to embed this transition plan into all decisions.

We're making our biggest ever investment in the future of food, more than £1bn over the next ten years, developing next generation factories and farms to provide sustainable, nutritious, affordable, quality food that is accessible for all and kinder to the planet.

Our sustainability strategy (continued)

Investing in new technology and automation makes us more efficient and helps reduce our impacts, while driving growth for the Group and our customers. We never forget that it's the people behind the product who make the biggest difference, so we invest in them too - from training and equipment to benefits and community programmes, our people get the best, because they are the best.

NEXTGEN ENABLER: DIGITAL TRANSFORMATION

We're investing in digital, technology and data to transform the way we do things in our factories and in our partner farms.

We may use traditional recipes and ingredients that have survived the test of time to make delicious food with care, however by investing in the future of food means using the very latest technology to make work easier for our colleagues, better for the planet and to achieve consistent quality for our customers.

OUR WORK WITH THIRD-PARTY CARBON SPECIALISTS

As a BRC supplier we are invited to provide product specific details for retailer's scope 3 calculations via a third-party providers platform. As this is done on a customer request basis, it did not cover our whole product range due to own labels, B2B sales, and non BRC customers.

Therefore, we decided that to give a more complete picture of our product related emissions we engaged with the third-party supplier to build the Group our own 'Customer' environment. This has enabled us to see the emission intensity of all our products and absolute emissions based on up-to-date production volumes. In FY26 we will be working to strengthen the quality of our data and improve on specific product emissions.

FOR HEALTH

We are a food business that understands the importance of sustainable diets and good protein, we are committed to helping to improve the UK's nutrition.

DONATIONS

We have already begun the donations of 50 million healthy and nutritious servings by 2035. In FY25, we redistributed the equivalent of over 3.2 million meals, an 8% increase from FY24. Alongside this, our fundraising for Boparan Charitable Trust continues towards our £20million target, with £1.5 million raised in 2025.

MINIMISING FOOD WASTE

We continue to reduce the amount of food going to waste in our operations. A key part of this is ensuring surplus food reaches people who need it and is not wasted. We have been working to improve the redistribution of surplus food from our UK sites, both through our company shops, food donations and through our food redistribution partners such as FareShare.

HEALTHIER CHOICES

We are committed to providing healthier choices for consumers and to supporting a range of dietary preferences and needs. Our primary poultry products provide an important low-fat source of high-quality protein, with the added benefit that they have a lower environmental impact compared to other animal proteins. We ensure nutritional information is available for Meal Solutions products across the whole of our portfolio.

SUSTAINABLE DIETS

Food is linked to climate and wellbeing, and the right diet can bring great benefits to people and the planet. Sustainable diets have a lower environmental impact, help contribute to food security, and support healthy lives for people now and in the future. Protein is a key component of a balanced diet, and this gives us a great opportunity to improve healthy choices for our customers while meeting the highest standards of food safety. Our poultry products are an important source of higher quality protein and have a lower environmental impact than other animal proteins. Working collaboratively with our suppliers to meet these standards will help build solid, long-term relationships, with third party certification adding credibility to our brand.

NEXTGEN ENABLER: BRILLIANT BASICS

Innovation is at the heart of our business, yet we never forget that every shift starts with brilliant basics. Every colleague, every site, every single day. It's how we make everything run smoothly and deliver outstanding results for our customers.

FOOD SAFETY AND QUALITY

Through robust auditing to a GFSI (Global Food Safety Initiative) standard and stringent internal governance, we are targeting 100% of our sites to reach A* or AA* (* denotes audits are unannounced) ratings in the BRC Global Standard (BRCGS) for Food Safety. In FY25, 100% of our sites that had an audit met this target, with only 2 sites waiting for their audit later in the year. Both sites outstanding achieved the target at their previous audit. Our food safety and quality ambition is underpinned by our thorough approach to food safety training. We provide an extensive, year-round programme at all levels using internal trainers and external specialists.

DATA INFORMED

We are committed to responsible business and investing in sustainability and know that data plays a critical role in helping us make greater impacts, faster. Through industry accreditations in animal welfare, comprehensive auditing in food safety and quality, Science Based Targets, CFD reporting and alignment with best practice standards, we can continually measure and monitor our progress and understand where best to drive action. This data-led approach also helps ensure we are performing well in employee-centric areas such as health and safety, and diversity and inclusion, making the Group a fantastic place to work.

Through our Better for All strategy we learnt a lot about the importance of data quality and working cross-functionally, with the evolution to NextGen we continue building on the tremendous expertise of colleagues across the business to better understand sustainability and colleague engagement. Wider industry partnerships have also been extremely valuable, and we are committed to learning collaboratively and working with other businesses and organisations whose ambitions for a better future align with our own.

FOR NATURE

Food system impacts on nature include the destruction of many precious habitats such as wetlands and grasslands, while the disruption of natural water cycles is leading to water stress in the form of increased drought and flooding. We are determined to change this narrative and contribute to a nature positive planet.

PROTECTING NATURE RESOURCES

We recognise the urgent need to protect natural resources such as water. Water shortages are a huge risk to the food industry, and the Rivers Trust has identified multiple areas in the UK subject to water stress. As we operate multiple processing and manufacturing sites across the country – and rely on many UK farms to supply poultry – it is critical we have a complete picture of our activities in relation to water stressed areas. We created a comprehensive map that illustrates these links, enabling us to identify hotspots in the West and East Anglia, where we are now taking direct action with water management activities.

We continue to work with external bodies such as WRAP and the Rivers Trust to better understand the impact our manufacturing sites and supply chain can have on the quality and availability of water within the UK and further afield. Our involvement with the Norfolk and CamEO Water Stewardship Group and Wye Agri Food Partnership Roundtable ensure we are at the leading edge of understanding and knowledge transfer on watercourse contamination and the application of best practice standards. All farms are measured against the leading water sustainability metrics.

During the year, we met our absolute water reduction target, following several site led water initiatives over the last couple of years. In FY26 we will work with sites to look for further ways to reduce usage and increase efficiency until we use only what is needed.

SOURCING

Producing food can contribute to climate change through deforestation, biodiversity loss and the disruption of natural water cycles, which can lead to drought and flooding. Food packaging also uses valuable natural resources and can harm wildlife and ecosystems when not properly managed. Meanwhile, people working in supply chains can be at risk of human rights issues such as labour abuses, health risks and discrimination. As a food business, we have an important responsibility to minimise our impacts in these areas and ensure our products and ingredients are sourced with integrity and best practice.

HUMAN RIGHTS IN THE SUPPLY CHAIN

Last year we completed our first Human Rights Impact Assessment on our poultry supply chain, taking into account everything from the feed mills, hatcheries & farms through to the manufacturing sites. The actions from this assessment are now being prioritised for delivery.
We continue to assess all our suppliers for compliance against our ethical sourcing policies with well over a thousand supplying sites routinely monitored using SEDEX (Supplier Ethical Data Exchange) ethical risk assessment.

SOY

Since 2015, our UK operations have sourced deforestation-free soy meal at additional premiums to ensure Brazilian and Paraguayan farmers are directly rewarded for sustainable practices. We currently only purchase soymeal that is either Deforestation Free or Deforestation and Conversion Free, all basis Mass Balance.
Our current standard of soy is also compliant with the UK Retail Soy Group's "Proposed aligned approach for 2026 soy sourcing".

SUSTAINABLE PACKAGING

We launched our sustainable packaging strategy in 2018 with the aim of ensuring 90% of all plastic packaging in our branded products would be recyclable. So far, we have achieved 90% of plastic packaging as recyclable across our UK Poultry and Meals Divisions. We are also working to increase the percentage of recycled content that we use, aiming for plastic trays to contain a minimum 30% recycled plastic by the end of 2025.

We removed 907 tonnes of plastic from our UK Poultry products during the year and have removed a total of 3,508 tonnes of plastic from our products since 2018. We continue to work closely with our packaging suppliers on innovations to reduce plastic packaging and increase recycled material content.

FOR ANIMAL WELFARE

By investing in new partner farms and better farming practices, our plan will see 100% of our chicken raised to higher welfare standards by 2027. Through our business and partnerships with suppliers and customers we are helping to drive up animal welfare standards, from farm to fork, we want to lead the way in our industry.

AGRICULTURE

A nature-positive approach to farming (also known as regenerative or sustainable agriculture) focuses on regenerating and restoring the environment with a focus on soil health, which supports carbon sequestration and biodiversity. It therefore addresses the challenges of supporting agricultural production and resilience, whilst mitigating climate change and enhancing nature.

Animal welfare also shines a light on our behaviour as an ethical business. As a visible and emotive subject for many of our stakeholders, we must push for the best standards and take a lead in this area.

ANIMAL WELFARE

We are committed to improving animal welfare KPIs and minimising the use of antibiotics. At the heart of our objective is a focus on creating more space for our chickens. In 2024, we committed that by 2027, we want 100% of our UK partner farms to provide a stocking density of 30kg per square metre or less. As of 2025 we can now report that already 89% of our partner farms match this commitment with 80% of our sales now meeting the higher welfare standard. We have also invested in artificial intelligence (AI) technology that provides round the clock flock management and monitoring. Following a successful pilot at two farms, the technology has now been rolled out to a further six farms. This technology has been embraced by our farmers helping them and us to monitor our farming standards.

NATURE POSITIVE FARMS

This year we have been collecting data and building on our biodiversity asset maps of our partner farms to further understand our footprint and identify opportunities. We have piloted a process that determines the natural capital value, soil quality and biodiversity level according to the UK Habitat Classification system (UKHab). This system is a unified and comprehensive approach to classifying habitats.

CASE STUDY: SENUS NATURAL CAPITAL AND BIODIVERSITY PROJECT.

The Group and ag-tech company Senus, formerly known as FarmEye, partnered at the beginning of 2025 to establish a natural capital and biodiversity programme to assist mapping our farming estate. As part of the project, we have worked with multiple farmers to gain an understanding of their natural capital values and environmental potential.

The project was originally piloted across two farms, A Core Red Tractor, and a free-range system but following great success, the programme has now been expanded to cover another seven sites including all welfare tiers supplied to the Group.

Initially each site was located and digitalised through satellite mapping technology. This allowed for quantification of land use and habitat value by area. This was then associated to the UK Habitat Classification System (UKHab) to create a unique habitat value for each farm. Further progress through the project lead to the farms partaking in on-site soil sampling and water quality surveys. The sampling included use of GPS-tracking and QR identification technology to ensure traceability and consistency across the sites.

Through laboratory analysis of the samples taken, plus interpretation of the natural capital results accessed on the online dashboard, we have now been able to equip these farms with accurate and high-quality data-driven insights into the values and footprints of their farms on their surrounding environment. This has been a great pilot with, growers, scientists, technology, soils and water all coming together to deliver science and data led insights.

FOR ALL

We are excited to use our expertise and resources to help deliver the radical collaborations and disruptive innovations that the next decade demands. Our teams are integral to our ambitions, to achieve our goals it is critical that people are supported, developed and rewarded, reaching their full potential and choosing to have long and successful careers with us. We want to be seen as an employer of choice and a positive place to work.

OUR PEOPLE

We know that people do their best when they feel safe, supported and included. Our strong health and safety strategy is underpinned by a culture of wellbeing where mental, physical, social and financial health is treated with dignity, fairness, equality and respect. We are also keenly aware of the impact we have on those within the communities where we operate and want to be seen as a force for good in our local neighbourhoods.

EMPLOYEE RECRUITMENT, RETENTION AND ENGAGEMENT

Our comprehensive people programme covers all aspects of employee management, from workforce planning, engagement and performance, through to development and wellbeing. We are committed to attracting the best talent to the food industry, and our Finance, Engineering and Technical graduate schemes provide development, growth, support and progression in an environment that helps new entrants to the world of work flourish. Most graduates go on to secure permanent roles within the business.

Our popular app, 2SFG Hub was launched in September 2022 as the main channel of employee engagement. It is available in 31 languages (representing the languages of 94% of UK employees), with 15,000 visits per week and an impressive engagement rate of 91% per post.

SUSTAINABILITY REPORT
Our sustainability strategy (continued)

HEALTH, SAFETY AND WELLBEING

We take the health, safety and wellbeing of our colleagues very seriously, and we're proud to have won awards from the Royal Society for the Prevention of Accidents (RoSPA) for our high health and safety standards. We underwent a successful recertification program for the ISO 45001 standard this year at which no non-conformances were raised.
This year, the Accident Frequency Rate (AFR) across our UK sites increased from 1.5 to 1.65, with the RIDDOR (Reporting of Injuries, Diseases and Dangerous Occurrences Regulations) at 0.17, which has remained the same as last year. The increase during the year was due to an increase in accident numbers across a handful of sites. These are one-off incidents rather than a systemic issue. A proactive approach to enhance our safety protocols and training initiatives have now been implemented to mitigate future risks.

This year we trained, or refresh trained 58 Mental Health First Aiders, increasing our total to 178 across our UK sites. A further 74 colleagues participated in a range of group sponsored H&S development training including Accident Investigation Training, NEBOSH General Certificate, Legionella Duty Holder, Principles of CDM and DSEAR awareness.

April 2025 saw the launch of our 12 month "360 Degrees of Safety Campaign" which promotes discussion and activity on 12 different Hazard topics across our sites.

INCLUSIVE WORKFORCE

We are committed to building a thriving, diverse culture where everyone feels comfortable talking about the things that matter to them. Our FREDI (fairness, respect, equality, diversity, inclusion) programme to further foster a positive working environment, as well as BUILD (boost, unify, inspire, lead, develop) and LEAD (learn, engage, apply, demonstrate) development programmes for supervisors and front-line managers continue to deliver change across our UK Poultry sites. Our Meals business First Time Manager programme and easy access to online learning modules help colleagues gain an understanding of diversity and equality.

PARTNERING WITH OUR COMMUNITIES

We will be a good neighbour in our communities and will add value and provide leadership as an active supporter of the wider food industry. From donating millions of meals to families in need to charity car washes, we are active in our local communities, taking the lead on a wide variety of initiatives to help our neighbourhoods thrive.

In FY26

Embed our NextGen strategy into everything we do. Strengthening and developing the key areas including:

- Continue to develop the roadmap towards our 2035 net zero target, focusing on Scope 3 emissions and defining the capex investment required
- Continue to increase our higher welfare poultry offering
- Go further to address food poverty and ensure surplus food reaches those in need
- Developing our supply chain into best in class
- Invest in the future of food
- Doing the right thing, in all areas of our business

Climate-Related Financial Disclosures (CFD)

We continue to recognise that climate change remains one of the most pressing challenges facing society. The collective response over this decade will shape the extent and severity of its impacts. That's why we remain committed to working collaboratively to drive meaningful change. We view this not only as a responsibility but also as an opportunity, and we are determined to play our part.

Our NextGen strategy streamlines the ambitions that help address the global challenge we all face and how we can better prepare our business to adapt to the impacts of climate change.

In our third year of making CFD disclosures, we have maintained our focus on managing climate-related risks. In our previous annual report, we identified key areas for further focus, and our progress against those priorities is outlined below.

FY24 actions	Update
Strengthen our ESG governance	During the year we have enhanced the Group's governance over ESG by establishing a dedicated Transformation Team comprising senior directors across a number of functional areas (Food Systems and Sustainability, IT, Finance, Logistics and Footprint). Next year, we will enhance this further by reporting into a newly created Carbon committee which will report directly into our Executive team. Monthly Steering Committee meetings are also in place to ensure ESG topics remain a strategic priority, fostering accountability and informed decision-making.
Continue to monitor and develop the Group's understanding of climate related risks and opportunities, and the resilience of the Group's business model under different climate related scenarios	During the year we introduced the Reputation Committee, which is led by the Group Quality, Sustainability & Agriculture Director and chaired by NED, David Gregory. This committee is responsible for reviewing the Group's risk register, inclusive of climate related risks. Following our work with climate-related specialists, we have continued to use the process and structure agreed to review our risks and opportunities. Our quantitative modelling needs more time to develop as we consider the broader impacts across the end-to-end supply chain given the recent purchase of Hooks 2 Sisters by the Boparan Private Office, a related party.
Improve our data collection processes and internal controls over the accuracy of the data	This year, our divisional and site finance teams have played a larger role in the collection and verification of environmental data. We have seen an improvement in the timeliness and engagement at all levels of the business on the importance of having accurate, timely, and verified data which has increased our confidence in what we can report and act on. Like most companies, we still have room for improvement, and we will continue to take steps forward in this area.
Identify and validate Scope 3 emissions	In December 2024, we had our Science Based Targets (SBTi) approved and validated. Our near-term targets have been agreed, and net-zero science-based emissions reduction target are set for 2035. Direct emissions reductions (decarbonisation) will be prioritised, and all residual emissions will be neutralised, if applicable, in line with SBTi criteria before reaching net-zero emissions. Our next focus is on implementing our Net Zero Transition plan, which we have already engaged with external specialists to help develop.

Over the past year, we have made steps to strengthen our climate-related disclosures and deepen our understanding of climate risks and opportunities. The steps we have made at the leadership level are helping to set the tone for the whole business and provide a pathway for continuous improvement. While areas to improve remain, we've made meaningful progress in improving data quality and expanding our Net Zero ambition.

We remain committed to embedding climate risk and opportunity management across our operations and measuring our progress effectively. As our approach matures, we expect our disclosures to evolve, reflecting both improved insights and analysis.

Climate-Related Financial Disclosures continued

1. GOVERNANCE

Disclose the organisation's governance around climate-related risks and opportunities.

Describe the Group's governance arrangements in relation to assessing and managing climate-related risks and opportunities.	Our governance framework allows the Board to integrate climate related risks and opportunities into our strategy and decision-making process. The board is assisted in its oversight of ESG Matters and progress against the Group's sustainability strategy through a number of committees as listed below • Quarterly Reputation committee, chaired by NED, David Gregory and led by the Group Quality, Sustainability & Agriculture Director and meets six times a year. Within these meetings the climate-related risks and opportunities are reviewed as required and the potential business impact is considered. • Monthly transformation steer committee, chaired by the President and led by the Transformation Director. Attendees also include the Group CFO, Head of IT, as well as broader business representatives. The committee monitors the day-to-day management of ESG matters, including the development and delivery of the sustainability strategy, performance against targets, as well as other Social and Governance related matters. • Direct updates to the Board as required. During FY26 we will use the steering committee to further strengthen our governance of the ESG programme, including establishing a dedicated Carbon committee, involvement of other function experts and further engagement with the business.

2. RISK MANAGEMENT

Disclose how the organization identifies, assesses, and manages climate-related risks.

Describe the Group's processes for identifying and assessing climate-related risks	The identification of climate-related risks incorporated both a top-down approach to identify the Group's principal risks and a bottom-up approach to identify specific operational risks. Risks and opportunities were identified by Divisions and accumulated up at a Group level. Our assessment covered all geographies in which the Group operates, and we noted similar risk profiles across these geographies. A broad set of sources were used to identify and understand potential climate-related risks and opportunities: • Professional bodies and membership organisations such as the Institute for Sustainability and Environmental professionals (ISEP). • Climate change publications and data. • Emerging industry and academic reports. • CFD guidance on potential risks and opportunities. • Key external groups such as suppliers, and specialist consultants. Following our foundational analysis of climate-related risks and opportunities with external specialists in the prior year, we have spent the year expanding our understanding and the impacts on how they affect our business. We have continued with the methodology and scoring of risks and opportunities (outlined below), and our sustainability team has reviewed these periodically through the year for any material changes. An overall risk score is given to each risk by considering the vulnerability to the risk, magnitude of impact and likelihood of occurrence. Each risk was assessed across short, medium and long-term time frames and three climate scenarios as described on page 41. The maximum risk score for each time frame and climate scenario was 100, these were then added together to give an overall risk score with a range from 1 to 900, with the higher the score the higher the risk. Opportunities were scored according to size and ability to execute across each timeframe and scenario. Our tables of the top risks and opportunities, along with their indicative score can be seen on pages 41 and 42. We will continue to formally update the risk assessment on an annual basis but remain vigilant to any emerging/evolving risks through our dedicated sustainability team.
Describe how processes for identifying, assessing, and managing climate-related risks are integrated into the *Group's overall* risk management	Our sites consider climate-related risks and opportunities continuously throughout the year, through climate-related risk self-assessments and communication with the Group's Sustainability team. The outcome feeds into the wider internal control and risk management process and any significant climate related risks are captured for review and discussion at the various levels of management and the Board. The Group has identified the overall impact of climate change as a principal risk. This risk considers physical risks caused by climate change and transition risks associated with the shift to a Net Zero business. The most significant areas of risk relate to the potential impacts from extreme weather events causing disruption to manufacturing and logistics operations, raw material availability, evolving technology and legislation and consumer demand leading to adjustment in product portfolio.

Climate-Related Financial Disclosures continued

3. STRATEGY

Disclose the actual and potential impacts of climate-related risks and opportunities on the Group's businesses, strategy, and financial planning where such information is material.

Describe the principal climate-related risks and opportunities the Group has identified and the timeframe over which they apply

Risks:

The impacts of climate change will vary over time and will depend on the success of actions we collectively take to limit climate change in future years. We therefore use three-time horizons to help understand the likely time when risks will impact our business and how they may change over time.

- Short term - up to five years. This aligns to our short-term business planning and financing cycle.
- Medium term – 5 to 15 years. This is beyond the immediate business planning cycle but identifies the upcoming risks and opportunities the business needs to be aware of for next phase of planning and for major capital projects.
- Long term – beyond 15 years. This highlights the risks and opportunities the business will track and use to support longer term strategic decision making.

Three climate scenarios were also considered. These include scenarios where global temperature increase is 1.5°C to 2.0°C ("orderly transition"), 2.5°C to 3.5°C ("disorderly transition") and 3.0°C to 5.0°C ("hot house world").

During the year, there have been limited changes to our climate-related risks and opportunities. The most significant changes are to our transitional risks where we see external factors around regulation and legislation, increased internal and external reporting requirements, and anticipated increase in demand for carbon credits.. We expect this to continue to increase and we will continue to review internally.

The top physical risks identified, along with their risk rating are as follows:

ID	Short Description	Impact	Indicative Risk Score
PR5	Reduced availability and quality of critical raw materials like potatoes, raisins, and sultanas due to climate events such as droughts and forest fires.	This can increase raw material costs and affect product quality, leading to higher production costs and potential revenue loss.	378
PR1	Operational disruptions due to extreme heat affecting worker productivity, animal health, and machinery functionality (such as refrigeration units)	This can lead to increased operational costs due to reduced productivity, directly impacting revenue and profit margins.	295
PR10	Supply chain disruptions due to loss of critical inputs, leading to operational interruptions.	Supply chain disruptions can result in production delays, increased costs, and revenue loss due to unmet customer demand.	282
PR8	Employee health and safety risks accessing sites during extreme weather events, such as flooding of local area, reducing workforce availability and therefore reducing operational productivity.	Reduced workforce availability can lower productivity, leading to increased labour costs and decreased revenue.	274
PR4	Reduced water availability impacting farming operations and processing facilities.	Lower water availability can disrupt production processes, leading to increased operational costs and potential supply shortages, affecting revenue.	235
PR6	Localized flash flooding from intense rainfall disrupting site operations, as seen in events like Coupar Angus.	Flooding can cause operational interruptions, damage infrastructure, and increase maintenance costs, negatively impacting financial performance.	217
PR7	Storm-induced damage to infrastructure, including buildings, vehicles, and power supplies which may negatively impact operations.	This can lead to significant repair and replacement costs, disrupting operations and affecting financial stability	217
PR2	Elevated temperatures increasing animal mortality and welfare issues, including through spread of pathogens and disease vectors.	Higher animal mortality rates can reduce the supply of products, leading to higher production costs and potential revenue loss.	211
PR3	Health and safety risks for employees working in extreme heat conditions, leading to work stoppages.	This can result in a reduction in productivity and increased labour costs (and potential legal liabilities?), reducing overall profitability.	173
PR9	Reliance on soy meal sourced from deforestation risk areas, negatively impacting sustainability and supply chain integrity.	This can increase reputational risks and potentially lead to higher costs for sourcing alternative sustainable materials	90

3. STRATEGY CONTINUED

Describe the principal climate-related risks and opportunities the Group has identified and the timeframe over which they apply (continued)

The top transitional risks identified, along with their risk rating are as follows:

ID	Short Description	Impact	Indicative Risk Score
TR1	Increased costs because of raw material scarcity impacting supply chain continuity due to the transition.	Raw material scarcity can drive up production costs, reducing profit margins and affecting pricing strategies	282
TR7	Market risks leading to potentially lower demand for products due to shifting dietary preferences towards non-meat products influenced by climate consciousness.	Decreased demand for meat products can reduce revenue, necessitating diversification into alternative product lines.	245
TR8	Increased reputational risks from increased consumer demand for transparency on product sourcing and sustainability practices, leading to magnification on product labelling and in turn lower demand for 2SFG products if requirements are not met.	Increased scrutiny can require additional investments in sustainable practices and transparency measures, raising costs	197
TR4	Forced operational changes due to evolving legislation and regulation (e.g. requirements to transport bird below a given temperature threshold which may be more challenging due to rising temperatures, or the introduction of EUDR affecting the supply chain).	Compliance with new regulations can increase operational costs and require additional investments in infrastructure and equipment	196
TR3	Increased CapEx investment in upgrading technologies to lower emissions versions at processing and slaughter sites.	Higher capital expenditures can strain financial resources in the short term, though potentially offering long-term cost savings and compliance benefits	188
TR2	Anticipated carbon pricing and taxation policies increasing operational costs.	Increased taxation and carbon pricing can raise operational expenses, impacting profitability and requiring price adjustments	150
TR6	Regulatory changes imposing financial penalties and taxes.	Compliance with new regulations and associated penalties can increase operational costs and financial liabilities.	100
TR5	Enhanced reporting requirements for ESG matters, including detailed carbon emissions tracking, increasing costs.	Increased reporting requirements can lead to higher administrative costs and necessitate investments in new systems and processes	72

Opportunities:

Our "NextGen' plan is to contribute to a better world by feeding people sustainably produced, great tasting food now and in the future. Our position represents a strong opportunity to become industry leaders in sustainability and benefit from the associated reputational and market benefits.

Our opportunities have been considered using the same timeframes and methodology as our risks.

The top opportunities identified, along with their scoring are as follows:

ID	Short Description	Impact	Indicative Opportunity Score
OP2	Increased resilience to price volatility in commodities through strategic sourcing, hedging strategies, long-term supplier agreements, and collaborating with suppliers to enhance resilience.	Strategic sourcing and hedging can stabilize costs and reduce financial uncertainty, supporting better financial planning and profitability.	56
OP1	Reduced operational costs through enhanced energy efficiency measures, such as upgrading to energy-efficient equipment and optimizing energy usage across facilities.	Improved energy efficiency can lower operational costs, enhancing profit margins and financial sustainability.	48
OP4	Implementation of advanced water recycling and energy management systems to enhance operational sustainability, reduce costs, and comply with environmental regulations.	Sustainable practices can reduce operational costs and mitigate regulatory risks, supporting long-term financial stability.	48
OP7	Integration of renewable energy sources, such as solar or wind, through Power Purchase Agreements (PPAs) to power operations, reducing dependence on fossil fuels and decreasing carbon footprint.	Renewable energy can lower long-term energy costs and reduce exposure to fossil fuel price volatility, enhancing financial predictability and sustainability.	48
OP3	Competitive market positioning with 2SFG's current opportunities in meals, bakery divisions, and low-impact protein offerings, leveraging the established foundation of the meals division.	Diversification into new product lines can open additional revenue streams and improve market positioning, enhancing overall financial performance.	45
OP6	Expanding product lines to include plant-based, gluten-free, and other health-conscious options, tapping into growing consumer health trends and dietary preferences.	Expanding product offerings can capture new market segments, driving revenue growth and enhancing market share.	40
OP5	Rebranding chickens as a low lost and lower carbon protein option amid rising prices of alternative proteins, driving consumer demand.	Maintaining cost-effective protein options can attract price-sensitive consumers, supporting stable revenue streams.	20

3. STRATEGY CONTINUED

Describe the principal climate-related risks and *opportunities* the Group has identified and the timeframe over which they apply (continued)	Continued efforts to increase operational efficiencies, through energy management and optimising energy usage across facilities, will both reduce energy demand and operational costs. This year, we have introduced a working group tasked with moving our sites to automated metering. This will allow more accurate, timely information that will lead to improved monitoring and decision making. As part of our SBTi work, we have committed to increase our active annual sourcing of renewable electricity to 100% by 2030. Other opportunities to invest in sustainability initiatives including, but not limited to, upgrading to more energy efficient equipment, installing solar panels, and self-generating electricity. Refrigeration systems and heat recovery projects have been prioritised due to the substantial benefit they can provide. In FY25, we increased our capital allocation of projects for this area and review the carbon impact of all projects prior to their approval. ***Mitigations*** For each of the risks identified we have identified a series of mitigations the Group has already put in place or intends to put in place. Please see table on pages 45 to 46 for the full summary of the risk assessment, with the mitigations included. We have assessed the likelihood that the risk will arise under the "disorderly transition" scenario as this is considered closest to the current trajectory.
Describe the actual and potential impact of the principal climate-related risks and opportunities on the Group's businesses and strategy	In 2022 we launched the 'Better For All' Plan, however as we enter the next phase of our sustainability journey we have launched Doing the Right Thing (pages 31 to 38) to accelerate the pace of change. Sustainability agenda items are included in Board and management level meetings and key sustainability metrics are reported monthly by sites and divisions, and are discussed in detail alongside financial, commercial, operational and people performance indicators. This year we launched a wider sustainability assessment in our capital request process, which includes more focus on environmental impacts and an internal carbon calculation of proposed projects. This has enabled the business to understand the carbon impact of projects alongside the financials. Our list of key risk and opportunities that highlights the actual and potential impacts to the business can be seen on pages 41 to 42.
An analysis of the resilience of the Group's business model and strategy, taking into consideration different climate-related scenarios	The detailed risks identified were scored against three climate-related scenarios described by the Network for Greening the Financial System as Orderly transition, Disorderly transition and Hot house world: **Orderly transition**: Climate policies are introduced early and become gradually more stringent. Both physical and transition risks are relatively subdued. Approximate temperature increase of 1.5 - 2.5°C. **Disorderly transition**: Higher transition risks due to policies being delayed or divergent across countries and sectors. Approximate temperature increase of 2.0 – 3.5°C. **Hot house world**: Some climate policies are implemented in some jurisdictions, but globally efforts are insufficient to halt significant global warming. The scenarios result in severe physical risk including irreversible impacts like sea-level rise. Approximate temperature increase of 3.0 – 5.0°C. Following the identification and scoring of risks as part of our annual review, the top physical risks remain grouped into four areas: 1) Increased heat stress, 2) Increased water stress, 3) Acute weather events and 4) Deforestation within the supply chain. Under the two scenarios considered the more likely, "Disorderly transition" and "Hot house world," our assessment found that for physical risks: • Heat stress is a significant climate-related risk in the medium to long term as this has the potential to impact on the welfare of both livestock in our supply chain and people working in exposed environments. Mitigations have already been put in place to manage livestock and worker exposure to high summer temperatures. • Increased water stress and reduced availability could impact processing operations and our farming supply chain. This could lead to increased raw materials costs and reductions in raw material quality and integrity. We have implemented a horizon scanning and integrity programme as part of our resilience measures. • Acute weather events, including floods, winds and storms, are projected to increase and to cause interruption to operations in the medium to long term. Investment in site infrastructure will improve our resilience to these events. • Deforestation within the supply chain is anticipated to impact Group sourcing in the longer term through the effects of loss of key carbon sinks. We have already trialled protein alternatives to soy meal in poultry feed and will continue to explore feed materials that reduce our reliance on those linked to deforestation.

3. STRATEGY CONTINUED

An analysis of the resilience of the Group's business model and strategy, taking into consideration different climate-related scenarios (continued)

With the mitigation plans in our strategy (as shown in the table on page 45) and investment over time in adaptive measures to address heat, drought and deforestation, significant physical risks can be adequately managed, and therefore we believe our strategy to be resilient to these risks.

Like the physical risks the transitional risks were also grouped into four areas: 1) Increased costs of energy, raw materials, and carbon prices, 2) Evolving technology, 3) Policy & regulation changes and 4), Shifting consumer preferences. Transition risks were considered under the same scenarios and our assessment found:

- The increased cost of energy, raw materials and carbon pricing was the single highest scoring risk in the medium to long term. Our procurement team review contacts and our supply chain frequently, and contractual protection mechanisms are in place to minimise the financial impact.
- We expect policy and regulation to increase in the short term, leading to increased business complexity and changes in key operational processes. In FY25, we have already seen movement on this with EUDR. Therefore, we increased the overall risk score as we foresee the increasing impact this will have on our business. We anticipate bans or restrictions on certain materials, and we will need to adapt our operations to comply with changes. Mitigations are being considered to reduce the impact on operations, and our technical and legal teams keep up to date with potential changes through various industry bodies.
- We see evolving technology as a necessary requirement on our road to Net Zero. C02 used at our slaughter sites is still a substantial part of our Scope 1 emissions at around 16%. As technology evolves in the medium term it will be important that we are able to implement it effectively to utilise CO2 more efficiently in our operations.
- Shifting consumer preference including reduced demand for animal proteins or changing expectations in terms of labelling and transparency is a longer-term risk. This year we engaged with third party carbon specialists to work on understanding the carbon of our specific products. This will, in future, allow us to add carbon per pack onto our packaging if consumer preference leans in that direction. We will remain vigilant to consumer trends and the requirements for information on sourcing as we progress our work to determine and reduce environmental impact of our product range.

We continue to recognise that capital investment will be necessary in ensuring our mitigations can continue to expand and strengthen our resilience to climate-related risks. We are working to finalise our longer term capital investment plans up to 2035 to support our journey to Net Zero, and will look to finalise these in FY26.

Risk quantification

Given the increasing complexity of the supply chain with the recent purchase of Hooks 2 Sisters by Boparan Private Office, a related entity, we need more time to develop this and to establish a deeper understanding of the risks. Owning more of our supply chain allows us to own more of the risks and opportunities which we need to understand fully before quantification. This will be a focus for us in FY26.

Climate-Related Financial Disclosures continued

(P) - Potential mitigations the Group is looking at, but not yet implemented

PHYSICAL RISKS

Description	Likelihood In a Disorderly Scenario	Time horizon	Type of financial impact	Mitigations
Increased heat stress ❶ Operational disruptions due to extreme heat affecting worker productivity, animal health, and machinery functionality. (PR1) Elevated temperatures increasing animal mortality and welfare issues, including through spread of pathogens and disease vectors. (PR2) Health and safety risks for employees working in extreme heat conditions, leading to work stoppages. (PR3)	Likely	Medium & Long term	Increased direct operating costs. Decreased sales revenue. Increased Capital Expenditure.	• Risk assessment of all farms • Installation of misting systems on high-risk farms • Lower stocking density on farms over the summer period, and in the longer term all year round (P) • Training of farm staff • Upgrade equipment
Increased water stress ❷ Reduced water availability impacting farming operations and processing facilities. (PR4)	Likely	Medium & Long term	Increased direct operating costs. Decreased sales revenue.	• Contribute to DEFRA market monitoring group on supply chain risks • Internal horizon scanning and integrity programme. • Supplier management and approval protocols • Site water management plans (P)
Extreme weather (storms, floods etc) ❸ Reduced availability and quality of critical raw materials like potatoes, raisins, and sultanas due to climate events such as droughts and forest fires. (PR5) Supply chain disruptions due to loss of critical inputs, leading to operational interruptions. (PR10) Employee health and safety risks accessing sites during extreme weather events, such as flooding of local area, reducing workforce availability and therefore reducing operational productivity. (PR8) Localized flash flooding from intense rainfall disrupting site operations. (PR6) Storm-induced damage to infrastructure, including buildings, vehicles, and power supplies which may negatively impact operations. (PR7)	Likely	Short, Medium & Long term	Increased direct operating cost. Increased capital expenditure and repairs and maintenance. Decreased sales revenue.	• Establish closer relationships with key raw material suppliers to understand climate-related challenges and provide necessary support. This includes giving long-term supply contracts to assist with planning, hedging, and scaling. • Targeted investment in upgrading infrastructure (P) • Health & safety communications to colleagues • Robust contingency plans and cross functional coordination building on existing frameworks.
Deforestation within the supply chain ❹ Reliance on soy meal sourced from deforestation risk areas, negatively impacting sustainability and supply chain integrity. (PR9)	Possible	Medium & Long Term	Increased direct operating costs.	• Signatories of UK Soy Manifesto • Collaboration with supply chain partners (P) • Research and trials with alternative feed protein sources

Climate-Related Financial Disclosures continued

TRANSITION RISKS

Description	Likelihood In a Disorderly Scenario	Time horizon	Type of financial impact	Mitigations
Increased costs of energy, raw materials, and carbon prices ⑤ Increased costs because of raw material scarcity impacting supply chain continuity due to the transition. (TR1)	Likely	Short, Medium & Long term	£ Increased direct operating. Increased indirect operating costs.	• Validated our Science Based Targets for GHG emissions reduction. • Launching our Transition to Net Zero plan in own operations and supply chain,.
Evolving technology ⑥ Increased Capex investment in upgrading technologies to lower emissions versions at processing and slaughter sites. (TR3)	Very likely	Medium & Long term	£ Increased capital expenditure.	• ESOS audits and energy efficiency projects. • Built internal price of carbon into capital allocation request process. • Improved site visibility of energy, carbon and water use through upgrades to monthly reports.
Policy & regulation changes ⑦ Forced operational changes due to evolving legislation and regulation. (TR4) Anticipated carbon pricing and taxation policies increasing operational costs. (TR2) Regulatory changes imposing financial penalties and taxes. (TR6) Enhanced reporting requirements for ESG matters, including detailed carbon emissions tracking, increasing costs. (TR5)	Very likely	Long term	£ Increased indirect operating costs.	• Identification of proposed and pending legislation (UK and EU) through industry networks, membership of trade bodies and specialist organisations. • Quarterly sustainability report including horizon scanning and legislation changes as required.
Shifting consumer preferences ⑧ Market risks leading to potentially lower demand for products due to shifting dietary preferences towards non-meat products or lower carbon options influenced by climate consciousness. (TR7) Increased reputational risks from increased consumer demand for transparency on product sourcing and sustainability practices, leading to magnification on product labelling and in turn lower demand for the Group's products if requirements are not met. (TR8)	Likely	Medium & Long term	£ Increased revenue through demand for low-carbon products and services.	• Our strength in lower carbon protein sources (chicken) and ability to produce alternative products through Meals & Bakery division (P) • Determine product environmental impacts • Development of lower GHG emission products (P)

Climate-Related Financial Disclosures continued

4. METRICS AND TARGETS

Disclose the metrics and targets used to assess and manage relevant climate-related risks and opportunities where such information is material.

Describe the targets used by the Group to manage climate-related risks and opportunities and performance against targets	We have several metrics and targets which allow us to measure and reduce our impact on the environment, as summarised on page 48. We continuously review our metrics and targets to ensure that the data reported is aligned with our strategy, targets, and provides the information needed for our business leaders to drive results. We also review other relevant data, such as market data and reports, as well as our customers' and suppliers' commitments and expectations, to provide an indicator on the status of our climate change-related risks and opportunities, our stakeholder expectations in the context of their own commitments, and changes to our strategy and planning processes required. In previous years we worked to interim GHG targets while we waited for our SBTis to be validated. Now they have, we have restated our near-term targets for 2030 as presented on page 48. We have used the near-term targets for our Scope 1,2 and 3 absolute targets. Following the disposal of our European Poultry operations, the targets stated are for the remaining UK business only. In FY25, the Group has continued to put in place appropriate plans and incentives for the businesses to invest in reducing our impact by: • Engaging with EY to develop our 'Transition to Net Zero' plan, giving a starting point for our decarbonisation. • Engaging with environmental data specialists to understand our product portfolio and visualise carbon impacts per product, food category and site. • More frequent, complete reporting from our environmental database to provide Scope 1, 2 and 3 emissions data to key stakeholders. • Increased communications with key stakeholders and divisions to further engagement and understanding of strategy and direction of the business.
Describe the key performance indicators used to assess progress against targets used to manage climate-related risks and realise climate-related opportunities and their calculations	Further details on our KPIs are included in the table on page 48. As previously mentioned, we have made improvements to our data collection and verification processes during the year and have seen an increased understanding of the importance of the accuracy of environmental data and engagement at all levels of the business. Like most companies, we still have room for improvement, and we will continue to take steps forward in this area. Our environmental data has been verified by our site/divisional finance teams and internal audit, before being compiled by the Group Sustainability team and communicated for Board and management level reporting. Following approval of the SBTis, within the table on page 45, we have now included our scope 3 targets for the first time. We are not yet able to report performance against these targets for FY25, but this is a key area of focus for FY26. We have engaged third party carbon specialists to assist with this and have made headway in this area, albeit the complexity of the supply chain means we need more time to refine our processes and the accuracy of the data inputs Improving our Food Waste data collection will also be a focus. **KPI commentary** Year on year, we have seen a decrease in our absolute metrics for energy and water usage. This reflects the disposal of our European business, alongside increased governance at site level on consumption, partially offset by higher level of production across our UK operations. In contrast, the intensity equivalent (per tonne of product) measures for energy and water have increased year on year. This reflects decreases in our UK operations aided by higher levels of production and dilution of fixed energy sources, more than offset by increases in Europe, reflecting lower production volumes in the first quarter prior to their disposal. Pleasingly the Group has met its water usage absolute target following several site led water initiatives over the last couple of years. Compared with last year there has been an increase in total food waste. This reflects improvements to our data collection process and completeness of inputs compared to the comparative period.

4. METRICS AND TARGETS CONTINUED

Our metrics and targets have been set to facilitate our ambition in the 'NextGen' strategy. The climate-related metric categories are outlined below:

Target	Risk Mapping	KPI	Calculation	FY25	FY24	Target measure (2030)[1]	Required % to meet target
Net Zero carbon	1 2 3 4 5 6 7 8	Scope 1 emissions (tCO2e)[3]	GHG Protocol	94,126	116,464	58,994	37.3%
		Scope 2 emissions (tCO2e)[3]	GHG Protocol	31,689	56,423	19,277	39.2%
		Scope 3 FLAG emissions (tCO2e)[2]	GHG Protocol	-	2,320,528	1,699,805	-
		Scope 3 non-FLAG emission (tCO2e)[2]	GHG Protocol	-	536,359	450,771	-
Reduce food waste	7 8	Total food waste (tonnes)	Total food waste from UK manufacturing sites (tonnes)	21,595	20,055	16,428	23.9%
		Food waste per tonne of product (tonnes)[5]	Total food waste from UK manufacturing sites (tonnes) / Food produced for sale to external customer (tonnes)	0.041	0.040	0.033	20%
Improve water use efficiency	2 5	Total Water usage (litres)[4]	Sum of all water from mains + abstraction (litres)	5,667,770,596	7,390,722,687	5,929,059,596	n/a
		Water use per tonne of product (litres)[3,4]	Sum of all water from mains + abstraction (litres) / Food produced for sale to external customer (tonnes)	9,566	9,030	7,817	18.3%
Improve energy efficiency	5 6	Total energy usage (kWh)[3]	kWh energy used (gas, electricity, other fuels) at manufacturing/processing sites	508,135,913	590,833,877	436,308,513	14.1%
		Energy usage per tonne of product (kWh)[3,4]	kWh energy used (gas, electricity, other fuels) at manufacturing/processing sites / Food produced for sale to external customer (tonnes)	858	722	714	16.8%
Zero deforestation and conversion free soy meal	4	% soy meal for UK live poultry supply that is certified deforestation free mass balance[5]	Total soy meal certified deforestation free and higher mass balance standard (tonnes) / total soy meal in poultry feed (tonnes)	55.0%	55.0%	100.0%	45.0%

[1] GHG targets have been updated following SBTi validation during the year. Targets were submitted and validated for UK operations only.

[2] We are working on enhancing the accuracy and completeness of our data collection process and methods for our Scope 3 emissions. Our base line of FY24 was completed with the help of a specialised EY working group.

[34] The Group had manufacturing and processing sites within Europe for the first three months of the year. The KPIs above have been calculated inclusive of data where available from these sites, and where applicable has been converted using country specific freely available conversion factors. The sites were sold in October 2024.

[4] Targets with respect to metrics per tonne of product have been introduced following the sale of our European business. EUP data was excluded when setting targets.

[5] All soy meal is purchased to recognised deforestation free standards of which 55% is the higher mass balance standard.

DIRECTORS' REPORT

The directors present their annual report and the audited financial statements for the 52 weeks ended 26 July 2025.

DIRECTORS

The directors of the Company who served during the period ended 26 July 2025 and up to the date of signing the financial statements, unless otherwise stated, are those listed on page 2.

The Group has made qualifying third-party indemnity provisions for the benefit of the directors which remain in force at the date of this report.

DIVIDENDS

No dividends have been declared or paid for the period ending 26 July 2025 or in the period to the date of signing of these financial statements. There were also no dividends declared or paid in respect of the period ending 27 July 2024.

STREAMLINED ENERGY & CARBON REPORTING

As a large private company, the Group is mandated to disclose its UK energy use and associated greenhouse gas emissions. Such metrics will differ from those presented within the CFD report as those also include our European operations. The Group has assessed greenhouse gas emissions using the 'GHG Reporting Protocol – A Corporate Accounting and Reporting Standard' and in accordance with the DEFRA's 'Environmental Reporting guidelines: including Streamlined Energy and Carbon Reporting requirements'. All data has been calculated from primary activity data to both kWh and CO2e using the 'UK Government GHG conversion factors for company reporting'.

Energy consumption

Financial period	Total UK energy consumption (kWh)	Total UK energy consumption (kWh) per tonne of product
FY25	**470,167,582**	**895**
FY24	462,052,650	914

Greenhouse gas emissions

Financial period	Total UK GHG emissions tonnes (CO2e)	Total UK GHG emissions tonnes (CO2e) per tonne of product
FY25	**112,296**	**0.214**
FY24	123,440	0.244

Following the Energy Saving Opportunity Scheme (ESOS) audits in previous years, selected sites have been selected for enhanced audits during FY25 and FY26. The results of the audit give sites actions plans on the best approach to deliver the highest level of energy efficiency savings for that site. Suggestions include new lighting systems, improvements to efficiency of refrigeration and boilers, improvements to submetering, lagging of pipework and management of compressed air. In FY25, we introduced a central working group to assess and plan a move to automatic meter readings at all sites to improve the accuracy and timeliness of data capture.

In FY25, we have seen an increase in our absolute energy consumption consistent with higher production volumes during the year, however, per tonne of product there is a year-on-year improvement. We have also seen a reduction in our GHG emissions due to the decarbonisation of the electric grid as well as reduced refrigeration gas leaks through capex investments.

FINANCIAL RISK MANAGEMENT

The financial risks faced by the Group and the measures taken to reduce these risks are addressed within the Strategic report from page 16 and form part of this report by cross-reference.

DONATIONS

The Group made £27k of charitable donations during the period (2024: £16k) to charities which the directors deem it appropriate to support.

FUTURE DEVELOPMENTS

Details of the Group's future prospects can be found in the Strategic Report on pages 8 and 13 and form part of this report by cross-reference.

STAKEHOLDER ENGAGEMENT

A summary of how the Company has engaged with suppliers, customers and other third parties can be found on pages 22 to 27.

EMPLOYEES

Details of the number of employees and related costs can be found in note 7.

The Group takes its responsibilities to its employees seriously and places great emphasis on optimising the contribution made by employees at all levels. The Group recognises the value of its employees and seeks to create an energetic, dynamic and responsive environment in which to work. It places considerable importance on communications with employees, which occur throughout the organisation on both a formal and informal basis. The Group's policy is to provide opportunities for active participation and personal development, with the goals of motivating individuals and helping them to enhance their skills and maximise their potential.

The Group is committed to:

- providing equality of opportunity for all existing and potential employees. It aims to treat all its employees fairly in every aspect of employment.
- ensuring that employees have access to information and training that enables them to contribute and participate fully in the Group's achievement of its objectives; and
- providing employees with clear and fair terms of employment and competitive remuneration packages.

The Company uses a variety of methods to enable its employees to understand the performance of the Group and of their own operating business unit. These include briefing groups, meetings with employee representatives, e-mail bulletins and in-house magazines. Employees are consulted on a wide range of issues affecting their current and future interests, and particularly on changes affecting the businesses in which they work.

Applications for employment by disabled persons are fully considered, bearing in mind the abilities of the applicant concerned. In the event of a colleague becoming disabled, every effort is made to ensure that their employment with the Group continues, and that appropriate training is arranged. It is the policy of the Group that training, career development and promotion of disabled persons should, as far as possible, be identical to that of other employees.

RESEARCH AND DEVELOPMENT

Throughout the period the Group invested across the business in food hygiene and product research in the development of new and enhanced products. The costs incurred in the period of £0.8m (2024: £0.8m) comprise all directly attributable costs necessary to create and produce new products which are both brand new in design and those being modified.

DISCLOSURE OF INFORMATION TO AUDITOR

Each of the persons who is a director at the date of approval of this report confirms that:

- So far as the director is aware, there is no relevant audit information of which the Company's auditor is unaware; and
- The director has taken all the steps that he/she ought to have taken as a director to make himself/herself aware of any relevant audit information and to establish that the Company's auditor is aware of that information.

This confirmation is given and should be interpreted in accordance with the provisions of s418 of the Companies Act 2006.

AUDITOR

Deloitte LLP acted as auditor for the 52 weeks ended 26 July 2025 and have expressed their willingness to continue in office as auditor of the Company. A resolution proposing their reappointment will be submitted at the Company's annual general meeting.

POST BALANCE SHEET EVENTS

On 31 July 2025, the Group sold its 50% interest in Hook 2 Sisters Limited to 2 Agriculture Holdings Limited, a related company. Consideration for the transaction was £1, together with the waiving of a £3.25m loan from the joint venture. In conjunction with the transaction the investment value and loan value have been written down to £nil in the period to 26 July 2025.

GOING CONCERN

In determining whether the Group's quarterly financial statements can be prepared on a going concern basis, the directors considered the Group's business activities, together with the factors likely to affect its future development, performance, and position. The review included the financial position of the Group, its cash flows, liquidity position, borrowing facilities and covenants.

The key factors considered by the directors were as follows:

- consideration of detailed forecasts prepared for the 12-month period from the date of approval of the annual financial statements and the application of sensitivities to those forecasts.
- the implications of the ongoing challenging economic environment and future uncertainties on the Group's revenues and profits and its ability to meet financial covenants.
- the impact of the competitive environment within which the Group's businesses operate.
- the potential impact of cost inflation, including the volatility in labour costs, energy and feed prices and the recovery of these from customers.
- expected changes in customer demand patterns.
- the volatility in the wider economy and associated financial markets, and its potential impacts upon the cashflows and credit facilities for the business.
- the Group's access to a committed bank facility and invoice discounting facility to meet day to day working capital requirements.
- the potential actions that could be taken in the event that revenues are worse than expected, to ensure that operating profit and cash flows are protected.

During the financial year, on 7 November 2024, the Group completed a full capital structure refinance, resulting in the issuance of a new £390m senior secured bond, maturing in November 2029. In addition, a new £80m super senior secured RCF and £90m invoice discount facility were agreed, both maturing in May 2029. The going concern assessment has been made by reviewing the financial position of the group, including the availability of these new financing facilities and the associated covenants.

Consistent with previous periods the Group has prepared a base case and a reasonable worst-case scenario. Under the reasonable worst-case scenario, the base cash flows were sensitised for a 20% reduction in EBITDA and negative working capital overlays. Further, mitigating actions in the form of a reduction in discretionary capex spend were applied. Under both scenarios, no breach is identified in respect of either the cash or covenant headroom.

In applying a reverse stress test to the cash flows, the Directors have concluded the set of circumstances required to exhaust liquidity and breach covenant tests to be remote.

Having undertaken this assessment, the Directors have a reasonable expectation that the Group and the Company have adequate resources to continue in operational existence for the foreseeable future, being a period of not less than 12 months from the date of approval of these financial statements. Accordingly, this report to 26 July 2025 has been prepared on a going concern basis.

Approved by the Board of directors and signed by a director on its behalf.

P A Friston
Director
22 October 2025

DIRECTORS' RESPONSIBILITES STATEMENT

The directors are responsible for preparing the annual report and the financial statements in accordance with applicable law and regulations.

Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have elected to prepare the financial statements in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards and applicable law), including FRS 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland".

Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the company and of the profit or loss of the company for that period. In preparing these financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently.
- make judgements and accounting estimates that are reasonable and prudent;
- state whether applicable UK Accounting Standards have been followed, subject to any material departures disclosed and explained in the financial statements; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the company will continue in business.

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the company's transactions and disclose with reasonable accuracy at any time the financial position of the company and enable them to ensure that the financial statements comply with the Companies Act 2006. They are also responsible for safeguarding the assets of the company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The directors are responsible for the maintenance and integrity of the corporate and financial information included on the company's website. Legislation in the United Kingdom governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF BOPARAN HOLDINGS LIMITED

Report on the audit of the financial statements

Opinion

In our opinion the financial statements of Boparan Holdings Limited (the 'Parent Company') and its subsidiaries (the 'Group'):

- give a true and fair view of the state of the Group's and of the Parent Company's affairs as at 26 July 2025 and of the Group's loss for the year then ended;
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice, including Financial Reporting Standard 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland"; and
- have been prepared in accordance with the requirements of the Companies Act 2006.

We have audited the financial statements which comprise:

- the consolidated profit and loss account;
- the consolidated statement of comprehensive income;
- the consolidated and Parent Company balance sheets;
- the consolidated and Parent Company statements of changes in equity;
- the consolidated cash flow statement; and
- the related notes 1 to 34.

The financial reporting framework that has been applied in their preparation is applicable law and United Kingdom Accounting Standards, including Financial Reporting Standard 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" (United Kingdom Generally Accepted Accounting Practice).

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) ("ISAs (UK)") and applicable law. Our responsibilities under those standards are further described in the auditor's responsibilities for the audit of the financial statements section of our report.

We are independent of the Group and Parent Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the Financial Reporting Council's (the 'FRC's') Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the Directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Our evaluation of the directors' assessment of the Group's and Parent Company's ability to continue to adopt the going concern basis of accounting included:

- financing facilities including nature of facilities, repayment terms and covenants
- linkage to business model and medium-term risks
- assumptions used in the forecasts
- amount of headroom in the forecasts (cash and covenants)
- sensitivity analysis
- sophistication of the model used to prepare the forecasts, testing of clerical accuracy of those forecasts and our assessment of the historical accuracy of forecasts prepared by management

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Group's and Parent Company's ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the Directors with respect to going concern are described in the relevant sections of this report.

Other information

The other information comprises the information included in the annual report, other than the financial statements and our auditor's report thereon. The directors are responsible for the other information contained within the annual report. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements, or our knowledge obtained in the course of the audit, or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether this gives rise to a material misstatement in the financial statements themselves. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Responsibilities of directors

As explained more fully in the Directors' responsibilities statement, the Directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the Directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Directors are responsible for assessing the Group's and Parent Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Group or the Parent Company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on the FRC's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditor's report.

Extent to which the audit was considered capable of detecting irregularities, including fraud

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below.

We considered the nature of the Group's industry and its control environment and reviewed the Group's documentation of their policies and procedures relating to fraud and compliance with laws and regulations. We also enquired of management, internal audit and the Directors about their own identification and assessment of the risks of irregularities, including those that are specific to the Group's business sector.

We obtained an understanding of the legal and regulatory frameworks that the Group operates in, and identified the key laws and regulations that:

- had a direct effect on the determination of material amounts and disclosures in the financial statements. These included UK Companies Act, pensions legislation, tax legislation; and
- do not have a direct effect on the financial statements but compliance with which may be fundamental to the Company's ability to operate or to avoid a material penalty. These included Health and Safety at work legislation, Data Protection Act, Food Hygiene Act, Grocery Supply Code of Practice and Sales of Goods Act.

We discussed among the audit engagement team including relevant internal specialists such as tax, IT and pensions specialists regarding the opportunities and incentives that may exist within the organisation for fraud and how and where fraud might occur in the financial statements.

As a result of performing the above, we identified the greatest potential for in the following areas, and our procedures performed to address it are described below:

- Manual adjustments to revenue: We have tested a sample of manual adjustments to revenue through agreement to supporting documentation to assess whether they are appropriate. We have also performed design and implementation testing around the controls in place.

In common with all audits under ISAs (UK), we are also required to perform specific procedures to respond to the risk of management override. In addressing the risk of fraud through management override of controls, we tested the appropriateness of journal entries and other adjustments; assessed whether the judgements made in making accounting estimates are indicative of a potential bias; and evaluated the business rationale of any significant transactions that are unusual or outside the normal course of business.

In addition to the above, our procedures to respond to the risks identified included the following:

- reviewing financial statement disclosures by testing to supporting documentation to assess compliance with provisions of relevant laws and regulations described as having a direct effect on the financial statements;
- performing analytical procedures to identify any unusual or unexpected relationships that may indicate risks of material misstatement due to fraud;
- enquiring of management, internal audit and in-house legal counsel concerning actual and potential litigation and claims, and instances of non-compliance with laws and regulations; and
- reading minutes of meetings of those charged with governance, reviewing internal audit reports and reviewing correspondence with HMRC.

Report on other legal and regulatory requirements

Opinions on other matters prescribed by the Companies Act 2006

In our opinion, based on the work undertaken in the course of the audit:

- the information given in the Strategic report and the Directors' report for the financial year for which the financial statements are prepared is consistent with the financial statements; and
- the Strategic report and the Directors' report have been prepared in accordance with applicable legal requirements.

In the light of the knowledge and understanding of the Group and of the Parent Company and their environment obtained in the course of the audit, we have not identified any material misstatements in the Strategic report or the Directors' report.

Matters on which we are required to report by exception

Under the Companies Act 2006 we are required to report in respect of the following matters if, in our opinion:

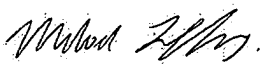

- adequate accounting records have not been kept by the Parent Company, or returns adequate for our audit have not been received from branches not visited by us; or
- the Parent Company financial statements are not in agreement with the accounting records and returns; or
- certain disclosures of directors' remuneration specified by law are not made; or
- we have not received all the information and explanations we require for our audit.

We have nothing to report in respect of these matters.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF BOPARAN HOLDINGS LIMITED

Use of our report

This report is made solely to the Company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's members as a body, for our audit work, for this report, or for the opinions we have formed.

1. ACCOUNTING POLICIES

BASIS OF ACCOUNTING

Boparan Holdings Limited is a company incorporated in the United Kingdom and prepares its financial statements under the Companies Act 2006. The Company is a private company limited by shares and is registered in England and Wales. The address of the Company's registered office is Trinity Park House, Trinity Business Park, Fox Way, Wakefield, West Yorkshire, WF2 8EE.

The Group is a leading food manufacturer in the UK and Europe focused on the core operations of poultry and meals production.

The financial statements have been prepared under the historical cost convention, modified to include certain items at fair value, and in accordance with Financial Reporting Standard 102 (FRS102) issued by the Financial Reporting Council.

The functional currency of the Company is considered to be pounds sterling, because that is the currency of the primary economic environment in which the Company operates. These financial statements are also presented in pounds sterling.

Parent company disclosure exemptions

Boparan Holdings Limited meets the definition of a qualifying entity under FRS 102 and has therefore taken advantage of the following disclosure exemptions available to it in respect of its separate financial statements, which are presented alongside the consolidated financial statements:

- Only one reconciliation of the number of shares outstanding at the beginning and end of the period has been presented as the reconciliations for the Group and the parent company would be identical;
- No cash flow statement has been presented for the parent company;
- Disclosures in respect of the parent company's financial instruments and share-based payment arrangements have not been presented as equivalent disclosures have been provided in respect of the Group as a whole; and
- No disclosure has been given for the aggregate remuneration of the key management personnel of the parent company as their remuneration is included in the totals for the Group as a whole.

The Company is consolidated in the financial statements of its ultimate parent, Boparan Holdco Limited, which may be obtained from their registered office at Colmore Court, 9 Colmore Row, Birmingham, B3 2BJ.

BASIS OF CONSOLIDATION

The Group financial statements consolidate the financial statements of the Company and all of its subsidiary undertakings at 26 July 2025 using acquisition accounting.

The results of subsidiary undertakings acquired or disposed of during a financial period are included from, or up to, the effective date of an acquisition or disposal.

All intra-group transactions, balances, income and expenses are eliminated on consolidation.

1. ACCOUNTING POLICIES (CONTINUED)

GOING CONCERN

In determining whether the Group's annual financial statements can be prepared on a going concern basis, the directors considered the Group's business activities, together with the factors likely to affect its future development, performance, and position. The review included the financial position of the Group, its cash flows, liquidity position, borrowing facilities and covenants.

The key factors considered by the directors were as follows:

- consideration of detailed forecasts prepared for the 12-month period from the date of approval of the annual financial statements and the application of sensitivities to those forecasts;
- the implications of the ongoing challenging economic environment and future uncertainties on the Group's revenues and profits and its ability to meet financial covenants;
- the impact of the competitive environment within which the Group's businesses operate;
- the potential impact of cost inflation, including the volatility in labour costs, energy and feed prices and the recovery of these from customers;
- expected changes in customer demand patterns;
- the volatility in the wider economy and associated financial markets, and its potential impacts upon the cashflows and credit facilities for the business;
- the Group's access to a committed bank facility and invoice discounting facility to meet day to day working capital requirements; and
- the potential actions that could be taken in the event that revenues are worse than expected, to ensure that operating profit and cash flows are protected.

During the financial year, on 7 November 2024, the Group completed a full capital structure refinance, resulting in the issuance of a new £390m senior secured bond, maturing in November 2029. In addition, a new £80m super senior secured RCF and £90m invoice discount facility were agreed, both maturing in May 2029. The going concern assessment has been made by reviewing the financial position of the group, including the availability of these new financing facilities and the associated covenants.

Consistent with previous periods the Group has prepared a base case and a reasonable worst-case scenario. Under the reasonable worst-case scenario, the base cash flows were sensitised for a 20% reduction in EBITDA and negative working capital overlays. Further, mitigating actions in the form of a reduction in discretionary capex spend were applied. Under both scenarios, no breach is identified in respect of either the cash or covenant headroom.

In applying a reverse stress test to the cash flows, the Directors have concluded the set of circumstances required to exhaust liquidity and breach covenant tests to be remote.

Having undertaken this assessment, the Directors have a reasonable expectation that the Group and the Company have adequate resources to continue in operational existence for the foreseeable future, being a period of not less than 12 months from the date of approval of these financial statements. Accordingly, this report to 26 July 2025 has been prepared on a going concern basis.

1. ACCOUNTING POLICIES (CONTINUED)

TURNOVER

Turnover is measured at the fair value of the consideration received or receivable, and represents amounts receivable for goods and services provided in the normal course of business, net of discounts, Value Added Tax (VAT) and other sales related taxes.

The Group provides trade discounts, primarily in the form of rebate arrangements or other incentive arrangements, to its customers. The arrangements can take the form of volume related rebates, marketing fund contributions, promotional fund contributions or lump sum incentives. The Group recognises revenue net of such discounts over the period to which the arrangement applies.

Sales of goods are recognised when goods are delivered and title has passed, and to the extent that sales are invoiced in advance of delivery, income is deferred.

SUPPLIER REBATES

The Group enters into rebate arrangements with its suppliers. The arrangements are primarily volume related. The supplier rebates received are recognised as a deduction from cost of sales (or administration or distribution costs if more appropriate), based on the entitlement that has been earned up to the balance sheet date, for each relevant supplier arrangement. The carrying value of inventory is reduced by any associated supplier rebate amount where the inventory has yet to be sold at the balance sheet date.

NET FINANCING CHARGES

Interest income is accrued by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount.

Finance costs of financial liabilities are recognised in the profit and loss account over the term of such instruments at the effective interest rate applicable on the carrying amount.

The net impact of the unwinding of the discount rate on the net pension scheme liability is charged to interest payable in the profit and loss account.

BORROWING COSTS

Borrowing costs are interest and other costs that an entity incurs in connection with the borrowing of funds. The Group has not adopted the policy of capitalising borrowing costs into the cost of tangible fixed assets, and therefore all borrowing costs are recognised as an expense in profit or loss, within net financing charges, in the period in which they are incurred.

BORROWING COSTS FOR LOANS

Financial liabilities are initially recognised at fair value, less any directly attributable transaction costs and subsequently stated at amortised cost using the effective interest method.

RESEARCH AND DEVELOPMENT

Research and development costs are expensed in the period to which they relate. Costs comprise all directly attributable costs necessary to create and produce new products which are both brand new in design and those being modified. Costs classified as research and development include raw materials, labour costs, artwork origination and market research directly attributable to developing the product.

GOVERNMENT GRANTS

Grants relating to revenue are recognised in income over the period in which the related costs are recognised. Grants relating to assets are recognised over the expected useful life of the asset. Where part of a grant relating to an asset is deferred, it is recognised as deferred income.

EXCEPTIONAL ITEMS

In order to ensure comparability between the Group's results year on year, the directors present certain items separately in exceptional items, so that the reader of the accounts can better understand the performance of the business.

The decision to present an item as exceptional is a judgement of the directors. The directors make their assessment based on the nature of the item, the cause of the occurrence and the scale of impact of that item on the reported performance. Certain items classified as exceptional are non-recurring or of such a significant size they would distort the results of any particular period.

1. ACCOUNTING POLICIES (CONTINUED)

EXCEPTIONAL ITEMS (CONTINUED)

Other items highlighted as exceptional such as restructuring costs can involve multi-year programmes; in such cases the umbrella programme to which the costs relate is also taken into account in this assessment of the presentation as exceptional.

For further information on items disclosed in the period see note 5.

FOREIGN CURRENCIES

(a) Functional and presentation currency

The individual financial statements of each Group company are presented in the currency of the primary economic environment in which it operates (its functional currency). For the purpose of the consolidated financial statements, the results and financial position of each Group company are expressed in pounds sterling, which is the functional currency of the Company, and the presentation currency for the consolidated financial statements.

(b) Transactions and balances

Transactions in foreign currencies are recorded at the rate of exchange at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies at the balance sheet date are reported at the rates of exchange prevailing at that date.

(c) Group companies

The results of overseas operations are translated at the year-to-date average rate of exchange during the period and their balance sheets at the rates ruling at the balance sheet date. Exchange differences on translation of the opening net assets and results of overseas operations are reported in other comprehensive income and accumulated in equity (attributed to non-controlling interests as appropriate).

Other exchange differences are recognised in profit and loss in the period in which they arise except for:

- exchange differences on transactions entered into to hedge certain foreign currency risks;
- exchange differences arising on gains or losses on non-monetary items which are recognised in other comprehensive income; and
- in the case of the consolidated financial statements, exchange differences on monetary items receivable from or payable to a foreign operation for which settlement is neither planned nor likely to occur (thereby forming part of the net investment in the foreign operation), which are recognised in other comprehensive income and reported under equity.

TAXATION

Current tax, both UK and overseas, is recognised for the amounts payable (or receivable) in respect of the taxable profit for the current or past reporting periods using the tax rates and laws that have been enacted or substantively enacted at the balance sheet date.

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events that result in an obligation to pay more tax in the future or a right to pay less tax in the future have occurred at the balance sheet date.

Deferred tax assets are recognised only to the extent that, on the basis of all available evidence, it can be regarded as more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted.

1. ACCOUNTING POLICIES (CONTINUED)

TAXATION (CONTINUED)

When the amount that can be deducted for tax for an asset (other than goodwill) that is recognised in a business combination is less / (more) than the value at which it is recognised, a deferred tax liability / (asset) is recognised for the additional tax that will be paid / (avoided) in respect of that difference.

Deferred tax liabilities are recognised for timing differences arising from investments in subsidiaries and associates, except where the Group is able to control the reversal of the timing difference and it is probable that it will not reverse in the foreseeable future.

Deferred tax is measured using the tax rates and laws that have been enacted or substantively enacted by the balance sheet date that are expected to apply to the reversal of the timing difference. The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Where items recognised in other comprehensive income or equity are chargeable to or deductible for tax purposes, the resulting current or deferred tax expense or income is presented in the same component of comprehensive income or equity as the transaction or other event that resulted in the tax expense or income.

Current tax assets and liabilities are offset only when there is a legally enforceable right to set off the amounts and the Group intends either to settle on a net basis or to realise the asset and settle the liability simultaneously.

Deferred tax assets and liabilities are offset only if:

(a) the Group has a legally enforceable right to set off current tax assets against current tax liabilities; and

(b) the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities which intend either to settle current tax liabilities and assets on a net basis, or to realise the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

GOODWILL

Goodwill arising on acquisition, representing the difference between the cost and the fair value of the net assets acquired in a business combination is capitalised in the period of acquisition and written off on a straight line basis over its useful economic life which is estimated to be twenty years. Provision is made for any impairment.

Goodwill is carried at cost less accumulated amortisation and accumulated impairment losses.

Negative goodwill is credited to the profit and loss account in the periods in which the acquired non-monetary assets are recovered through depreciation or sale. Negative goodwill in excess of the fair value of non-monetary assets acquired is credited to the profit or loss account in the period it is expected to benefit.

INTANGIBLE ASSETS

Software separately acquired, including computer software which is not an integral part of an item of hardware, is stated at cost less accumulated amortisation. Cost comprises purchase price and other directly attributable costs.

Software is recognised as an asset only if it meets the following criteria:

- an asset can be separately identified;
- it is probable that the asset created will generate future economic benefits;
- it is probable that the expected future economic benefits that are attributable to the asset will flow to the entity; and
- the development cost / acquisition cost of the asset can be reliably measured.

1. ACCOUNTING POLICIES (CONTINUED)

INTANGIBLE ASSETS (CONTINUED)

Development costs have been capitalised in accordance with FRS 102 Section 18 Intangible Assets other than Goodwill and are therefore not treated, for dividend purposes, as a realised loss.

Costs relating to the development of software for internal use are capitalised once the recognition criteria outlined above are met.

Software is amortised over its expected useful life, which ranges from three to seven years. Amortisation commences when the asset is ready for use.

TANGIBLE FIXED ASSETS AND DEPRECIATION

Tangible fixed assets are stated at historical cost, less accumulated depreciation and any accumulated impairment losses. Historical cost includes expenditure that is directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management.

No depreciation is provided on land. Depreciation on other assets is charged so as to allocate the cost of assets less their residual value over their estimated useful lives, using the straight-line method. The principal annual rates used for other assets are:

Freehold properties	2% - 5%
Leasehold properties	2% - 20%
Plant, fixtures and motor vehicles	6.66% - 25%

Residual value represents the estimated amount which would currently be obtained from disposal of an asset, after deducting estimated costs of disposal, if the asset were already of the age and in the condition expected at the end of its useful life.

LEASED ASSETS

Assets held under finance leases, hire purchase contracts and other similar arrangements, which confer rights and obligations similar to those attached to owned assets, are capitalised as tangible fixed assets at the fair value of the leased asset (or, if lower, the present value of the minimum lease payments as determined at the inception of the lease) and are depreciated over the shorter of the lease terms and their useful lives.

The capital elements of the future lease obligations are recorded as liabilities, while the interest elements are charged to the profit and loss account over the period of the leases to produce a constant periodic rate of interest on the remaining balance of the liability.

Rentals under operating leases are charged on a straight-line basis over the lease term, even if the payments are not made on such a basis. Benefits received and receivable as an incentive to sign an operating lease, are similarly spread on a straight-line basis over the lease term.

ONEROUS LEASES

Where the unavoidable costs of a lease exceed the economic benefit expected to be received from it, a provision is made for the present value of the obligations under the lease. This is released over the remaining lease term.

1. ACCOUNTING POLICIES (CONTINUED)

IMPAIRMENT OF ASSETS

Assets, other than those measured at fair value, are assessed for indicators of impairment at each balance sheet date. If there is objective evidence of impairment, an impairment loss is recognised in profit or loss as described below.

Non-financial assets

An asset is impaired where there is objective evidence that, as a result of one or more events that occurred after initial recognition, the estimated recoverable value of the asset has been reduced. The recoverable amount of an asset is the higher of its fair value less costs to sell and its value in use.

The recoverable amount of goodwill is derived from measurement of the present value of the future cash flows of the cash-generating units of which the goodwill is a part. Any impairment loss in respect of a CGU is allocated first to the goodwill attached to that CGU, and then to other assets within that CGU on a pro-rata basis.

Where indicators exist for a decrease in impairment loss previously recognised for assets other than goodwill, the prior impairment loss is tested to determine reversal. An impairment loss is reversed on an individual impaired asset to the extent that the revised recoverable value does not lead to a revised carrying amount higher than the carrying value had no impairment been recognised. Where a reversal of impairment occurs in respect of a CGU, the reversal is applied first to the assets of the CGU, except for goodwill, on a pro-rata basis. Impairment of goodwill is never reversed.

Financial assets

For financial assets carried at amortised cost, the amount of an impairment is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the financial asset's original effective interest rate.

For financial assets carried at cost less impairment, the impairment loss is the difference between the asset's carrying amount and the best estimate of the amount that would be received for the asset if it were to be sold at the reporting date.

Where indicators exist for a decrease in impairment loss, and the decrease can be related objectively to an event occurring after the impairment was recognised, the prior impairment loss is tested to determine reversal. An impairment loss is reversed on an individual impaired financial asset to the extent that the revised recoverable value does not lead to a revised carrying amount higher than the carrying value had no impairment been recognised.

INVESTMENTS

In the Company balance sheet, investments in subsidiaries are measured at cost less impairment.

ASSOCIATES

In the Group financial statements, investments in associates are accounted for using the equity method. Investments in associates are initially recognised at the transaction price (including transaction costs) and are subsequently adjusted to reflect the Group's share of the profit or loss and other comprehensive income of the associate.

JOINT VENTURES

In the Group financial statements, investments in joint ventures are accounted for using the equity method. The consolidated profit and loss account includes the Group's share of the joint venture's profits less losses, with the Group's share of the net assets of the joint venture being shown in the consolidated balance sheet.

INVENTORIES

Inventories are stated at the lower of cost and net realisable value. Cost is calculated using the FIFO (first-in, first-out) method and comprises direct materials and, where applicable, direct labour costs and those overheads that have been incurred bringing the inventories to their present location and condition. Net realisable value represents the estimated selling price less all estimated costs of completion including distribution costs. Provision is made for obsolete, slow moving or defective inventory where appropriate.

1. ACCOUNTING POLICIES (CONTINUED)

FINANCIAL ASSETS AND LIABILITIES

FINANCIAL INSTRUMENTS

Financial assets and financial liabilities are recognised when the Group becomes a party to the contractual provisions of the instrument.

Financial liabilities and equity instruments are classified according to the substance of the contractual arrangements entered into. An equity instrument is any contract that evidences a residual interest in the assets of the Group after deducting all of its liabilities.

All financial assets and liabilities are initially measured at transaction price (including transaction costs), except for those financial assets classified as at fair value through profit or loss, which are initially measured at fair value (which is normally the transaction price excluding transaction costs), unless the arrangement constitutes a financing transaction. If an arrangement constitutes a financing transaction, the financial asset or financial liability is measured at the present value of the future payments discounted at a market rate of interest for a similar debt instrument.

Financial assets and liabilities are only offset in the statement of financial position when there exists a legally enforceable right to set off the recognised amounts and the Group intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

Debt instruments which meet the following conditions are subsequently measured at amortised cost using the effective interest method:

a) The contractual return to the holder is (i) a fixed amount; (ii) a positive fixed rate or a positive variable rate; or (iii) a combination of a positive or a negative fixed rate and a positive variable rate.

b) The contract may provide for repayments of the principal or the return to the holder (but not both) to be linked to a single relevant observable index of general price inflation of the currency in which the debt instrument is denominated, provided such links are not leveraged.

c) The contract may provide for a determinable variation of the return to the holder during the life of the instrument, provided that (i) the new rate satisfies condition (a) and the variation is not contingent on future events other than (1) a change of a contractual variable rate; (2) to protect the holder against credit deterioration of the issuer; (3) changes in levies applied by a central bank or arising from changes in relevant taxation or law; or (ii) the new rate is a market rate of interest and satisfies condition (a).

d) There is no contractual provision that could, by its terms, result in the holder losing the principal amount or any interest attributable to the current period or prior periods.

e) Contractual provisions that permit the issuer to prepay a debt instrument or permit the holder to put it back to the issuer before maturity are not contingent on future events, other than to protect the holder against the credit deterioration of the issuer or a change in control of the issuer, or to protect the holder or issuer against changes in levies applied by a central bank or arising from changes in relevant taxation or law.

f) Contractual provisions may permit the extension of the term of the debt instrument, provided that the return to the holder and any other contractual provisions applicable during the extended term satisfy the conditions of paragraphs (a) to (c).

1. ACCOUNTING POLICIES (CONTINUED)

FINANCIAL INSTRUMENTS (CONTINUED)

Debt instruments that have no stated interest rate (and do not constitute financing transaction) and are classified as payable or receivable within one year are initially measured at an undiscounted amount of the cash or other consideration expected to be paid or received, net of impairment.

With the exception of some hedging instruments, other debt instruments not meeting these conditions are measured at fair value through profit or loss.

Commitments to make and receive loans which meet the conditions mentioned above are measured at cost (which may be nil) less impairment.

Financial assets are derecognised when and only when (a) the contractual rights to the cash flows from the financial asset expire or are settled, (b) the Group transfers to another party substantially all of the risks and rewards of ownership of the financial asset, or (c) the Group, despite having retained some, but not all, significant risks and rewards of ownership, has transferred control of the asset to another party.

Financial liabilities are derecognised only when the obligation specified in the contract is discharged, cancelled or expires.

DERIVATIVE FINANCIAL INSTRUMENTS

The Group uses derivative financial instruments to reduce exposure to foreign exchange risk and interest rate movements. The Group does not hold or issue derivative financial instruments for speculative purposes.

Derivatives are initially recognised at fair value at the date a derivative contract is entered into and are subsequently remeasured to their fair value at each reporting date. The resulting gain or loss is recognised in profit or loss immediately unless the derivative is designated and effective as a hedging instrument, in which event the timing of the recognition in profit or loss depends on the nature of the hedge relationship.

The best evidence of fair value is a quoted price for an identical asset in an active market. When quoted prices are unavailable, the price of a recent transaction for an identical asset provides evidence of fair value as long as there has not been a significant change in economic circumstances or a significant lapse of time since the transaction took place. If the market is not active and recent transactions of an identical asset on their own are not a good estimate of fair value, the fair value is estimated by using a valuation technique.

EQUITY INSTRUMENTS

Equity instruments issued by the Company are recorded at the fair value of cash or other resources received, net of direct issue costs.

PROVISIONS

Provisions are recognised when the Group has a present obligation (legal or constructive) as a result of a past event, and it is probable that the Group will be required to settle that obligation. Provisions are measured at their present value and at the directors' best estimate of the expenditure required to settle the obligation at the balance sheet date.

PENSION SCHEMES

Defined contribution pension schemes

For defined contribution schemes the amount charged to the profit and loss account in respect of pension costs and other post-retirement benefits is the contributions payable in the period. Differences between contributions payable in the period and contributions actually paid are shown as either accruals or prepayments in the balance sheet.

1. ACCOUNTING POLICIES (CONTINUED)

PENSION SCHEMES (CONTINUED)

Defined benefit pension schemes

The Group operates a number of defined benefit pension schemes; the UK and Irish schemes are closed to future benefit accrual.

If the present value of any defined benefit obligation is less than the fair value of plan assets at that date, such that the plan has a surplus, the plan surplus will be recognised as a defined benefit plan asset only to the extent that it is able to recover the surplus either through reduced contributions in the future or through refunds from the plan.

For defined benefit schemes, the amounts charged to operating profit are the costs arising from settlements and curtailments. They are included as part of staff costs.

The net interest cost on the net defined benefit liability is charged to profit or loss and included within finance costs. Remeasurement comprising actuarial gains and losses and the return on scheme assets (excluding amounts included in net interest on the defined benefit liability) are recognised immediately in other comprehensive income. Costs of administering the closed defined benefit schemes are charged to administration costs.

Defined benefit schemes are funded, with the assets of the scheme held separately from those of the Group, in separate trustee administered funds. Pension scheme assets are measured at fair value by reference to observable market prices and liabilities are measured on an actuarial basis using the projected unit credit method. Full actuarial valuations are obtained at least triennially and are updated at each balance sheet date.

Post-retirement healthcare

The Group provides post-retirement healthcare benefits to eligible employees who retired before 31 March 1999. The expected cost of this benefit has been computed using an accounting methodology similar to that for defined benefit pension schemes. Actuarial gains and losses arising from experience adjustments, and changes in actuarial assumptions, are recognised in full in the period in which they occur. They are recognised outside the profit and loss account and presented in the statement of total recognised gains and losses. These obligations are valued annually for the purpose of the financial statements by independent qualified actuaries.

DIVIDENDS

Dividend distributions to the Company's shareholders are recognised in the Group and Company financial statements as follows:

- Final dividend: when approved by the Company's shareholders at the annual general meeting;
- Interim dividend: when paid by the Company.

Dividend income from investments is recognised when the shareholders' rights to receive payment have been established (provided that it is probable that the economic benefits will flow to the Group and the amount of revenue can be measured reliably).

RESERVES

The Group and Company's reserves are as follows:

- Called up share capital reserve represents the nominal value of the shares issued.
- The share premium account includes the premium on issue of equity shares, net of any issue costs.
- Profit and loss account represents cumulative profits or losses, net of dividends paid and other adjustments.

RELATED PARTY TRANSACTIONS

The Group has taken advantage of the exemption under FRS 102 Section 33.1A 'Related Party Disclosures' and has not disclosed transactions or balances between wholly owned subsidiary undertakings.

2. CRITICAL ACCOUNTING JUDGEMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY

In the application of the Group's accounting policies, which are described in note 1, the directors are required to make judgements (other than those involving estimations) that have a significant impact on the amounts recognised and to make estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources.

The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

CRITICAL JUDGEMENTS IN APPLYING THE GROUP'S ACCOUNTING POLICIES

The following are the critical judgements that the directors have made in the process of applying the Group's accounting policies and that have the most significant effect on the amounts recognised in the financial statements.

Impairment of goodwill, intangible and tangible assets

The Group determined based on the criteria in FRS 102 that there are no indicators of impairment identified at the balance sheet date in respect of goodwill, intangibles and tangible assets. In reaching this judgement, management considered the external market and business unit performance. As this was the conclusion reached, management was not required to complete an assessment of the recoverable amount of the assets.

KEY SOURCE OF ESTIMATION UNCERTAINTY

The key assumptions concerning the future, and other key sources of estimation uncertainty at the balance sheet date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are discussed below.

Defined benefit pension schemes

The Group operates a number of defined benefit pension schemes. The actuarial valuations of these schemes are reliant on a number of assumptions, including the discount rate, the inflation rate and the mortality rate. The assumptions applied as part of these valuations are based on forecasted trends and are closely monitored by the Group.

The most recent actuarial valuations of these schemes and the present value of the defined benefit obligations for the purpose of the financial statements were carried out at 26 July 2025 by independent qualified actuaries. The directors have conducted sensitivity analysis around the key assumptions; if the discount rate were to increase by 0.1%, this could decrease the pension scheme net deficit by approximately £9.0m; if RPI inflation were to increase by 0.1%, this could increase the pension scheme net deficit by £6.0m. Further details of the principal actuarial assumptions used in calculating the defined benefit pension deficit are given in note 30.

Recognition of deferred tax assets

The Group recognised a deferred tax asset of £90.8m (2024: £79.4m) at the period end. The recognition of deferred tax assets is based upon whether it is probable that sufficient and suitable taxable profits will be available in the future against which the reversal of temporary differences can be deducted. The total potential deferred tax asset of £219.2m (2024: £236.9m) relates to timing differences on the defined benefit pension schemes, fixed assets, defined contribution pension schemes, corporate interest restrictions, non trade losses, R&D tax credits and capital losses. Of this amount £90.8m (2024: £79.4m) has been recognised on the defined benefit pension scheme liability, future tax deductions for pension spreading, capital allowances, R&D tax credits, utilisation of losses and reactivation of interest deductions under the corporate interest restriction rules. Recognition requires estimates regarding future financial performance of the particular legal entity or tax Group in which the deferred tax asset has been recognised. The Group has considered the impact and assumptions used in these calculations to ensure the recognition of these deferred tax assets is appropriate. Details of deferred tax assets including amounts recognised at the period end can be found in note 18.

3. TURNOVER AND SEGMENTAL INFORMATION

The Group's reportable segments have been determined based on reports issued to and reviewed by the Executive Leadership team and organised in accordance with the nature of the end markets served. The Poultry segment produces both fresh and frozen primary and added value products and the Meals and Bakery segment produces a range of food products including hot cross buns, ready meals, pizza, soups and sauces. The reportable segment Poultry represents the aggregation of two operating segments UK Poultry and European Poultry until its sale on 13 October 2024. The operating segments have been aggregated into one reportable segment as they share similar characteristics such as nature of the products and production process.

The Group's Executive Leadership Team is considered to be the chief decision-making body for deciding how to allocate resources and for assessing operating performance. Segmental performance is evaluated through adjusted EBIT.

The accounting policies of the reportable segments are the same as the Group's accounting policies described in note 1.

TURNOVER

	52 weeks ended 26 July 2025 £m	52 weeks ended 27 July 2024 £m
Poultry	**1,919.7**	2,456.9
Meals and Bakery	**643.5**	592.3
Total	**2,563.2**	3,049.2

All turnover relates to the Group's principal activity of food manufacturing.

ADJUSTED EBIT

Adjusted EBIT is operating profit including share of operating (loss) / profit from associates and joint ventures, before defined benefit pension scheme administration costs and exceptional items.

	Note	**52 weeks ended 26 July 2025 £m**	52 weeks ended 27 July 2024 £m

Net finance charge	**(64.3)**	(66.2)

5. EXCEPTIONAL ITEMS

	52 weeks ended 26 July 2025 £m	52 weeks ended 27 July 2024 £m
Redundancy, disruption and closure costs (inclusive of asset write downs)	-	0.2
Project costs	-	2.0
Total exceptional items	-	2.2

Current Period

There were no exceptional items reported in the period.

Prior Period

During the period, the Group incurred £2.0m of project costs. This included £0.8m of costs in respect of a disposal transaction not completed and £1.2m further costs in relation to Project Agile. Project Agile is a significant multi-year project to align Group management structures more closely with the underlying business units.

A £0.2m charge was incurred during the year for the remeasurement of the site closure provision exceptionalised in the 52 weeks ended 29 July 2023 in conjunction with the closure of the Llangefni site.

The tax effect of the exceptional items on the amounts charged to the profit and loss account for taxation was:

	52 weeks ended 26 July 2025 £m	52 weeks ended 27 July 2024 £m
Tax credit on exceptional items	-	0.3
Decrease in tax charge to profit and loss account	-	0.3

6. PROFIT BEFORE TAXATION

Profit before taxation is arrived at after charging / (crediting):

	Note	**52 weeks ended 26 July 2025 £m**	52 weeks ended 27 July 2024 £m
Auditor's remuneration for audit and audit related services		**1.4**	1.1

Current taxation	**(2.3)**	(4.7)
Deferred taxation	**15.1**	(1.2)
Tax credit / (charge) on profit	**12.8**	(5.9)
Tax relating to components of other comprehensive income	**(0.6)**	6.2
Total tax credit recognised in profit and loss and other comprehensive income	**12.2**	0.3

Finance Act 2024 confirmed that the UK corporation tax rate will remain at 25% from 1 April 2023 as previously enacted. Accordingly, when calculating the UK deferred tax assets and liabilities as at 26 July 2025, all UK timing differences have been calculated using the current UK corporation tax rate of 25%.

The OECD Pillar Two model rules were enacted within UK tax legislation in July 2023 via Finance (No.2) Act 2023. The Pillar 2 rules aim to ensure large multinational groups pay a minimum amount of income tax globally.

The Group is a qualifying group under the Pillar Two legislation due to its revenue exceeding €750m. As a result, the Pillar Two rules apply to the Group for the accounting period ending 26 July 2025.

The application of the Pillar Two rules is required to be considered for the financial statements ending 26 July 2025 in respect of deferred tax and the potential impact on future tax charges and these are noted below:

- Deferred Tax – the FRS 102 mandatory temporary exception from accounting for deferred tax under the Pillar Two rules has been applied when preparing the financial statements for the period to 26 July 2025.
- Impact on future on tax charges - The Group does not expect Pillar Two taxes to have a material impact on the future tax charges reflected in the Group's financial statements on the basis the Group disposed of its European trading operations in October 2024.

There is no expiry date on timing or differences, unused tax losses or tax gains.

9. TAXATION ON PROFIT (CONTINUED)

The corporation tax charge is different to the standard UK corporation tax rate of 25.00% (2024: 25.00%). The differences are analysed below:

	52 weeks ended 26 July 2025 £m	52 weeks ended 27 July 2024 £m
Current tax reconciliation		
Profit before taxation	**108.3**	35.5
Taxation on profit at the standard UK corporation tax rate of 25.00% (2024: 25.00%)	**(27.1)**	(8.9)
Effects of:		
- Amortisation not deductible for tax purposes	**(2.3)**	(2.3)
- Expenses not deductible for tax purposes	**(3.0)**	(2.7)
- Income not taxable	**1.4**	1.9
- Gains on disposal subject to substantial shareholding exemption	**13.3**	-
- Differences between UK and overseas tax rates	**0.6**	1.2
- Adjustment in respect of prior periods	**(0.3)**	-
- Deferred tax not provided	**30.2**	4.9
Tax credit / (charge) for the period	**12.8**	(5.9)

10. PROFIT ATTRIBUTABLE TO THE COMPANY

As permitted by Section 408 of the Companies Act 2006, no separate profit and loss account or statement of comprehensive income is presented in respect of the parent Company. The profit attributable to the Company is disclosed in the footnote to the Company's balance sheet.

11. DIVIDENDS ON EQUITY SHARES

No dividends have been declared or paid for the period ending 26 July 2025 (2024: £nil).

12. INTANGIBLE FIXED ASSETS

GROUP	**Goodwill £m**	**Software £m**	**Total £m**

At 27 July 2024	55.7	12.0	177.5	245.2

The total net book value of assets includes £0.2m (2024: £9.1m) in respect of assets held under finance leases, with the reduction from last year driven by the disposal of the European Operations, as disclosed in note 15. Depreciation charged in the year with respect to assets held under finance leases is £0.5m (2024: £2.3m).

During the year there was no impairment of tangible fixed assets (2024: £0.5m).

There were £nil fixed assets held by the Company (2024: £nil).

14. INVESTMENTS

The parent Company and the Group have investments in the following subsidiary undertakings, joint ventures and other investments.

* Companies directly owned by Boparan Holdings Limited.

^ The Company's subsidiary 2 Sisters Food Group Limited owns 50% of the ordinary share capital of Hook 2 Sisters Limited. This has been disposed subsequent to the balance sheet date (see note 34).

+ For the period ending 26 July 2025 the following companies were entitled to exemption from audit under s479A of the Companies Act 2006 relating to subsidiary companies.

[X] Companies have been dissolved after the balance sheet date.

14. INVESTMENTS (CONTINUED)

COMPANY	Total £m
Cost	
At 27 July 2024	786.6
Disposal of investment	(10.6)
At 26 July 2025	**776.0**
Provisions for impairment	
At 27 July 2024 and 26 July 2025	**(140.1)**
Carrying value at 26 July 2025	**635.9**

During the year, the Company disposed of its investment in 2 Sisters Europe BV. See note 15 for further details.

Provisions for impairment are made where it is deemed the carrying value of the investment will not be recovered. The directors consider the value of investments to be supported by their underlying assets and future cash flows.

During the year there were no (2024: £118.3m) provisions for impairment recorded, where the recoverable value was deemed to be less than the carrying value. In the prior year, an impairment totalling £118.3m was recorded, this principally arose through the simplification of subsidiary companies within the Poultry division. The simplification resulted in the net assets of Amber Foods Limited being reduced to nil following both the hive across of assets to another Group company and a dividend distribution to the Company of £329.5m during the year. Consequently, the carrying value of the investment was fully provided against.

GROUP	Associate £m	Joint Venture £m	Total £m

Investment in associate

During the year, the Company's subsidiary 2 Sisters Europe BV held a 27.54% (2024: 27.54%) interest in Noblesse Proteins Investments B.V., a company incorporated in The Netherlands was disposed of part way through the year. See note 15 for further details.

Investment in joint venture

The Company's subsidiary 2 Sisters Food Group Limited owns 50% of the ordinary share capital of Hook 2 Sisters Limited.

After the year end, the Company sold its ordinary share capital of Hook 2 Sisters Limited (see note 34) for £1 of consideration. The carrying value of £4.3m was fully impaired as at 26 July 2025.

15. SALE OF OPERATIONS

52 weeks ended 26 July 2025

On 13 October 2024, the Group disposed of its 100% interest in 2 Sisters Europe B.V. and its subsidiaries ("European operations") to Boparan Private Office Limited, a related company. The disposed operation contributed profit after tax of £2.5m up to the date of disposal. A gain of £53.2m was recognised in the profit and loss account.

	£m
Goodwill	2.5
Tangible fixed assets	76.0
Investment in Associate	7.5
Current assets	79.4
Current liabilities	(70.0)
Finance leases	(5.4)
Cash	17.7
Minority interest	(2.7)

Transaction costs	3.3
Profit on disposal	53.2
Sale proceeds	**161.5**
Satisfied by:	
Cash and cash equivalents	**153.2**
Deferred consideration	**8.3**

Gross cash consideration from the disposal was £161.5m, of which £153.2m has been settled in cash during the year. The remaining £8.3m is deferred and will be settled in two equal instalments in January 2026 and January 2027. This was offset by transaction expenses of £3.3m, of which £2.5m has been settled in cash during the year. Total year to date cash inflow from the disposal was therefore £133.0m, inclusive of cash disposed of £17.7m.

52 weeks ended 27 July 2024

There were no disposals made during the year.

Costs of £0.1m were recognised during the period relating to the disposal of Spice Holdco Limited and Portumna Pastry Limited that took place in FY23.

16. INVENTORY

	GROUP	
	26 July 2025 £m	27 July 2024 £m
Raw materials and consumables	**29.8**	26.4
Work in progress	**9.7**	10.0
Finished goods and goods for resale	**21.3**	31.0
	60.8	67.4

In the opinion of the directors, the carrying value of inventory is not materially different to the replacement cost.

There was £nil inventory held by the Company at the period end (2024: £nil).

17. DEBTORS

	GROUP		COMPANY	
	26 July 2025 £m	27 July 2024 £m	**26 July 2025 £m**	27 July 2024 £m
Amounts falling due within one year:				
Trade debtors	**58.1**	113.5	**-**	-
Amounts owed by related parties (note 32)	**17.3**	7.2	**4.4**	-
Other debtors	**34.9**	41.4	**-**	-
Prepayments and accrued income	**11.0**	16.3	**0.8**	-
Corporation tax	**-**	0.1	**10.6**	11.5
Amounts falling due after more than one year:				
Amounts owed by joint ventures (note 32)	**-**	3.3	**-**	-
Amounts owed by Group undertakings	**-**	-	**498.0**	643.1
Amounts owed by related Parties (note 32)	**4.3**	-	**4.3**	-
	125.6	181.8	**518.1**	654.6

Other debtors primarily comprises sales tax receivables, research and development tax receivable, supplier rebate debtor and supplier trade deposits.

Included in amounts owed by related parties is deferred consideration from the sale of 2 Sisters Europe B.V which will be settled in two equal instalments January 2026 and January 2027 (see note 15).

18. DEFERRED TAX ASSET

	26 July 2025 £m	27 July 2024 £m
Deferred tax asset at the start of the period	**79.4**	74.4
Current period credit / (charge) to profit and loss account	**15.1**	(1.2)
Current period (charge) / credit to other comprehensive income	**(0.6)**	6.2
Disposal of subsidiary	**(3.1)**	-
Deferred tax asset at the end of the period	**90.8**	79.4

Deferred tax assets / (liabilities) are recognised at the rate applicable at the time the underlying asset / (liability) is expected to reverse, and are analysed as follows:

	26 July 2025 £m	27 July 2024 £m
Accelerated capital allowances	**15.1**	33.3
Defined benefit pension scheme	**34.7**	33.7
Short term timing differences (including pension spreading)	**2.7**	3.1
Losses	**18.4**	6.4
R&D expenditure credit	**3.2**	2.9
Corporate interest restriction	**16.7**	-
	90.8	79.4

The Company has deferred tax assets of £33.6m (2024: £5.0m) in respect of losses and interest reactivations under corporate interest restriction rules that are included within the Group deferred tax asset of £90.8m (2024: £79.4m).

No deferred tax asset has been recognised on balances totalling £513.6m at 26 July 2025 (2024: £630.0m) as it is uncertain whether these will be utilised against future taxable profits, gains or interest capacity. Of this, £166.8m (2024: £166.8m) relates to capital losses, £140.8m (2024: £187.0m) relates to accelerated capital allowances, £1.2m relates to short term timing differences (2024: £0.9m) and £204.8m (2024: £275.3m) relates to corporate interest expense carried forward as at 26 July 2025. The Group's unrecognised deferred tax asset on these balances at 25% would be £128.4m (2024: £157.5m).

19. CREDITORS: AMOUNTS FALLING DUE WITHIN ONE YEAR

	GROUP		COMPANY	
	26 July 2025 £m	27 July 2024 £m	**26 July 2025 £m**	27 July 2024 £m
Obligations under finance leases (note 21)	**0.2**	1.5	-	-
Bond interest accrual (note 21)	**7.5**	5.3	-	-
Other borrowings interest accrual (note 21)	-	0.3	-	0.3
Other borrowings (note 21)	-	9.8	-	9.8
Trade creditors	**169.9**	205.1	-	-
Amount owed to Group undertakings	-	-	**978.5**	1,130.9
Amount owed to related parties (note 32)	**17.9**	9.2	-	-
Amount owed to joint venture (note 32)	**62.4**	68.3	-	-
Other taxation and social security	**9.8**	10.7	-	-
Other creditors	**1.9**	8.2	-	-
Accruals and deferred income	**72.1**	85.3	-	-
Government grants	-	0.1	-	-
	341.7	403.8	**978.5**	1,141.0

Other creditors principally relate to payables in respect of tangible fixed assets.

20. CREDITORS: AMOUNTS FALLING DUE AFTER MORE THAN ONE YEAR

	GROUP		COMPANY	
	26 July 2025 £m	27 July 2024 £m	**26 July 2025 £m**	27 July 2024 £m
Obligations under finance leases (note 21)	-	5.2	-	-
Bond notes and other borrowings (note 21)	**381.6**	517.8	-	-
	381.6	523.0	-	-

21. BORROWINGS

	GROUP	
	26 July 2025 £m	27 July 2024 £m
Bond notes	**390.0**	525.0
Bond discount	**-**	(4.8)
Bond interest accrual (note 19)	**7.5**	5.3
Unamortised prepaid bond fees	**(7.6)**	(2.4)
Bond notes at amortised cost (note 23)	**389.9**	523.1
Other borrowings	**-**	10.0
Other borrowings interest accrual (note 19)	**-**	0.3

Within one year or less or on demand (note 19)	**7.5**	15.4
More than one year but not more than five years (note 20)	**381.6**	517.8
	389.1	533.2
Obligations under finance leases:		
Within one year or less or on demand (note 19)	**0.2**	1.5
More than one year but not more than two years (note 20)	**-**	2.1
More than two years but not more than five years (note 20)	**-**	1.8
More than five years (note 20)	**-**	1.3
	0.2	6.7
Total borrowings	**389.3**	539.9

On the 7 November 2024, the Group completed a full capital structure refinance, resulting in the issuance of a new £390.0m senior secured bond and a new £80.0m secured Revolving Credit Facility (RCF). Bond notes and other borrowings held in prior year were fully repaid in conjunction with the refinance.

The bonds comprise of £390.0m Senior Loan Notes due November 2029 at an interest rate of 9.375% per annum. The Group has an £80.0m super senior secured RCF which may be increased on an uncommitted basis to £90.0m at the option of the Group, maturing in November 2029.

Other borrowings include amounts drawn on the Group's RCF facility and was undrawn at the year end (2024: £nil). The principal subsidiaries are guarantors to the facilities.

The Company or its affiliates may from time to time seek to retire or purchase the Company's outstanding debt. Such retirements or repurchases, if any, may depend on prevailing market conditions, the Company's liquidity requirements, contractual restrictions and other factors.

Finance leases are secured over the assets to which they relate.

22. PROVISIONS FOR LIABILITIES

	Restructuring £m	Other £m	Total £m
At 27 July 2024	0.3	2.2	2.5
Current period charge to the profit and loss account:			
- exceptional	2.5	-	2.5
- non-exceptional	0.3	0.4	0.7
Utilised in the period:			
- exceptional	(2.7)	-	(2.7)
- non-exceptional	-	(0.2)	(0.2)
At 26 July 2025	**0.4**	**2.4**	**2.8**

Provisions of £2.8m (2024: £2.5m) comprise:

- £0.4m (2024: £0.3m) in relation to provisions for site restructuring costs. These provisions are materially expected to be settled within 12 months.
- £2.4m (2024: £2.2m) of other provisions largely relate to potential employer liability and industrial illness claims, and property provisions. These provisions are materially expected to be settled within 12 months with the exception of property provisions which will unwind over the remaining term of the lease.

At the period end the Company had £nil provisions (2024: £nil).

23. FINANCIAL INSTRUMENTS

The carrying values of the Group's financial instruments are summarised by category below:

	Note	26 July 2025 £m	27 July 2024 £m
Financial assets			
Equity instruments measured under the equity method:			
Fixed asset unlisted investments	14	-	10.9
Measured at amortised cost:			
Trade debtors	17	**58.1**	113.5
Amounts owed by related parties	17	**17.3**	7.2
Amounts owed by joint ventures	17	-	3.3
Prepayments and accrued income	17	**11.0**	16.3
Cash and cash equivalents		**105.4**	47.2
		191.8	198.4
Financial liabilities			
Measured at amortised cost:			
Trade creditors	19	**169.9**	205.1
Amount owed to related parties	19	**17.9**	9.2
Amount owed to joint venture	19	**62.4**	68.3
Accruals and deferred income	19	**72.1**	85.3
Bond notes	21	**389.9**	523.1
(Prepaid fees) / other borrowings	21	**(0.8)**	10.1
Obligations under finance leases	21	**0.2**	6.7
		711.6	907.8

The Group's income, expenses, gains and losses recognised in profit and loss in respect of financial instruments are summarised below:

	Note	52 weeks ended 26 July 2025 £m	52 weeks ended 27 July 2024 £m
Interest expenses			
Total interest expense for financial liabilities at amortised cost	4	**57.9**	62.3
		57.9	62.3
Other expenses in respect of financial instruments			
(Loss) / profit recognised in the period relating to unlisted equity investments	14	**(3.3)**	0.5
Total foreign exchange profit / (loss) on financial liabilities measured at amortised cost	28	**0.7**	(0.3)
		(2.6)	0.2

24. DERIVATIVE FINANCIAL INSTRUMENTS

The Group has the following derivatives included at fair value in the balance sheet:

	Due within one year		Due after one year	
	26 July 2025 £m	27 July 2024 £m	**26 July 2025** £m	27 July 2024 £m
Derivatives accounted for at fair value through profit and loss:				
Assets				
Forward foreign currency contracts	-	-	-	-

The fair value of the forward currency contracts was calculated by reference to current forward exchange contracts with similar maturity profiles.

Accounted for at fair value through profit or loss

The following table details the forward foreign currency contracts outstanding at each period end.

	Average contractual exchange rate		Notional value		Fair value	
	2025	2024	**2025** £m	2024 £m	**2025** £m	2024 £m
Buying EUR / PLN:						
In less than 3 months	-	1.1716	-	**48.9**	-	-
In 3 months to 1 year	-	1.1716	-	**6.9**	-	-
			-	**55.8**	-	-

There were no open derivatives at 26 July 2025 following the disposal of the European operations during the year.

25. SHARE CAPITAL AND SHARE PREMIUM ACCOUNT

	26 July 2025 £m	27 July 2024 £m
Allotted, called up and fully paid	-	-

The nominal value of the share capital issued at the end of the period was £7,730 (2024: £7,730).

The classes of ordinary share capital in issue at the start and the end of the period are shown below:

	No of Shares	Nominal Value	Price Paid	Issued Share Capital £m	Share Premium £m
Ordinary (1) shares of £0.01 each	500,800	£0.01	£0.01	-	-
Ordinary (2) shares of £0.01 each	2	£0.01	£487.16	-	-
Ordinary (3) shares of £0.01 each	12,316	£0.01	£487.17	-	6.0
Ordinary (4) shares of £0.01 each	225,799	£0.01	£487.15	-	110.0
Ordinary (5) shares of £0.01 each	20,527	£0.01	£487.16	-	10.0
Ordinary (6) shares of £0.01 each	13,548	£0.01	£487.16	-	6.6
	772,992			**-**	**132.6**

All tranches of ordinary shares issued have equal voting rights and the right to full participation in any dividends and returns of capital.

26. RECONCILIATION OF OPERATING PROFIT TO NET CASH FLOW FROM OPERATING ACTIVITIES

	Note	**26 July 2025 £m**	27 July 2024 £m
Operating profit		**122.7**	101.3
Adjustments for:			
Depreciation of tangible assets	13	**33.8**	40.9
Amortisation of intangible assets	12	**10.7**	11.5
Impairment of tangible assets		**-**	0.5
Defined benefit pension scheme administration costs	30	**4.2**	3.7
Loss on disposal of fixed assets		**1.6**	0.4
Exceptional items charged to operating profit	5	**-**	2.2
Grants and other non-cash movements		**-**	(0.4)
Operating cash flow before movement in working capital		**173.0**	160.1
(Increase) / decrease in inventory		**(12.4)**	4.1
Decrease / (increase) in debtors		**0.9**	(7.9)
Increase in creditors and provisions		**18.3**	11.1
Cash impact of exceptional items*		**(0.3)**	(1.9)
Payments made in respect of defined benefit pension schemes	30	**(18.5)**	(11.5)
Cash generated from operations		**161.0**	154.0

*Cash paid in year relates to exceptional items that were expensed in the prior year.

27. RECONCILIATION OF NET CASH FLOW TO MOVEMENT IN NET DEBT

	26 July 2025 £m	27 July 2024 £m
Increase in cash	**57.5**	9.0
Cash inflow from debt and lease financing	**161.3**	38.7
Change in net debt resulting from cash flows	**218.8**	47.7
Movement in prepaid bond fees	**(8.8)**	(5.7)
Capital element of finance leases	**-**	(2.6)
Effect of foreign exchange rates	**0.7**	(0.3)
Movement in net debt	**210.7**	39.1
Net debt brought forward	**(487.1)**	(526.2)
Net debt carried forward	**(276.4)**	(487.1)

28. ANALYSIS OF NET DEBT

	27 July 2024 £m	Cash Flow £m	Disposal of Subsidiary £m	Other Movements £m	Foreign Exchange £m	**26 July 2025 £m**
Cash balances	47.2	75.2	(17.7)	-	0.7	**105.4**
Debt due within one year	(15.4)	47.2	-	(39.3)	-	**(7.5)**
Debt due after more than one year	(517.8)	144.8	-	(8.6)	-	**(381.6)**
Finance leases	(6.7)	1.1	5.4	-	-	**(0.2)**
Total borrowings (note 21)	(539.9)	193.1	5.4	(47.9)	-	**(389.3)**
Interest accrual	5.6	(37.2)	-	39.1	-	**7.5**
	(534.3)	155.9	5.4	(8.8)	-	**(381.8)**
Net debt	(487.1)	231.1	(12.3)	(8.8)	0.7	**(276.4)**

Net debt comprises bonds, other borrowings and finance leases net of cash. These are stated at period end exchange rates, or hedged rates where there is an effective external hedge in place. The other movement of £8.6m on debt due after more than one year relates to the movement in bond fees during the year. In the balance sheet, borrowings are shown net of prepaid bond fees. Management monitor and view the net debt figure excluding prepaid fees and so it is added back into net debt in the table above.

During the period the Group entered into no finance lease agreements (2024: £2.6m).

	29 July 2023 £m	Cash Flow £m	Other Movements £m	Foreign Exchange £m	Reclass £m	**27 July 2024 £m**
Cash balances	38.6	9.0	-	(0.4)	-	**47.2**
Debt due within one year	(40.6)	80.3	(45.3)	-	(9.8)	**(15.4)**
Debt due after more than one year	(521.9)	-	(5.7)	-	9.8	**(517.8)**
Finance leases	(7.9)	3.7	(2.6)	0.1	-	**(6.7)**
Total borrowings (note 21)	(570.4)	84.0	(53.6)	0.1	-	**(539.9)**
Interest accrual	5.6	(45.3)	45.3	-	-	**5.6**
	(564.8)	38.7	(8.3)	0.1	-	**(534.3)**
Net debt	(526.2)	47.7	(8.3)	(0.3)	-	**(487.1)**

The other movement of £5.7m on debt due after more than one year relates to the movement in bond fees during the year.

The £9.8m reclassification represents other borrowings that became due within one year.

29. FINANCIAL COMMITMENTS

CAPITAL COMMITMENTS

GROUP

There were capital commitments contracted for but not provided for of £14.4m at 26 July 2025 (2024: £5.0m). These commitments related to the purchase of plant & fixtures.

COMPANY

There were no capital commitments contracted for but not provided for at the period end (2024: £nil).

OPERATING LEASE COMMITMENTS

GROUP

Total future minimum lease payments under non-cancellable operating leases are as follows:

	26 July 2025 £m	27 July 2024 £m
Land and buildings leases expiring:		
Within one year	**3.2**	5.5
Between one and five years	**9.1**	14.5
After five years	**5.6**	6.3
	17.9	26.3
Other leases expiring:		
Within one year	**6.3**	6.9
Between one and five years	**7.0**	7.7
After five years	**0.1**	-
	13.4	14.6

Other leases consist of plant and machinery and fixture and fittings.

COMPANY

Total future minimum lease payments under non-cancellable operating leases at the period end were £nil (2024: £nil).

30. PENSION ARRANGEMENTS

DEFINED CONTRIBUTION SCHEMES

The Group contributes to defined contribution schemes for all qualifying employees. The total cost charged to the profit and loss of £12.1m (2024: £13.8m) represents contributions payable to these schemes by the Company at rates specified in the rules of the plans. At 26 July 2025 contributions of £1.0m (2024: £1.0m) due in respect of the current reporting period had not been paid over to the schemes.

DEFINED BENEFIT SCHEMES

The Group operates a number of defined benefit schemes for qualifying employees, principally the Northern Foods Pension Scheme, the R & K Wise Scheme, the Lloyd Maunder Limited Retirement Benefit and Life Assurance Scheme (collectively the Schemes) and Northern Foods Pension Builder (the Pension Builder) in the United Kingdom and the Green Isle Food Group Retirement and Death Benefit Plan (the Plan) in the Republic of Ireland. The Pension Builder and the Plan employees are entitled to retirement benefits based on pay and service. The Pension Builder and the Plan are funded schemes whilst the Group's Post-retirement medical benefit scheme is unfunded. The Schemes and the Plan are final salary schemes. The Pension Builder is a defined benefit scheme based on the career average principle. The assets of the Pension Builder and the Plan are held in trustee administered funds separate from the finances of the Group. All UK and Irish schemes are closed to new entrants.

The Northern Foods Pension Scheme and Northern Foods Pension Builder Scheme were both closed to future accrual with effect from 1 November 2011. A similar proposal became effective for the Green Isle pension scheme from 31 October 2013.

Other considerations

In June 2023, the High Court handed down a decision in the Virgin Media Ltd versus NTL Pension Trustees II Limited, which considered the validity of certain historical pension scheme changes due to a lack of actuarial confirmation required by section 37 of the Pension Schemes Act 1993. A subsequent appeal brought by Virgin Media against the aspects of the June 2023 decision was dismissed by the court of appeal in July 2024. The implications of this case could be relevant for other defined benefit plans. On 5 June 2025 the Department for Work and Pensions (DWP) announced the intention to introduce legislation to give affected pension schemes the ability to retrospectively obtain written actuarial confirmation that historic benefit changes met the necessary standard.

The Group and Trustees have been reviewing the implications of this for the Group's schemes. On the basis of this review and the recent news from the DWP it is considered that past rule changes do not give rise to any material financial impacts. The impact of any future developments in this regard will be monitored closely.

Assumptions and valuations

The most recent actuarial valuations of the defined benefit schemes for the purpose of the financial statements and the present value of defined benefit obligations were carried out at 26 July 2025 by independent qualified actuaries. The present value of the defined benefit obligation was measured using the projected unit credit method.

It has been deemed appropriate by management to aggregate all pension schemes together in the disclosure notes below. Funding plans agreed to reduce the deficit (principally relating to the Northern Foods Pension Scheme) are discussed later in this note. Principal assumptions are disclosed for the Northern Foods Pension Scheme only on the basis that there are no significant differences between the assumptions used for the other schemes.

30. PENSION ARRANGEMENTS (CONTINUED)

DEFINED BENEFIT SCHEMES (CONTINUED)

The principal assumptions used for the actuarial valuations of the Schemes were:

	26 July 2025	27 July 2024
Rate of increase in salaries	**n/a**	n/a
Inflation assumption	**2.96%**	3.14%
Discount Rate	**5.70%**	5.03%
Rate of increase in pension payments	**2.82%**	2.95%
Mortality	**CMI 2024**	CMI 2023

The Group has adopted the SAPS 3 Heavy tables with scaling factors appropriate for each section of the membership with the core CMI 2024 projections with a long-term rate of improvement of 1.00% (2024: 1.00%) per annum.

The life expectancy in years for a member aged 65 is as follows:

		26 July 2025 (years)	27 July 2024 (years)
Current pensioner	- male	**20.0**	19.6
	- female	**21.8**	21.6
Future pensioner	- male	**20.5**	20.1
	- female	**22.9**	22.8

POST-RETIREMENT MEDICAL BENEFIT SCHEME

Until 31 March 1999, Northern Foods Limited operated a post-retirement medical benefit scheme. The method of accounting, assumptions and the frequency of valuations are similar to those used for the defined benefit pension schemes detailed above. The main actuarial assumptions are the underlying medical cost inflation of 4.96% per annum (2024: 5.14%) and the discount rate of 5.70% per annum (2024: 5.03%).

Amounts recognised in the income statement in respect of the Group's defined benefit schemes and post-employment medical benefit scheme are as follows:

	Defined benefit Pension schemes		**Post-retirement Benefit schemes**		**Total retirement schemes**	
	26 July 2025 £m	27 July 2024 £m	**26 July 2025 £m**	27 July 2024 £m	**26 July 2025 £m**	27 July 2024 £m
Net interest cost	**6.2**	3.6	**-**	-	**6.2**	3.6
Interest expense on effect of asset ceiling	**0.2**	0.3	**-**	-	**0.2**	0.3
Scheme administration expenses	**3.7**	3.6	**-**	-	**3.7**	3.6
Charge to profit and loss account	**10.1**	7.5	**-**	-	**10.1**	7.5
Actuarial loss / (gain)	**11.7**	52.0	**(0.1)**	(0.1)	**11.6**	51.9
Change in effect of asset ceiling	**0.1**	(2.9)	**-**	-	**0.1**	(2.9)
Recognised in other comprehensive income	**11.8**	49.1	**(0.1)**	(0.1)	**11.7**	49.0
Total loss / (gain) relating to defined benefit schemes	**21.9**	56.6	**(0.1)**	(0.1)	**21.8**	56.5

30. PENSION ARRANGEMENTS (CONTINUED)

Amounts recognised in the consolidated balance sheet in respect of the Group's defined benefit schemes and post-retirement medical benefit scheme are as follows:

	Defined benefit pension schemes		Post-retirement medical benefit scheme		Total retirement benefit schemes	
	26 July 2025 £m	27 July 2024 £m	**26 July 2025 £m**	27 July 2024 £m	**26 July 2025 £m**	27 July 2024 £m
Present value of obligations	**(809.3)**	(891.7)	**(0.1)**	(0.2)	**(809.4)**	(891.9)
Fair value of scheme assets	**670.8**	757.0	**-**	-	**670.8**	757.0
Net liability recognised in the balance sheet	**(138.5)**	(134.7)	**(0.1)**	(0.2)	**(138.6)**	(134.9)

The net pension scheme deficit in the balance sheet is stated before deduction of the associated deferred tax asset of £34.7m (2024: £33.7m), with the deferred tax asset shown separately within current assets (note 18).

Movement in the present value of defined benefit obligations were as follows:

	Defined benefit pension schemes		Post-retirement medical benefit scheme		Total retirement benefit schemes	
	26 July 2025 £m	27 July 2024 £m	**26 July 2025 £m**	27 July 2024 £m	**26 July 2025 £m**	27 July 2024 £m
Scheme liabilities at the start of the period	**891.7**	888.1	**0.2**	0.3	**891.9**	888.4
Interest cost	**43.0**	42.1	**-**	-	**43.0**	42.1
Actuarial (gain) / loss	**(73.5)**	16.1	**(0.1)**	(0.1)	**(73.6)**	16.0
Benefits paid	**(53.1)**	(51.3)	**-**	-	**(53.1)**	(51.3)
Effect of asset ceiling	**0.1**	(2.9)	**-**	-	**0.1**	(2.9)
Exchange loss / (gain)	**1.1**	(0.4)	**-**	-	**1.1**	(0.4)
Scheme liabilities at the period end	**809.3**	891.7	**0.1**	0.2	**809.4**	891.9

30. PENSION ARRANGEMENTS (CONTINUED)

Movements in the fair value of scheme assets were as follows:

	Defined benefit pension schemes	
	26 July 2025 £m	27 July 2024 £m
Scheme assets at start of the period	**757.0**	799.1
Interest income	**36.6**	38.2
Contributions by the employer	**18.1**	11.0
Benefits paid	**(53.1)**	(51.3)
Administration expenses	**(3.7)**	(3.6)
Actuarial loss on scheme assets	**(85.2)**	(35.9)
Exchange gain / (loss)	**1.1**	(0.5)
Fair value of scheme assets at the period end	**670.8**	757.0

Contributions by the employer of £18.1m (2024: £11.0m) include £16.6m (2024: £9.5m) of funding, deferral and disposal contributions and £1.5m (2024: £1.5m) was paid in respect of administration expenses.

The Group have agreed to make payments in respect of the shortfall in the Northern Foods Pension Scheme, until September 2030. The phasing of the contributions under the existing funding agreement will change by year with payments of £17m in FY26, £18m in FY27, £22m in FY28, £46m in FY29 and £47m in FY30.

The analysis of the scheme assets at the balance sheet date was as follows:

	26 July 2025 £m	27 July 2024 £m
Equities	**78.8**	98.0
Bonds	**24.7**	906.8
Cash	**555.8**	(338.3)
Hedge Funds	**-**	78.9
Other	**11.5**	11.6
Total fair value of assets	**670.8**	757.0

The other asset category includes derivatives and property assets.

30. PENSION ARRANGEMENTS (CONTINUED)

The analysis of the total costs charged through administrative expenses during the period was as follows:

	26 July 2025 £m	27 July 2024 £m
Scheme administrative expenses	**3.7**	3.6
PPF levies	**0.5**	0.1
Total defined benefit pensions costs charged through administrative expenses (note 3 & 26)	**4.2**	3.7

The analysis of the total cash payments during the period was as follows:

	26 July 2025 £m	27 July 2024 £m
Contributions	**18.1**	11.0
PPF levies	**0.4**	0.5
Total cash payments in respect of defined benefit pension schemes (note 26)	**18.5**	11.5

31. CONTINGENT LIABILITIES

Boparan Holdings Limited and other Group subsidiary companies are guarantors in respect of the Senior Loan Notes due 2029, whereby they absolutely and unconditionally guarantee the principal and interest on the Senior Loan Notes. The same companies are cross guarantors in respect of the Boparan Holdings Group's £80.0m super senior Revolving Credit Facility which is a facility of Boparan Holdings Limited.

The amount drawn down on this facility at the balance sheet date was £nil (2024: £nil). The total bond value as at 26 July 2025 per the Group financial statements was £389.9m net of fees, interest accrued and discounting (2024: £523.1m) (note 21). The individually guaranteed amount is not readily available.

There are a number of contingent liabilities relating to litigation or potential claims from customers and counterparties that arise in the normal course of business, which if realised are not expected to result in a material liability to the Group. The Group regularly reviews all of these claims to determine any possible financial loss; as at 26 July 2025 no provision was considered necessary. A provision will be recognised if it is more likely than not a settlement will be required and the value of the payment can be reliably estimated.

For the purposes of the exemptions referred to in section 357 of the Irish Companies Act 2014, and not otherwise, Boparan Holdings Limited as the holding undertaking of the undertakings listed below, hereby irrevocably guarantees in respect of the financial period ended on the 26 July 2025, all of the liabilities of the undertakings listed below; provided that this guarantee shall not extend to any liability or commitment of the undertakings listed below which shall not have arisen otherwise than in respect of that financial period or which shall not constitute a liability or loss.

The liabilities in respect of the undertakings listed below, which have arisen in respect of the financial period ended on 26 July 2025, are already included within the Group's consolidated balance sheet.

Billcrest Products Limited

Beverley House Foods (Boyle) Limited

Beverley House Food Group Limited

Beverley House Foods Portumna Limited

Beverley House Group Services Limited

Poldy's Fresh Foods Limited

31. CONTINGENT LIABILITIES (CONTINUED)

For the period ending 26 July 2025 the subsidiaries of the Company listed below were entitled to exemption from audit under s479A of the Companies Act 2006 relating to subsidiary companies.

32. RELATED PARTY TRANSACTIONS (CONTINUED)

Key management personnel include all directors and a number of senior managers across the Group who together have authority and responsibility for planning, directing and controlling the activities of the Group. The total compensation paid to key management personnel for services provided to the Group was £12.0m (27 July 2024: £10.8m).

33. ULTIMATE CONTROLLING PARTY

Boparan Midco Limited is the immediate parent of the Group and R S Boparan and B K Boparan are the ultimate controlling parties.

Boparan Holdco Limited is the smallest and largest group into which the Group is consolidated. Their registered address, from which the accounts can be obtained, is Colmore Court, 9 Colmore Row, Birmingham, B3 2BJ.

34. SUBSEQUENT EVENTS

On 31 July 2025, the Group sold its 50% interest in Hook 2 Sisters Limited to 2 Agriculture Holdings Limited, a related company. Consideration for the transaction was £1, together with the waiving of a £3.25m loan from the joint venture. In conjunction with the transaction the investment value and loan value have been written down to £nil in the period to 26 July 2025.

OTHER INFORMATION

ALTERNATIVE PERFORMANCE MEASURES

In the reporting of financial information, the Group has adopted various Alternative Performance Measures (APMs). APMs should be considered in addition to FRS 102 measurements. The directors believe that these APMs assist in providing useful information on the underlying performance of the Group, enhance the comparability of information between reporting periods, and are used internally by the directors to measure the Group's performance. The key APMs that the Group focuses on are as follows:

Measure	Closest FRS 102 Measure	Definition and Reconciliation	Purpose
Adjusted EBIT	Operating profit	Adjusted EBIT is operating profit including share of operating profit from associates and joint ventures, before defined benefit pension scheme administration costs and exceptional items. Please see note 3 for a reconciliation of operating profit to Adjusted EBIT.	Adjusted EBIT is a key performance measure to assess and compare profitability. It allows for ongoing trends and performance of the Group to be measured by the directors, management and interested stakeholders.
Adjusted EBITDA	Operating profit	Adjusted EBITDA is operating profit including share of operating profit from associates and joint ventures, before depreciation, amortisation, defined benefit pension scheme administration costs and exceptional items. Please see the supporting tables below for a reconciliation of operating profit to Adjusted EBITDA.	Adjusted EBITDA is used as a key measure to understand profit and cash generation before the impact of investments (such as capital expenditure and working capital). It is also used to derive the Group's Net debt: Adjusted EBITDA ratio.
Operating cash	Net cash flows from operating activities	The cash flow equivalent of operating profit. A reconciliation of net cash flows from operating activities to operating cash is set out in the supporting tables below.	Operating cash allows us and external parties to evaluate the amount of underlying cash generated by the Group's operations before interest, tax and pensions and is a measure used by directors and management.
Free cash flow	Net cash flows from operating activities	The cash flow equivalent of Profit After Tax. A reconciliation of net cash flows from operating activities to free cash flow is set out in the supporting tables below.	Free cash flow allows us and external parties to evaluate the amount of underlying cash generated by the Group that is available for distribution and is also a measure used by the directors, management and interested stakeholders.
Net debt	Borrowings less cash and amortised deal fees	Net debt comprises bonds, other borrowings and finance leases net of cash, and net of unamortised bond and other borrowing costs. These are stated at period end exchange rates, or hedged rates where an effective hedge is in place. The components of net debt are set out in the table below.	Net Debt is the measure by which the Group and interested stakeholders assesses its level of overall indebtedness.
Net debt: Adjusted EBITDA ratio	No direct equivalent	The ratio of Covenant Net Debt to Adjusted EBITDA, over the last 12 months.	The ratio is considered a key measure of balance sheet strength and financial stability by which the Group and interested stakeholders assesses its financial position.
Adjusted EBIT margin	Operating profit divided by Turnover	Adjusted EBIT/Turnover. Calculations of this measure are included on page 10 of the Strategic report.	Adjusted EBIT margin is used as a supplemental measure of performance by the directors, management and interested stakeholders.

Measure	Closest FRS 102 Measure	Definition and Reconciliation	Purpose
Continuing Turnover	Turnover	Continuing turnover is reported turnover excluding amounts from the European Poultry operations that were disposed of during the year. Calculations of this measure is set out in the supporting tables below.	Continuing turnover is used as a supplemental measure to eliminate the effects of the European business on the period-on-period reported results.
Continuing Adjusted EBIT	Operating profit	Continuing EBITDA is Adjusted EBIT (as defined above) excluding EBIT from European Poultry operations that was disposed of during the year. Calculations of this measure is set out in the supporting tables below.	Continuing EBIT is used as a supplemental measure to eliminate the effects of the European business on the period-on-period reported results.

Reconciliation of net cash flow from operating activities to operating cash	**52 weeks ended 26 July 2025 £m**	52 weeks ended 27 July 2024 £m
